See remarks inside

I have spoke to Mr Boules at great length to persuade him to reconsider using plywood for external cladding and lining for both roof and walls as being unsuitable and a fire hazard, to some extent he understands this, but insists on using same and perhaps sheeting it later with iron.

I consider his application should be allowed to proceed but on the understanding that I share no responsibility on the use of plywood externally.

.....13th February,.....1969....

Dear Sir,

This may be a unused toilet but connecting pipework to it are still very active, for health purposes to the occupier the obvious top fittings should be removed correctly and both existing outlets to toilet and sink must be properly sealed off both from the inspection pits and toilet base wherever this is practical, work should proceed and a further inspection carried out before finally covering over.

Yours faithfully,

*J W Rogers.*

.....18th April,.....1969...

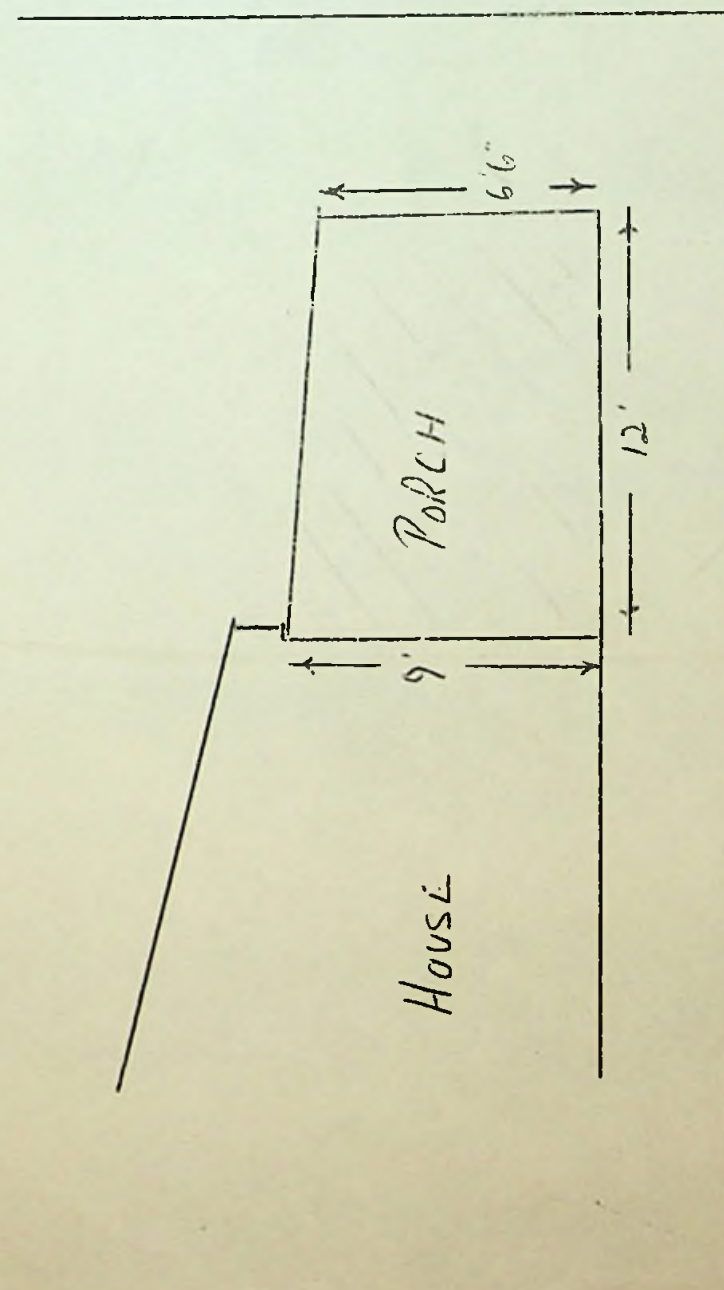

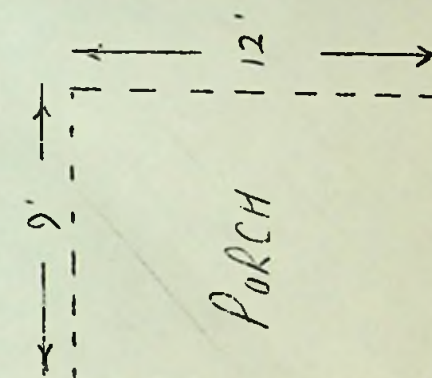

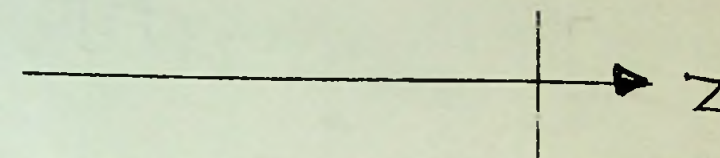

Dear Clem,

Reference your proposal (rear porch)  
During the past six months I have been called to no less than four properties similarly situated to No: 24 that have built porch's some time ago. I discovered in every case that the F.W. Drainage, run under the porch, had either sunk, become dislodged, or broken and created one hell of a pong. In one case we have had to divert the drainage completely for health reasons.

I hope this information will be of some assistance to you as No: 24 could be the same later on. Perhaps, should you find drainage below, it would be advisable to either divert it or expose it all round, reset the pipes and cast a concrete protective sleeve all round.

