The 1980 to 2006 figures exclude persons aboard visiting vessels; the 1986 and 1991 figures also exclude persons serving with, or in the Falkland Islands in connection with, the military garrison. The 1991 through 2006 figures do not include the number of persons temporarily present (1991 = 90; 1996 = 38; 2001 = 71; 2006 = 45), or the estimated number of people temporarily absent (1991 = 119; 1996 = 140; 2001 = 112; 2006 = 84).

The 1996 through 2006 figures include persons present in the Falkland Islands in connection with the military garrison, (1996 = 483; 2001 = 534; 2006 = 477), but exclude all military personnel and their families.

TABLE 2
LOCATION OF POPULATION
(Excluding temporary residents and visitors)

	Males	Females	Total
Stanley	1060	1055	2115
East Falkland outside Stanley and Mount Pleasant	106	86	194

Islands other than East and West Falkland	25	17	42
Mount Pleasant	310	169	477
	1569	1386	2955

Notes:

1. These figures are shown on the basis of the usual residence of persons present, not their actual whereabouts on Census Night. The MPA figures include persons present in the Falkland Islands in connection with the military garrison, but exclude all military personnel and their families.

	1060	1055	107	87	68	59	25	17	309	168	1569	1386	2955

Notes:

1. The category 'Cohabiting as man and wife' was listed in the Census Questionnaire as a separate category, but is not mutually exclusive. Persons could list themselves as 'cohabiting' but could also be 'never married', 'married', 'married but permanently separated', 'divorced' or 'widowed'. Therefore the totals by category do not necessarily reflect the legal marital status of the population of the Falkland Islands.

	156	163	319	57	262

* Registered births to date of Census, 8 October 2006 (births must be registered within 10 days)

Notes:

1. These figures are extracted from the Register of Births, but the births are apportioned to the year in which they occurred and not in the year in which they were registered.
2. Because of the method used (Note 1), the figures do not correspond in all instances with those shown in Birth Tables of previous Census reports.
3. It should be noted that these figures do not include births to women whose confinement took place overseas for medical reasons.

* Registered deaths to date of Census, 8 October 2006 (deaths must be registered within 10 days)

Notes:

1. The 'Non-Local' column includes deaths of service personnel, seamen and contractors that were recorded in the Falkland Islands.
2. Deaths that have occurred but are still awaiting inquest proceedings do not appear in this table. Therefore, the figures do not correspond in all instances with those shown in Death Tables of previous Census reports.
3. It should be noted that these figures do not include a number of deaths of Falkland Islands residents that occurred overseas (e.g. in hospital).

Notes:

1. The responses to the question about Immigration Status, which appeared for the first time in 2006, show a surprisingly low number of persons identified as having Falkland Islands status. This can be explained by the significant number of persons who were identified as having "other" status, and reference made in the comment section to the person being born in the Falkland Islands (1344 persons). Whilst the fact of being born in the Falkland Islands does not necessarily mean that the individual will automatically benefit from Falkland Islands status, a significant majority of persons will do so.

Notes:

1. No one at Mount Pleasant reported that they were self-employed full-time or part-time; therefore the population at MPA does not appear on this table.
2. In previous Census questionnaires, the phrasing of this question was "Does this person own their own full-time or part-time business", but for the 2006 Census, it was changed to "Does this person work as an employee or are they self-employed?" Therefore, the information in this table is not directly comparable to data in previous Census Reports.

Notes:

1. A number of people listed their weekly hours of work as 'variable' or 'seasonal', and these appear in the 'variable' row.
2. A number of people in the '>60 hours' row appear to have deliberately exaggerated their hours of work. Therefore, caution is urged in the use of these figures for anything except a relative measure of hours worked.

Notes:

1. A number of people left this answer blank on the Census form, and so do not appear in this table. This table includes everyone who listed an annual income, including retired persons collecting a pension, and students working for only part of the year.
2. A number of answers were not considered logical in terms of the correlation between the stated annual income and such factors as employment, house ownership, vehicle ownership, and number of appliances in a given household. Therefore, caution is urged in the use of these figures for anything except a relative measure of wealth.

