I assume that any
Government property, books,
gear etc in charge to
Naturah's Department will
be inventoried and turned
over to the A.O.

The dinghy behind
the hut should be handed
over to ~~Marine Department~~
who should have it put
in the water for some weeks
and then overhauled and
false keel fitted; there is
a small engine available

H.C.S.

A.

I want you to submit that since the books are of some general interest, ~~that is~~ or of value for reference they might go to the Public Library, indeed I informed the Town Clerk of the proposal some time since and he thoroughly approved. Having regard to the nature of the works the A.O. could not be sensible of any deprivation. They are mostly reports of antarctic expeditions.

2. ~~Having~~ ^{on} A's verbal instructions the dinghy has already been passed to the Harbour Dept.

H.C.S.

^{noted} she can be placed in Newalls. ~~the~~ The dinghy will have to be recaulked & new frames fitted before I am not sure which engine H.E. means and should be glad for the information

In the interests of these records to make them simple & comprehensive would it not be best for the whole of the Government Property now to be handed over, to be shown on one Inventory only. Whatever the ultimate designation of the various properties may be. I would also bring to your notice that the Agricultural Department has & is trying to form a small library from which people can borrow books.

2. I don't like the idea of your running a library for lending books many of which are valuable & some irreplaceable?

May I have the honour of drawing your attention to H.E.'s remarks about library in C.S. File 277/46 (Agricultural Institute) at X Page 8.

Dear Oliver,

I've seen the list of things reported to be from the Normalists Dept.

2. May I remind you that some of this was not from the Normalists Dept. at all, but my personal ^{casualties} stuff (cases) of which you were good enough to say you would have for me for the time being.

to the best of their ability

The shed is in a terrible mess it reflects no credit on the Executive Engineer's work men who must have transported & put them there & apparently did not attempt to inventoires them when they were taken over.

There are several other smaller items but bad storage prevents them being inventoires at this juncture

I propose to tidy & straighten out shed with my own staff so that remaining details may be viewed.

X I'd suggest that Major Butler first go over these stores & take what is wanted for F.I.C.s. L.R.B. Agricultural Officer.
