Minute from Ag. Adjutant of 25/9/37.

P.W.D.

Submitted.

Any observations to offer.

2. Have you any funds available to carry out any of the work?
3. What would you recommend as the best scheme for preservation of uniformity of the building?

Res  
25/9/37

Hon Col. Sec.

I suggest that the present gun  
loader room be converted into a  
ladies cloak room, a flush

Subsequent Paper.

lavatory being fitted in the N.W. corner.

A new gun loader room approx 17' x 11' can be built onto the North end of the present barrel store which is situated to the West of the main building.

The estimate for this work is approximately \$245.

There are no funds available from P.W. votes to meet this.

Further additions to the main Bld would be unsightly and would rob the main hall of light.

Several windows have been taken away to make room for additions, with the result that the light is very poor.

MINUTE.

(It is requested that, in any reference to this minute, the above Number and the date may be quoted.)

25th September 1937.

From The Ag. Adjutant,

To The Honourable

Falk. Is. Defence Force,

The Colonial Secretary.

Stanley, Falkland Islands.

I have the honour to state that on various occasions of late, members of the Defence Force have made representations to the effect that as the Drill Hall is now now being used to a considerable extent by ladies who are members of Clubs affiliated to the Defence Force, the provision of a ladies cloak room, etc., is necessary.

The suggestion was made that an addition be erected on the north side of the Armoury, and in order to ascertain what the cost would be I approached the Public Works Dept. and the estimates of the costs, together with alternative plans, are attached.

On the plans the suggested addition is outlined in red, but Mr. Challen has also put forward an alternative proposal to convert the existing 6" gun loader room into such a convenience.

I therefore submit the matter for the consideration and approval of Government.

*S. H. Alaridge*  
Ag. Adjutant, Defence Force.