Notes:

- Householders were asked to indicate which appliances were available by counting how many of each of the appliances available for use in the household. A significant number of households simply ticked the boxes rather than entering the count of each type of appliance, and these were entered as a single instance of the appliance. Therefore, caution is urged in the use of these figures for anything except a relative measure of wealth.

Widow/Widower	—	85	84	110	96
	1878	2091	2081	2384	2478

Note:

1. Prior to 2006, consensual unions were not the subject of a separate question. It is possible that a few people described themselves as 'married' when they were in fact in an informal consensual union with a person of the opposite sex. Conversely, some of those who described themselves as 'never married' may have been in a long-term informal consensual union with a person of the opposite sex. The category 'Cohabiting as man and wife' was listed in the 2006 Census Questionnaire as a separate category, but is not mutually exclusive. Persons could list themselves as 'cohabiting' but could also be 'never married', 'married', 'married but permanently separated', 'divorced' or 'widowed'.
2. No figures are available from 1986 of widows/widowers, as all persons who described themselves as widowed, separated or divorced were counted together.
3. The 2006 'Married' category includes those people who described themselves as 'Married but permanently separated'.

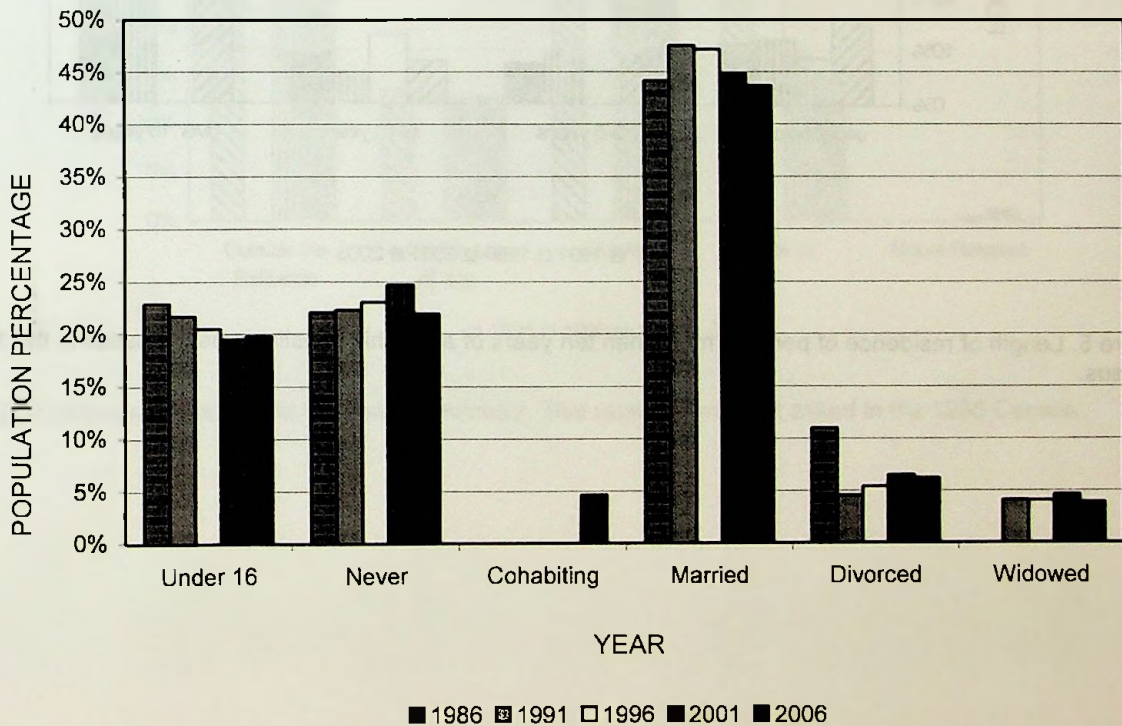

Figure 4. Marital status of the population as at census. In 1986, all persons who described themselves as widowed, separated or divorced were counted as a unit, so no Widowed category appears for that year, and the Divorced category is inflated. The Cohabiting category was introduced in 2006.