Yours,

*J. W. Longman*

24 Ross Rd. West.

APPLICATION

Dear Sir,

Could you please explain your intentions on:-

- (1) Where do intend diverting the present S.W. drain which at the moment is four feet from the house.
- (2) Has an agreement been reached between yourself and the owner of the adjoining premises concerning the F.W. drainage.
- (3) Who is going to be responsible for the remedial works at this inspection pit.
- (4) Please mark on your ground plan in your application what the rooms are to be used for, for example does the toilet door open into the kitchen.
- (5) 'Single quarters' The danger of health could arise from building on top of what could easily be foul air leaks from aged or damaged underground pipework, in which case the spare room or passage 'or both' should be built clear of any U.G. pipework, you could of course be doing this but it not located on your ground plan.

On part of the proposed site stands a poor quality single storey building which we shall remove to make room for the new building.

Both mains water and drainage are connected to the existing building and can be picked up with little effort.

The site is Crown Land for which the Survey has the lease.

Attached is a sketch of part of the proposed building. Please return this as it is the only one we have at present.

To The Town Clerk,  
Stanley.

T. C.

Garage Fitzroy Rd East.

The attached application bears no signatures or date - and yet it is common knowledge that the garage in question has been completed and in use for a considerable time.

I suggest you make enquiries from Mr J Murphy the approx dates he commenced and completed. Rates should be back dated accordingly.

It is worth noting that he applied for a double lot - for a double garage and this is what he has. Lot 5 & 6.

Thyours.

To The Town Clerk,  
Stanley.

I hereby make formal application to The Town Council for permission to execute the works set out hereon and in accordance with the details stated.

I understand that the work must be completed within 12 months of this date or otherwise fresh application must be made.

Sirs,

The British Antarctic Survey has applied to Government for lease of the proposed site and we await the decision from Governor in Council.

The A.C.S. has approached all interested parties and there have been no arguments against the proposal.

The building would be as shown in the attached drawing.

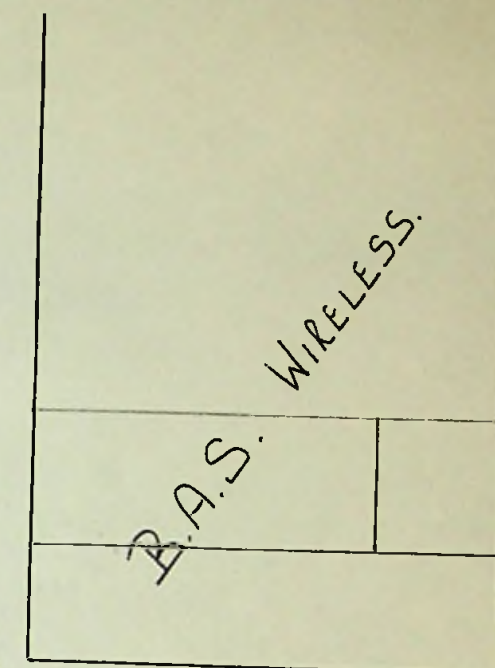

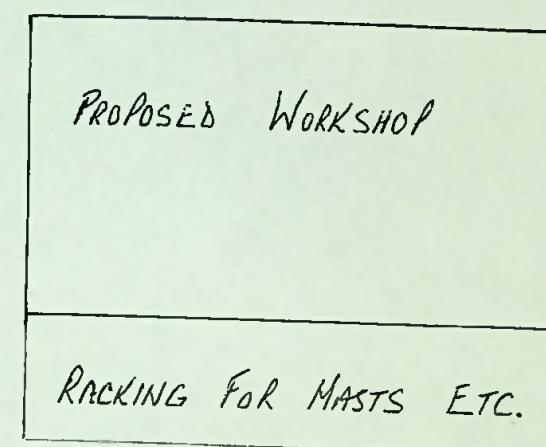

Please return drawing as we have no copy.

Yours faithfully,

Mr. H. Bennett,

STANLEY.

Dear Sir,

Your application is now approved.  
I would suggest that as you have a P.F. pipe passing below a building, that you instruct the builder that although you have specified 6" concrete over the pipe it should also have 4" to 6" under the pipe itself, and to avoid inconvenience at a later date, I am at your service to test all your pipework at this stage.

Yours faithfully,

Superintendent of Works.

No. P.D.D. 020

MEMORANDUM

It is requested that, in any reference to this memorandum the above number and date should be quoted.

February 8th, 19 72.

TO: The Town Clerk.

cc. Chairman Board of Health.

FROM: Superintendent of Works.

Stanley, Falkland Islands.

SUBJECT :-

MISS COUTTES: *BRANDON Rd.*

I am afraid these buildings could never pass.

Materials used in these timber framed erections secures no stability whatsoever, and can become, in a short time, if not already, a danger. The concrete foundations are anything but complying with general building standards necessary to conform to the regulations, and will not be very long before they will be of no assistance to supporting the sheds at all.

I recommend Town Council discuss the matter with the view to being sympathetic, owing to the circumstances of the owner not being in a position to be able to act promptly, but at the same time give her notice. The notice should be a seasonable duration to avoid hardship, say twelve months to bring the buildings up to standard, or down to nothing.

*W. J. Lyons*

Superintendent of Works.

MEMORANDUM

February 9th, 1972.

TO: The Town Clerk.

cc. Chairman Board of Health.

FROM: Superintendent of Works.

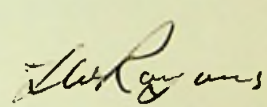

Stanley, Falkland Islands.

SUBJECT :-

MR. P. LEE - 5 ALLARDYCE STREET:

Substandard materials have been used on this garage and is an eyesore.

At this stage I recommend that he be notified as to the fact that unless he cleans it up and a considerable amount of face lifting to the materials used, that he will be directed to remove it altogether.

  
Superintendent of Works.
