BISLEY TEAM'S CAPTAIN

IN RAILWAY ACCIDENT.

Mr. Grierson's Narrow Escape.

News was received by the mail yesterday that Mr. J.W. Grierson, the captain of the Islands Bisley Team had a narrow escape from serious injury, if not death, on May the 25th last and within two or three days of his having arrived in England.

He had been down to Brookwood to make arrangements for the team and was returning to London after having lunched with Major Wright, the coach.

Just before reaching Wimbledon the express train he was in crashed into a train coming in the opposite direction. The other train apparently jumped the rails at the points. The force of the impact was terrific, the sides of a number of carriages were ripped completely away while the coaches that took the impact were reduced to matchwood. Five people were killed and thirty injured.

In a letter Mr. Grierson writes that there were three other men in the same carriage as he and the force of the impact hurled across the seats in a heap while the windows were shattered. The people in the next carriage to them were injured, and the scenes were terrible. Mr. Grierson, fortunately escaped without a scratch.

THE MOUNT EVEREST EXPEDITION.

Hugh Ruttledge's cable, acknowledging the recall, which the
Daily Telegraph publishes, tells an epic story of the gallant fail-
ure, with only Ruttledge, Smythe, Shipton, Crawford and Brockle-
bank in a fit state to continue, the remainder needing a rest
after the prolonged effort.

Nevertheless further attempts are impossible under the monsoon
conditions and the snow is not likely to clear away until October.

Experience has shown that the Norton route is the best way
of approach but that it is only possible when the rocks are dry.

Unknown ridges were traversed by Wyn-Harris, Wager and Long-
land during blizzards. The last-named had to discard his goggles
when visibility was reduced to twenty yards.

Only consummate skill and nerve saved Harris and Shipton from
death while they were working independently in the vicinity of
Camp 5. A deceptive snow sent them sliding forwards towards
a 4,000 foot drop to the Rongbuk Glacier and left Shipton hanging
with frozen fingers on a narrow ledge over the abyss. He return-
ed coated with ice.

Smythe also had a lucky escape for while working up the couloir
he was blown off his feet by the violence of the wind and only
his ice-axe work saved him from being blown completely away.

All these attempts were made in the best weather that pre-
vailed and the fact that thirteen members reached the edge of
the couloir while four attained a height of 18,000 feet without
oxygen proved that the period just before the monsoon offered the
best climbing chances but this year's opportunities were poor.

CURRENCY CONDITIONS.

According to a message from London the European gold standard countries are acutely nervous under the existing conditions and are exerting the strongest pressure on Great Britain to make a declaration either jointly with them or separately indicating a readiness to support the currencies against adverse influence.

Meanwhile there have been protracted meetings of the American Delegation at the Economic Conference, privately and then later with the Premier, Mr. Ramsay MacDonald who has been led to believe that the United States are considering the re-opening of discussions at the Conference on margin limits to the dollar's fluctuations.

The United States is definitely refusing to adopt stabilisation and the French Conference delegate, M. Bonnet, denies the rumours of the French withdrawal but says that if, with the backing of the "gold" delegates satisfaction is not forthcoming within a reasonable time the Conference will be a failure.

It is argued that if the Conference was specifically called for the restoring of monetary health resulting from the driving off the gold countries which were previously stable, its object has been defeated.

Premier MacDonald, maintaining an intermediary role, is keeping in close touch with the representatives of Great Britain, Italy, France, Belgium, Switzerland and Holland, and while the British Government is inflexible in its determination to avoid the formation of a European block they are anxious to give all possible aid to prevent further European currency instability.

REMEMBERED IN TIME.

A policeman saw a man who had been strolling along a high bridge over the River Ohio, at Pittsburg, suddenly leap into the water.

The next instant he was swimming vigorously for the shore.

The policeman fished him out and asked "the idea."

"Suicide," confessed the dripping figure. "But on my way down I remembered I had put fifteen pounds in the bank five years ago."

INDUSTRIAL SURVEY.

The Board of Trade Journal has published in London the industrial development of the British Isles (excluding the Free State) showing the establishment of 643 new factories and 166 extensions with 122 of the total connected with foreign firms giving employment to 8,500. The review deals with the year 1932.

London headed the list with 251 new factories and Lancashire was next with 115. But closures numbered 50 and 106 respectively in a total of 355.

Nevertheless the tendency is upwards and the Department of Overseas Trade announces that a ten year decline in British share in Indian trade has been checked with the capture of two-thirds of India's imports increase for the year ending March 1933.

The motor trade has jumped into first place with three times more than the United States which was leading in 1932.

Other increases are - cotton yarns, textile machinery, piece goods, sugar machinery and tyres.

