Inside Minute Paper.

Col Engineer,
Referred to you.

A. J. J.
16/11/28

Hon. Colonial Secretary.

I agree with plan and estimate, and I think that it would be an improvement to have the boat shed extended so that the G.L. "Penguin" could be under cover when being overhauled.

2. On the other hand I do not altogether think that the benefit that would be derived warrants the expenditure as the "Penguin" is seldom on the slipway for repairs and cleaning. It so happened that she was up for a considerable period last year, but that was an exception for a general refit.

C. Roberts.

Colonial Engineer.

Off 1/2 Sect.

During my inspection last
week of the first Dredger I
discussed with Harbor Master the
desirability of extending the Port-shed
at Slip - way -

I would be glad if Mr.
Challen will consult with Capt.
Arndson in this matter and prepare
a report with rough plan and
approximate estimate.