Notes:

1. These figures are extracted from the Register of Births, but the births are apportioned to the year in which they occurred and not in the year in which they were registered.
2. Because of the method used (Note 1), the figures do not correspond in all instances with those shown in Birth Tables of previous Census reports.
3. It should be noted that these figures do not include births to women whose confinement took place overseas for medical reasons.

* Registered deaths to date of Census, 8 October 2006 (deaths must be registered within 10 days)

Notes:

1. The 'Non-Local' column includes deaths of service personnel, seamen and contractors that were recorded in the Falkland Islands. The high 'Non-Local' figure for 1993 includes 16 seamen from the sinking of the *Serakunda III*, and two female service personnel.
2. Deaths that have occurred but are still awaiting inquest proceedings do not appear in this table. Therefore, the figures do not correspond in all instances with those shown in Death Tables of previous Census reports.
3. It should be noted that these figures do not include a number of deaths of Falkland Islands residents that occurred overseas (e.g. in hospital).

Notes:

1. This table includes all persons present in the Falkland Islands on Census Night (excluding persons aboard visiting vessels and those persons serving with the military garrison), as well as those household members who are normally resident but were overseas on Census Night (e.g. students)
2. Some of those born outside the Islands are children of persons from the Falkland Islands where the mother's confinement, for medical reasons, occurred overseas, but the child arrived within six months of birth.

Note:

1. Those households described as hotels, guest houses, bunkhouses, YMCA, Stanley House, hospital, and supply vessels are excluded from this table. It includes only those people normally resident in a given household.
2. In 2006, the category 'Cohabiting as man and wife' was listed in the Census Questionnaire as a separate category, but is not mutually exclusive. Persons could list themselves as 'cohabiting' but could also be 'never married', 'married', 'married but permanently separated', 'divorced' or 'widowed'. Therefore the totals by category for 2006 do not include these persons.

