On 1st January 1902.

Insert the several Establishments of Government, arranged according to the classification in the Estimates, including every individual employed, with all the particulars specified in the several columns of the Return relative to the nature of their Duties, their Emoluments, Length of Service, &c.

Insert on the next leaf an Alphabetical List of all the Officers, and the Page in which their Office is described.

Under "Remarks" should be explained the nature of the duties performed by those Officers the designation of whose Office does not sufficiently explain the functions attached to them.

The names of permanent holders of offices alone are to be inserted in the columns. If an office has been filled during the year, or any portion of it, by an acting officer, the fact may be noted in the space for "Remarks."

Dear Mr. Harding

I shall be much
obliged if you will let
me know the average
weight of a cask of
tallow, in order that
I may find out the
number of ~~as~~ reported

Yours truly
P. Hunt

Dear Mr Hurst.

The average weight
(nett) of our tallow is about
 $4 \frac{3}{4}$ Cwt. Of course it
all depends on the size of
the cask. All our tallow
would be heavier I think,
also Mr Benners of Greenhills

That from other stations
would probably average $3 \frac{1}{2}$
Cwt per cask, all nett

The farmers all declare the
exact weight in Blue Book
returns furnished to
Mr Bennett.

Yours faithfully

W. H. Maudslayi