Japan's increase from 10.6 per cent to 15.5 is largely due to the yen's depreciation.

HINDENBURG STEPS IN.

According to a message from Berlin President Von Hindenburg has dramatically intervened in the conflict between the State and the Church.

The President is requesting the Chancellor, Hitler, to initiate negotiations between the Church groups and the State with a view to settlement. He says "I feel obliged before God and my conscience to do everything I can to avert any damage being done."

In compliance with his wishes Hitler has requested the Prussian Minister for the Interior to negotiate.

METRO-VICKERS PRISONERS RELEASED.

Settlement Between Britain & Russia.

According to a message from London on Saturday night terms have finally been agreed upon between Sir John Simon and M. Litvinoff, the Soviet Commissar for Foreign Affairs for the settlement of the Anglo-Russian dispute.

The settlement took effect on Saturday and the two British prisoners in Russia - Messrs. Thornton and MacDonald, - were released with freedom to leave Russia immediately.

The British embargo on all Russian goods imported to England has been lifted and the counter embargo which the Soviet placed on all imports to their country from Britain has been cancelled.

It has been further agreed, says the Sunday Times, that the negotiations for the new Anglo-Soviet Trade Pact are to be promptly renewed at the point reached when interrupted in consequence of the arrests of the metro-Vickers engineers.

M. Litvinoff, who is attending the World Economic Conference saw the British Foreign Secretary and obtained a clear understanding of the British view.

Litvinoff's purpose was to secure the withdrawal of the embargo before the release of the British prisoners but the British Government made it clear that this was out of the question.

TRAGIC START TO ITALIAN FLIGHT.

The Italian Atlantic air armada, consisting of twenty-four flying boats which left Orbetello, Italy Saturday morning for Chicago, landed at Amsterdam at noon.

One machine, commanded by Captain Baldini, hit the water heavily, pitched on its nose and capsized, being practically destroyed.

One of the occupants was killed and three others were injured.

Over French territory the Italians were escorted by twenty French chaser planes of the 2nd Air Regiment while sixty Dutch planes escorted them over Holland.

The remaining twenty-three planes proceeded to Londonderry Sunday morning.

DEFENCE FORCE BADMINTON.

A very enjoyable match has just been completed at the Drill Hall where a tournament of the American variety has been run by the Defence Force Club for over a month. Fifteen sets of mixed doubles entered and this is a record number for the club. A draw was made for partners and each couple were handicapped by the Committee. The games were of fifteen Acos.

Some excellent contests were seen as a result of which Mrs. H. Jennings and Mr. W.M. Allan proved to be the "champions" who, though handicapped minus 7, only lost one game that being against Miss L. Davis and Mr. W.J. Grierson.

Mrs. B. Fleuret and Mr. J. Turner, and Miss L. Davis and Mr. W.J. Grierson have won the same number of games and will have to play off for 2nd prize. Unfortunately Mr. Turner is away on business in the West Falklands and the match will have to be delayed until his return when, no doubt, an exciting contest will be witnessed.

Mrs. B. Fleuret and Mr. J. Turner (minus 3) lost to Mrs. H. Jennings & Mr. W.M. Allan 13 - 15, Mrs. L. Aldridge & Mr. W. Aldridge (minus 7) 14 - 15, Miss E. Summers & Mr. B. Fleuret (plus 2) 13 - 15.

GOLD CURRENCIES.

An important meeting of the Cabinet was held in Downing Street on Saturday following on President Roosevelt's rejection "in its present form" of the joint declaration agreed to by Great Britain and the continental gold countries and the United States delegates on urging the early stabilisation, the defence of gold currencies and the restriction of monetary fluctuation.

Following a discussion with the Chancellor of the Exchequer and Mr. Cordell Hull, the leader of the American delegation, and after the Cabinet meeting, the Premier, Mr. Ramsay MacDonald, informed the representatives of the gold countries that Britain cannot associate herself with the declaration without American concurrence at the same time and the possibility of a separate and parallel but not identical declaration by the British Empire.

The Daily Telegraph's Washington correspondent understands that President Roosevelt's view is that, in view of their budget deficits the continental countries should forsake gold temporarily.

He cannot pledge the American government to support any concerted action to check currency fluctuations.

He desires the dollar to fall to a level appreciably lower than the one of 4.31½ to the £ as it is at present.

When the World Conference resumed yesterday it faced a most critical session for the representatives of the gold countries are bitterly disappointed with President Roosevelt's refusal to adhere to their resolution and they may propose an adjournment of the Conference.

THE METRO-VICKERS PRISONERS.

The Metro Vickers prisoners arrived at Baronowitz, Poland, from Russia on Monday. While Thornton was apparently fit MacDonald was labouring under the stress of his experiences.

