PORT AND HARBOURS.

STANLEY HARBOUR.

Port William, which includes Stanley Harbour is entered between William Point on the north and Cape Pembroke on the south, both of which are marked by lights. A further smaller light bearing 89 degrees west (true) leads up Port William.

The entrance to the inner Harbour in the south-west of Port William is a little more than 250 yards wide between Engineer Point on the east and Navy Point on the west. The minimum navigable depth at the entrance (L.W.O.S.T.) is 27 feet. Two beacons and a rock painted white on the south shore when in line bearing 179 degrees clear the Fourth Shoal, lying about 400 yards west of Tussac Point, and lead through the Narrows. Harbour lights are established on Navy and Engineer Points.

Berthing Accommodation. Inside the Inner Harbour vessels drawing up to 20 feet have plenty of room to anchor in mid-channel in about 4½ to 5 fathoms of water. There are four Jetties with a depth of 10 to 14 feet at which vessels up to 150 feet in length can berth.

Tides. The rise and fall of tides is very much affected by wind and weather. The difference varies from 7 feet at ordinary spring tides to 5½ feet at ordinary neaps.

There are no dry docks. A floating dock with a lifting capacity of 750 tons and capable of taking vessels 200 feet in length and drawing 15 feet was completed and launched in 1952. No operations are in progress to increase the depth of water within the Harbour limits.

AIR SERVICES.

(a) Returns of Aircraft arriving and departing.

(b) Air Transport Services.

(c) Air Ports (sea-plane bases and aerodromes).

(d) Licences and Certificates.

(e) Imports and Exports by Air.

At the present stage of the Colony's development there are no Air Services of any description.
