To

Director of Public Works

Stanley.

MURREL RIVER BRIDGE.

Now that a new bridge over the Murrel River has been completed it is advisable to remove the old structure which is situated some 1,000 yards higher up the stream as during the winter floods it is possible that it will become dislodged and cause damage to the new bridge.

I have discussed the matter with Mr. Langdon who is in charge of this section, and he is prepared to remove the old structure and re-erect it in a safe and convenient spot for a sheep pass. I have given him permission to do this. Submitted for record, also that action taken may be approved, please.

C. Roberts.

Director of Public Works.