They were accompanied by the British Consul from Moscow until the border was crossed. MacDonald's father met his son at Stolpec while two mufti clad O.G.P.U. men were also on the train.

"I have been through a living hell. God knows what I've suffered" said MacDonald who was pale and wan and thoroughly upset.

The Moscow official press states that the prisoners release were released owing to the lifting of the Russian trade embargo since England was needing Russian trade and this thesis is developed with considerable ingenuity.

EMPIRE CHAMBERS OF COMMERCE.

The Triennial Congress of the Federation of the British Empire Chambers of Commerce which is being held in the Guildhall, London, is being attended by delegates from all parts of the Empire.

The Congress has recommended that the Empire countries should systematise and develop paper currencies should the international agreement on the reformed gold standard be found to be impossible. Such a union should be open to other nations on their agreement to share the same responsibilities and recognise the same obligations.

HIS EXCELLENCY THE GOVERNOR'S
MESSAGE
TO THE PEOPLE OF THE COLONY.

Circumstances compel me to be absent from you for a while and I would like you to take my departure on sick leave as just "Au Revoir" with my grateful thanks for all your kindnesses, hospitality and courtesy since I came to you as Governor, directly representing His Majesty the King.

I am sure you will understand me when I say that my thanks are in a special sense due to Dr. Innes Moir, Dr. Glyn Edmunds and the Staff of the Hospital for their care and attention to me during the time of early sickness.

I am hoping to be back with you again recovered in health sufficiently to help in carrying through a number of projects that I have in mind leading to more efficient government and increase of the welfare of the people of the Colony.

Au Revoir,

Signed James O'Grady,

Governor.

SUNDAY'S MATCH.

No. 3 Platoon 3 : No. 2 Platoon 0.

With the turning of the tables on Sunday when No. 3 Platoon met No. 2 Platoon and defeated them decisively by 3 - 0, the latter's position at the top of the League is in jeopardy and if No. 3 in their next match against No. 1 Platoon come out with the honours they will take the lead. On the other hand if No. 1 Platoon really set to to beat their opponents the championship will remain an open question.

On Sunday when No. 2 Platoon were playing with the wind they certainly missed some good openings and the half time score, instead of being 1 - 0 in the favour of No. 3 should have seen them with a lead of two if not three goals. No. 2's defence played an exceptionally good game but their forward line, to put it candidly, was almost hopeless. No. 2 were of course handicapped by the injury received by G.M. Creece their goalkeeper whose place was filled by D. O'Sullivan. Though O'Sullivan acquitted himself well, it would seem to me that his dash in the forward line where he usually plays, could have been ill afforded and with such men as Atkins and Pike in the Defence he might have been left in his own position with advantage even if a weaker man would have had to go in goal. Though of course 2's forwards did their best and on occasions made praiseworthy efforts there was too much young blood which needed support to be expected to break through No. 3's strong defence.

No. 3 certainly played a nice game and the kicking of the backs was smart and accurate while the half backs did not fail to do their duty and the forwards were well pivoted with A.I. Fleuret back in the centre-forward position.

To look at the teams on paper one would have expected a smart game with plenty of dash and excitement in it. But it proved to be quite a desultory "turn out". This may have been mostly due to the heavy nature of the ground which was considerably damp and made ball control not at all easy, on the other hand if the ball had been swung about more and the wing forwards when passing had passed well forward instead at right angles to the touch line, and even backwards sometimes, play would have been faster.

A.I. Fleuret scored No. 3's first goal while E. Pettersson and F. White were responsible for the other two.

WAVE FOG I

A Morris Car Episode.

An amusing story is being told of two strangers, owners of Morris-Oxford Sixes, who were lost in a fog on the Yorkshire Moors. Both drivers had pulled up in virtually stygian blackness to verify there whereabouts by a signpost they knew to exist, and each in turn it appeared, had had a certain amount of difficulty in groping his way back to his car.

One of the twain, after having practically felt his way through some five miles of fog on the homeward journey, was alarmed to hear an unaccustomed voice from the back seat in view of the fact that he started out without a passenger.

Investigation, however, showed that not only had he acquired a passenger but he had also acquired the other man's car - identical in colour and detail with his own - while his passenger who was endeavouring to take forty winks, was under the impression that her lawful husband, completing his reconnaissance, had resumed his place at the wheel.

An anxious period followed, until the other driver, after getting no reply to sundry snatches of conversation addressed to the back seat, realised what had happened and gave chase. Even so, owing to the fog, it was a matter of two hours before the necessary exchange was effected, much to the amusement and relief of all concerned.

MALTA TROUBLE ECHO.

