DEPTHS IN METRES

PLANS IN FALKLAND SOUND

DEPTHS IN METRES

Depths are in metres and are measured to Chart Datum, which is approximately the level of Lowest Low Water. The depths are to be used in conjunction with the Admiralty Sounding Tables. At other tides the depths will vary. The depths are referred to the datum (MSL) datum. The datum is Mean Sea Level.

Scale - The original scale and form of the chart is 1:25 000. The chart is a reproduction of the original chart and is not a new edition. The chart is a reproduction of the original chart and is not a new edition. The chart is a reproduction of the original chart and is not a new edition.

SATELLITE-DERIVED POSITIONS
Positions obtained from satellite navigation systems are normally referred to WGS 84 datum. The chart is based on the datum of the original chart. The chart is based on the datum of the original chart.

KEEP
This chart is not to be used for navigation. It is a reproduction of the original chart and is not a new edition. The chart is a reproduction of the original chart and is not a new edition. The chart is a reproduction of the original chart and is not a new edition.
