CIVIL ESTABLISHMENT

OF

FOR THE YEAR

19

Insert the several Establishments of Government, arranged according to the classification in the Estimates, including every individual employed, with all the particulars specified in the several columns of the Return relative to the nature of their Duties, their Emoluments, Length of Service, &c. It is important that the full Christian Names should in every case be given.

The table should be followed by an Alphabetical List of all the Officers, showing the Page in which their Office is described.

Under "Remarks" should be explained the nature of the duties performed by those Officers the designation of whose Office does not sufficiently explain the functions attached to them.

The names of permanent holders of Offices alone are to be inserted in the columns. If an office has been filled during the year, or any portion of it, by an acting officer, the fact may be noted in the space for "Remarks".

Dependencies	The Dependencies consist of all lands and Islands between 20 and 50 degrees West longitude and South of 50 degrees South latitude and between 50 and 80 degrees West longitude and South of 50 degrees South latitude. These boundaries include a section of the Antarctic Continent South and East of Cape Horn and a large number of Islands of which the principal are South Georgia, The South Shetland, South Orkney and South Sandwich Groups. South Georgia has a fluctuating population engaged in the whaling industry, estimated for 1940 at 700. At Laurie Island, South Orkney there is a Meteorological Station where there are usually four persons. The remaining areas are uninhabited except for the presence of whaling ships at times during the working season. One birth and two deaths were registered in South Georgia in 1940.

PORT AND HARBOURS.

STANLEY HARBOUR.

Port William, which includes Stanley Harbour, is entered between William Point on the North and Cape Pembroke on the South, both of which are marked by lights. A further smaller light bearing 89 degrees West (true) leads up Port William.

The entrance to the inner harbour in the South-West of Port William is a little more than 250 yards wide between Engineer Point on the East and Navy Point on the West. The minimum navigable depth at the entrance (L.W.S.T.) is 26 feet. Two beacons on the South shore when in line bearing 185 degrees, 30 minutes (true) lead through the narrows with a depth of 31 feet. Harbour lights are established on Navy and Engineer Points.

Berthing Accommodation. Inside the inner harbour vessels drawing up to 20 feet have plenty of room to anchor in mid-channel in about $4\frac{1}{2}$ to 5 fathoms water. There are four jetties with a depth of 10 to 14 feet at which vessels up to 150 feet in length can berth.

Tides. The rise and fall of tides is very much affected by wind and weather. The difference varies from 7 feet at ordinary spring tides to $5\frac{1}{2}$ feet at ordinary neaps.

There are no dry docks. A floating dock with a lifting capacity of 750 tons and capable of taking vessels 200 feet in length and drawing 15 feet, was completed and launched in 1932. No operations are in progress to increase the depth of water within the harbour limits.

SOUTH GEORGIA.

Two floating docks are maintained at South Georgia, one at Grytviken and the other at Stromness.

The Grytviken dock has an overall measurement of 133 feet 9 inches and a breadth of 34 feet 8 inches, and has a lifting capacity of 600 tons. The dock is capable of taking vessels up to 140 feet in length and drawing 15 feet 6 inches.

The Stromness dock has an overall measurement of 150 feet 6 inches and a breadth of 34 feet 6 inches, and has a lifting capacity of 700 tons. The dock is capable of taking vessels up to 160 feet in length and drawing 15 feet.