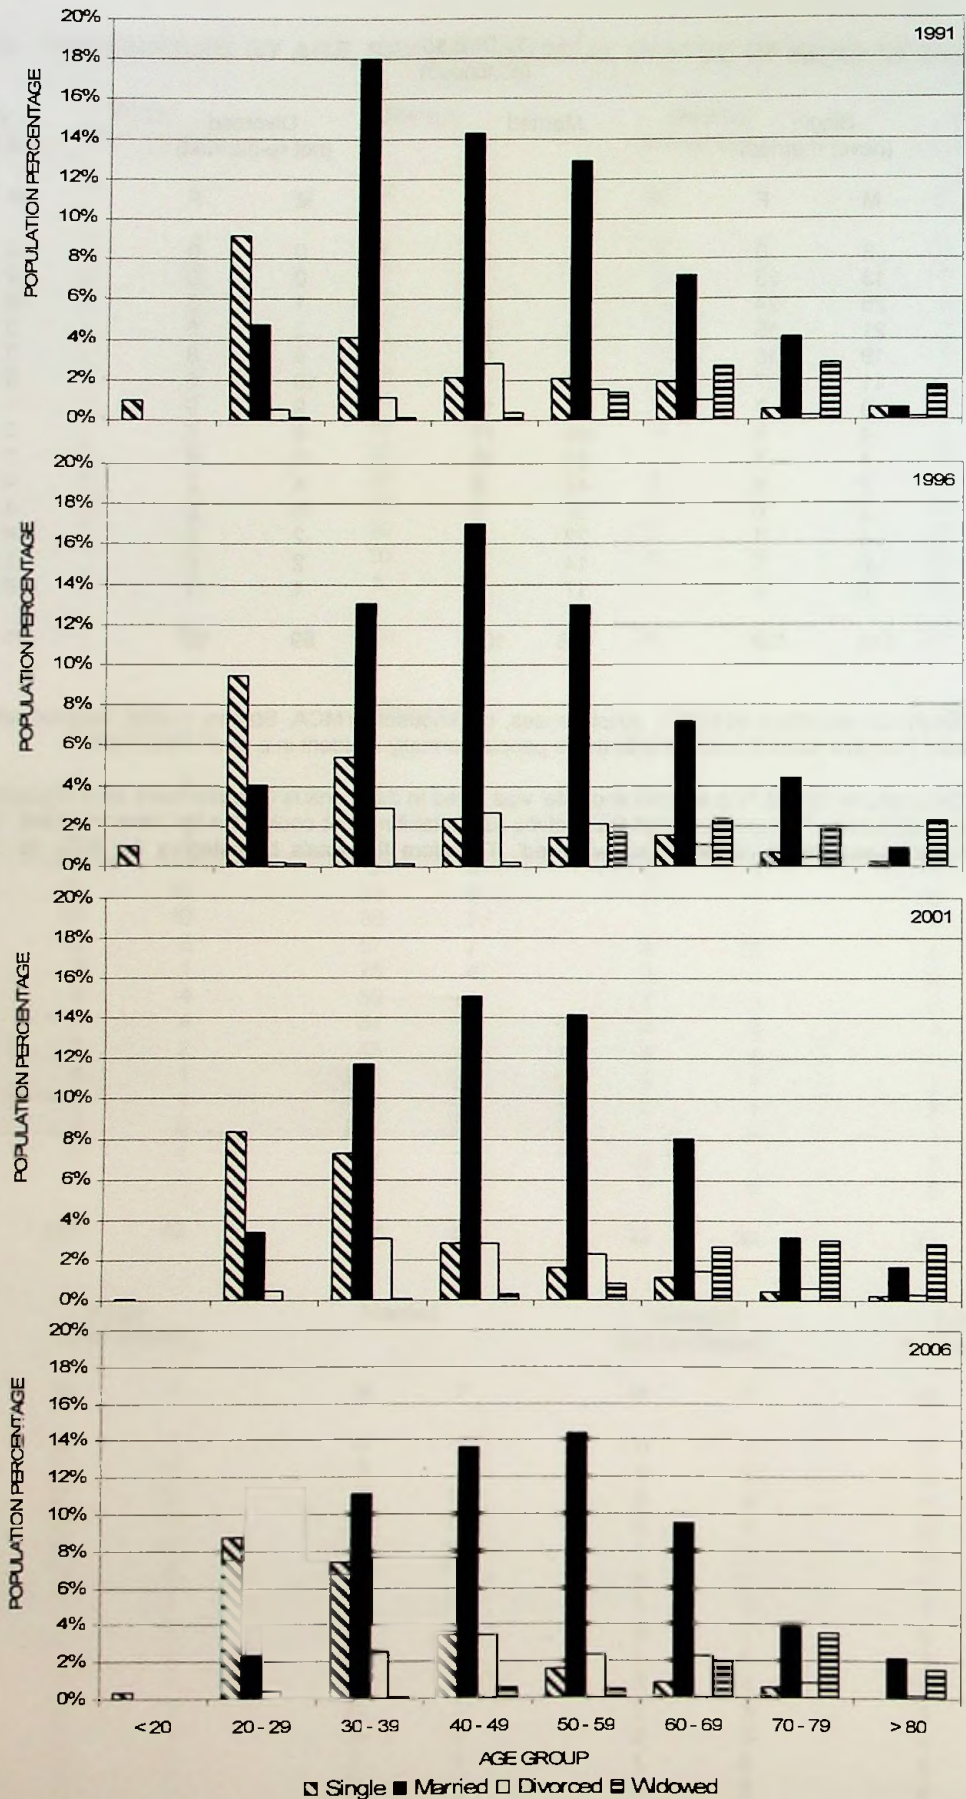

Figure 15. Households by age, sex and marital status of head of household (sexes combined). This question was not asked in the 1986 Census.

