THE COLONIAL SECRETARY,

Stanley

Stanley, Falkland Islands.

EQUIPMENT REQUIRED FOR SIGNAL SECTION

Sir

I beg to submit for his Excellencys' approval the following suggested Equipment to be purchased for the Training of the the Signal Section.

2. Mr Byron has kindly consented to visit "ELECTRADIX RADIOS" when he gets home, and will personally select the gear. This firm makes a speciality of surplus Government Stock, the two Telephones which were purchased for the Rifle Association, and Defence Force from this Firm were highly satisfactory.

3. As I have no Vote to meet this account I suggest the money be taken from Defence Force Funds.

4.

See Page 59,

Fig.VI35. 27/6 Buzzer Call and Signal Telephone Transmitter and 2 receivers .Pigskin Case.

Two Instruments Required.

5.

See page 69,

Fig.57b. Aldis and C.A.V.Electric.

Lamp Fitted with cable and reflector etc, 14/6

Two Instruments required likewise say 6 bulbs per instrument, and a supply of dry batteries

6.

It will also be necessary to purchase a "Cable Reel" which is carried with the operator strapped round his shoulders when on Field work.

This firm stocks them but they have made no mention in their catalogue.

I also suggest that 1000yds of telephone cable, single line be purchased. This cable is of a light quality and is suitable for the foregoing Cable Reel. ①

The cable costs £3, per 1000 yds.

The whole outfit could be purchased for about £12.

I am Sir,

Yours Obediently,

J. James Moir.
O.C.F.I.D. Force.

Major.
