Have we the Whaling Reports file left to
us. From which we can get some comparative figures
for the last few seasons?

28/1/59
13.4.59.

AcS.

19

18. Yes whaling Report file 2/4/50/II is
still with us. It has now been filed in it at
present.

20. I'll see 21/4/59
Get the figures one pl.

28/4/59.

21
AcS. Figures at bc.
25/4/59

J.E.

Final figures are not all that bad
Compared to 1955/56 & 1956/57 - but I
imagine costs have increased considerably.

King Edward Point,
South Georgia.
2nd January, 1959.

From The Administrative Officer,
South Georgia,
To The Colonial Secretary,
Port Stanley,

1/2-Monthly whaling returns.

You raised a query concerning the South Georgia Co., Ltd.'s October returns whilst you were here. The reason for the violent fluctuation in production results is that 17 whales were caught on the 15th October, included in the first 1/2-monthly return, but the production from them was shown on the results for the second 1/2-month thus :-

1.10 to 15.10.58	: 4590 barrels from 100 whales	= 45.9 av:	barrel.
(However if we exclude the 17 whales caught on 15th October - then			
	4590 barrels from 83 whales	= 55.50	"
16.10. to 31.10.58	: 2325 barrels from 24 whales	= 96.87	"
(however if we include the 17 whales caught 15th October - then			
	2525 barrels from 41 whales	= 56.70	"
and average on total oil			
	6915 barrels from 124 whales	= 55.76	"

2. In order to get a true idea of the average barrels per whale it is necessary to take the entire production and divide by the total whales.

J. Heath
Administrative Officer,
South Georgia.

Re

H.C.S. Thank you for letting me see this file.

I had heard that the season hadn't started too well but I did not realise that the position was as bad as the figures opposite suggest. If the rest of the season is going to be like the first two months it will be somewhere around a 90,000 barrel season compared with the Revenue Estimate of a 160,000 barrel season.