REPORT BY THE ACTING ATTORNEY GENERAL ON CENSUS PATTERNS SHOWN BY THE 2006 CENSUS

1. Introduction

1.1 Section 5 of the Census Ordinance (Title 62.1) provides that “the Attorney General shall, as soon as may be after the taking of a Census, prepare reports on the Census patterns and every such report shall be printed and laid before the Legislative Council”.

1.2 The 2006 Census took place on 8 October 2006 in accordance with the Census Order 2006. Census day was preceded by a considerable amount of work and planning, which was carried out under the guidance of the Census Steering Group. The group consisted of Attorney General (Designate) Melanie Chilton, Registrar General John Rowland, Policy Officer Pippa Lang, General Manager FIDC Julian Morris, Director of Minerals and Agriculture Phyl Rendell, Government Secretary Pete King, and Nikki Buxton of Synergy Information Systems Limited. The work of delivering and collection of the census forms were undertaken by a further group, notably in some very inclement weather. The statistics have been prepared by Synergy Information Systems Limited. All those involved in the census, from preparation to conclusion of the statistics, are deserving of recognition and thanks.

1.3 Annexed to this report are (1) the 2006 census statistics, and (2) the comparative census statistics from 1986 to 2006.

1.4 This report is not intended to be exhaustive but to highlight and summarise the key patterns found in the 2006 census statistics and the comparative statistics from 1986 to 2006.

1.5 None of the figures referred to in this report include military personnel serving in the Falkland Islands or their dependents, who are not required to participate in the census.

1.6 The figures referred to in this report exclude persons present in the Falkland Islands in connection with the military garrison unless the report specifically states otherwise. That group were not included in census reports of 1986 or 1991, so continue to be generally excluded for comparison purposes.

1.7 References in this report to tables are to tables in the 2006 statistics, unless specifically stated otherwise.

2. Population

2.1 The total population, including persons present in the Falkland Islands in connection with the military garrison, and excluding both the number of persons temporarily present and the estimated number of persons temporarily absent, is 2955 (table 1), showing an increase of 1.44%.

2.2 The population excluding persons present in the Falkland Islands connection with the military garrison is 2478, showing an increase of 4.16%. Persons present in

connection with the military garrison have fallen from 534 in 2001 to 477 in 2006, a decrease of 12%.

Location, age and sex of population

2.3 The location of population (table 2) shows a continued decline of the population in Camp, reducing from 390 to 361, a decline of 7.43% since 2001. Only the outer lying Islands do not conform to this trend, increasing their population from 38 to 42 between 2001 and 2006. The population of Stanley has increased in that period from 1989 to 2115, and now makes up 85.35% of the population.

2.4 The decline of the Camp population appears to be coupled with an ageing of the population (table 3). For example, males over 40 made up 52.25% of the male population residing in Camp in East Falkland in 2001. Males over 40 made up 61.68% of the male population residing in Camp in East Falkland in 2006. In comparison, males over 40 made up 42.12% of the male population residing in Stanley in 2001. Males over 40 made up 46.42% of the male population residing in Stanley in 2006, indicating a less aged and slower ageing population than Camp.

2.5 Males continue to outnumber women, both in Stanley and in Camp, but the percentage difference narrows from 51.16% to 50.85% between 2001 and 2006 (table 3).

Marital status

2.6 For the first time, cohabitation was included as a category of marital status in the 2006 census. 114 persons described themselves as cohabiting (table 4).

Length of residence by persons more than ten years of age

2.7 The rate of immigration appears to be slowing, with the numbers of persons resident for less than 5 years falling since 2001, but the number of persons resident more than 10 years continuing to increase (to 1557 in 2006 from 1507 in 2001), as it has done since 1991 (table 5, comparative statistics).

