Director
13 July 1925*

The Hon

Col Sec

Noted - the balance available under head XIV. Item 3 is £25

Subsequent Paper.

*W.C. Carter
13/7/25
Ch. Insp of Stock.*

From His Excellency the Governor

1

to The Honourable the Colonial Secretary.

Reference has been made on another paper to damage which is being done to sand traps on Peninsula by hares. It will be possible to prevent hares getting into Peninsula by fencing wire netting or fencing & gates but there will be considerable difficulty in getting rid of the hares which are already there. As the ground is absolutely bare there is no cover to hide snares but nevertheless it is worth while giving them a trial as expense will not be great. Some cover may be afforded by sand grass itself as it begins to grow with shoots & leaves of sea cabbage of which there is now a quantity.

2. Will you please send an indent to Crown Agents

for "100 wire snares for hares complete with pegs for driving into the ground to hold the snare & carrying pegs to hold the loop."

~~Estimated~~

3. Estimated cost is £3 which can be charged to Head XIV Item 3 Planting of grass.

4. A draft of letter to go with indent is attached which gives an indication of what is required.