Population by country of birth, immigration status, citizenship and ancestry

2.8 The population born in the Falkland Islands continues to rise, from 1325 in 2001, to 1339 in 2006. As a proportion of the total population, the number born in the Falkland Islands has actually fallen slightly between 2001 and 2006. 54.2% of the population were born in the Falkland Islands in 2001 as opposed to only 53.2% in 2006. The proportion of the population born in the United Kingdom and St Helena continues to be significant, totalling 31.90% of the population. The next most significant population by place of birth is of persons born in Chile, the numbers of which doubled between 2001 and 2005 from 65 to 131 (table 10, comparative statistics).

2.9 Population by immigration status was a new question on the 2006 census form. The question revealed a surprisingly low number of persons with Falkland Islands status, at 544. However, it is apparent that a significant number of persons,

(1344) were recorded under the category of “other” and reference was made in the comment section to the person being born in the Falkland Islands. The fact of a person being born in the Falkland Islands will not necessarily mean that the individual will automatically benefit from Falkland Islands status, but a significant majority of persons will do so. The result to this question must therefore be considered highly inaccurate, and does not properly reflect the population by immigration status (table 12, these figures include persons present in connection with the military garrison).

2.10 The numbers of British and Dependent territory citizens has increased from 2270 in 2001 to 2282 in 2006. However, this represents a drop in percentage terms from 92.84% to 90.66%. This percentage drop is contributed to by the significant rise in Chilean citizens present, from 39 in 2001 to 104 in 2006 (table 11, comparative statistics).

2.11 Population by ancestry, a new question for 2006, shows Falkland Islands, United Kingdom, and St Helenian ancestry accounting for 84.33% of responses. Chilean is the next significant ancestry with 5.23% (table 14).

Language other than English spoken at home

2.12 The diversity of the community is highlighted by another new question in the 2006 census. 25 different languages other than English are spoken in households in the Falkland Islands, although most numbers of other language speakers are small, except Spanish, which is spoken at home by 227 persons. 50 persons are described as not speaking English well, and 4 as not speaking English at all (table 15, these figures include persons present in connection with the military garrison).

3. Housing

3.1 The number of houses in Stanley has increased from 690 in 2001 to 783 in 2006. Curiously the number of flats has decreased in that period from 104 to 86. The number of dwellings recorded in Camp under the census continues to decline in conjunction with the population (table 12, comparative statistics).

3.2 House ownership in Stanley continues to increase, from 528 in 2001 to 585 in 2006 (10.79%), but that rate of increase has slowed from the previous trend (23.94% 1996 to 2001 and 30.27% 1991 to 1996), likely reflecting the nearing of completion of the East Stanley development (table 13, comparative statistics).

3.3 There is an apparently significant decrease in accommodation rented in Camp (to 29.26% of rental levels in 2001). However, it should be noted that the decrease is largely due to the fact that the 2006 census added a new category of “rent free” accommodation (table 13, comparative statistics) to the responses available.

3.4 Household occupancy rates show a continuing trend of under occupation, with little overcrowding (the exception being four households of 8, 7, 6, and 5 persons respectively each living in two bedroom properties). The most common rate of occupation is two persons in a three bedroom house (table 14, comparative statistics).

Households

3.5 Our status as a patriarchal society is apparently confirmed by the fact that a male is far more likely to be identified as head of household than a female (65.78% of heads of household are male). That likelihood increases if the male is married (80.72% of married men are identified as head of their household). However, this pattern may be changing, because women under 30 are more likely than their male counterparts to be identified as head of household (there are 64 female heads of household under 30, but only 52 male heads of household under 30 in 2006, reversing the figures for 2001 of 52 female to 60 male). More census data is needed from future years to establish whether this generation of young women continues to take a dominant role, or relinquishes that in older age. Of course it could be argued that the whole concept of head of household is an outmoded patriarchal model which should not be perpetuated by the format of the census, and that the reality of the modern household is more likely to involve an equal partnership (table 15, comparative statistics).

Employment

4.1 The number of persons employed has decreased slightly between 2001 and 2006, from 1547 to 1516. As a percentage of the population, between 2001 and 2006, the number of persons employed has fallen by 3.8%. The number of persons “not employed” has increased by only 2, from 458 in 2001 to 460 in 2006 (table 17, comparative statistics). As a proportion of the total population, the number of persons “not employed” has decreased slightly, from 19.25% in 2001 to 18.56% in 2006.

4.2 The employed population is now made up of 53.95% who are male, and 46.05% who are female, confirming the trend in increased participation, and therefore economic importance, of women in employment (from 36.30% in 1991, 41.30% in 1996, and 43.70% in 2001 – table 17, comparative statistics).

Unemployment

4.3 Unemployment figures, which are not available from the comparative statistics do appear to show an increase, from 9 males and 13 females in 2001 (table 17 of the 2001 statistics, which are not annexed), to 26 males and 66 females in 2006 (table 21). It should be noted that “not working” is included as a separate category in table 21, so this appears to be an accurate record of unemployment (these figures include persons present in connection with the military garrison).

Occupation

4.4 For the first time, female numbers in professional, technical and related categories exceed male, at 150 compared to 123.

4.5 The decline in employment in agriculture and related areas continues, from 221 workers in 2001 to 205 in 2006.

4.6 The numbers of men in secondary occupations has remained static at 170, the number of women declining slightly from 143 to 127.

4.7 Table 25, which is a new to the 2006 census, and deals with hours worked by location, has striking results. 43.81% of workers at MPA work in excess of 60 hours per week. That compares with only 7.18% of workers in Stanley, and 28.08% of workers in Camp.

5. Education

5.1 The trend towards a more educated population continues (table 16, comparative statistics), with persons with recognised external examinations at secondary level increasing from 955 (40.14% of the population) in 2001 to 1033 (41.69% of the population) in 2006. Persons with tertiary qualifications increased from 573 (24.08% of the population) in 2001 to 619 (24.98% of the population) in 2006. Only a slight decrease in male tertiary qualification goes against the continuing trend of a generally more education population (down to 318, or 25.24% of the total number of males, in 2006 from 331, or 27.27% of the total population of males, in 2001).

6. Energy use

6.1 The use of peat for household heating has declined further from 101 households in 2001 to 35 in 2006. By comparison, the usage in 1991 was 402 households.

6.2 The use of diesel for household heating has dropped from 310 households in 2001 to 185 households in 2006. In contrast, the use of kerosene for household heating has increased from 618 households in 2001 to 873 households in 2006.

6.3 The use of both electricity and gas for cooking has increased since 2001 (electricity from 410 to 510 households in 2006 and gas from 364 to 497 households in 2006).

6.4 Households with no central heating have decreased from 62 in 2001 to 19 in 2006. Household with full central heating have increased from 875 in 2001 to 1008 in 2006.

7. Vehicles

7.1 The number of vehicles in Stanley continues to increase. The number increased from 1054 in 2001 to 1264 in 2006, a 19.92% increase. The number of vehicles in camp has decreased from 522 in 2001 to 490 in 2006, a 6.13% decrease.

7.2 Four wheel drive vehicles continue to rise in popularity, whilst cars continue to decline in popularity from a peak of numbers in 1991.

8. Household appliances

8.1 Computer numbers in Stanley have now increased to 678, making up 74.01% of households, with internet access not far behind in 592 households (64.62%).

8.2 Computer numbers in Camp have now increased to 118, making up 63.10% of households, with internet access also not far behind in 67 households (58.28%).

8.3 Televisions, which remain the most popular household item in Stanley, are numbered at 883, and are now found in 96.40% of households. In Camp, washing machines are narrowly the more popular household item with 170, compared to 169 televisions. Televisions are now found in 90.37% of households in Camp.