A sworn charge by a Nationalist M.P. for Malta named Albert Mizzi, that at the last general election he was approached by a police official with the offer to "procure the assassination of Lord Strickland, the former Premier of Malta" is being investigated.

Mizzi, who was a prominent agent in the Nationalists campaign says the police inspector who is named in this charge mentioned a sum for the carrying out of the crime. This statement Mizzi has confirmed by oath. Lord Strickland was summoned before the Enquiry when the charge against the police official was then communicated to him and in an interview subsequently he expressed surprise that the Minister had not taken earlier action.

UNEMPLOYMENT DECREASES.

The International Labour Office at Geneva issues statistics showing unemployment decreases in many countries for the first time since the depression.

Comparisons for June 1932 and June 1933 show Britain 6.6 %, Canada 7.7 %, France 2.5 %, Germany (insurance) 9.8 % (trades union) 23.9 %, Finland 29 %, Bulgaria 21 %, Poland 23.9 %, Roumania 21.2, Chile 10 %, Japan 8.6 %.

There have been increases in the United States to the extent of 35.8 %, Sweden 65 %, Switzerland 36.8 %, and Czechoslovakia 50 %.

The experts estimate that the reductions more than compensate the increases.

A SOVIET FAILURE.

A decree has been signed by Stalin and Molotoff which admits the decay of the Soviet railways and, in the hope of stopping the rot the system is being virtually handed over to the control of "Political Officers" under an independent department.

The Soviet's failure to fulfil the transport plan stressed in the decree also points out that the carriage bulk goods fell six million tons in the first quarter of 1933 as compared with 1932 while the "lack of discipline led to an increasing number of accidents."

Many branches are in a deplorable state of repair and much repairable rolling stock has been destroyed, it is alleged.

SPANISH GENERAL SILENT.

It is reported from Madrid that General Sanjurjo, who is undergoing a life sentence of imprisonment for participation in the monarchist rebellion in Spain last August, is cited as a witness against the complicity of fifty-one other men accused.

Sanjurjo has refused in every way to implicate the accused men and is accepting the entire responsibility of the plot saying that he alone planned it.

His emphatic denial of the accuseds' complicity has evoked prolonged cheering in the court in consequence of which disorder prevailed and many arrests followed, including women and girls of social standing.

THE WORLD ECONOMIC CONFERENCE.

On Wednesday, after a discussion among the American delegates and prolonged conversations by telephone with President Roosevelt, it was announced that the President refused to give any definite undertakings regarding the tariff policy or an ultimate currency stabilisation.

Roosevelt suggested that the Plenary Conference should go into recess until a certain predetermined price level should be reached, meanwhile the Economic Commissions and the Committees should continue their work.

On receipt of this intimation Premier Ramsay MacDonald summoned the Drafting Committee to prepare a statement for submission to the Bureau the next day (Thursday) when the Conference's future was to be decided.

The American delegates are disappointed at the result of their unceasing three days' effort, having hoped that Roosevelt would have been able to help them dispel the unfortunate impression created by his brusque and uncompromising declaration on Monday and thus avert the Conference's premature ending.

BADMINTON TOURNAMENT.

Men's Doubles Match.

In a very closely contested Men's Doubles Badminton Tournament played in the Drill Hall on Sunday afternoon between the Defence Force and the Stanley Clubs the former won by the odd set in nine.

The Town Club was somewhat handicapped in view of the fact that they could not raise a full complement of men and, in order to make up the pairs, included in their number a lady member. Miss Oldham, who stepped into the breach, played well however, and with her partner, Mr. J.D. Creamer, made up a pair against whom their opponents had to exert the utmost ounce to beat them.

The contest throughout was most enjoyable and productive of some hard hitting but skilfully placed shots with the result that thrilling rallies were frequent.

The scores are as under (the visitors' names being given first) :

L.F. Hodgson & T.D. Evans beat W.M. Allan & C. Henriksen 15 - 13, beat W. Aldridge & G.L. Pallini 15 - 11, beat L. Aldridge & R. Campbell 15 - 8.

W.D.A. Jones & H. Thomas lost to Messrs. Allan & Henriksen 4 - 15, lost to Messrs. W. Aldridge & Pallini 10 - 15, beat Messrs. L. Aldridge & Campbell 15 - 11.

Miss Oldham & J.D. Creamer lost to Messrs. Allan & Henriksen 5 - 15, lost to Messrs. W. Aldridge & Pallini 9 - 15, lost to Messrs. L. Aldridge & Campbell 14 - 15.

We understand that a return match is being arranged.

INDIAN COTTON.

Great Possibilities.

The Report of the Indian Cotton Enquiry Committee appointed by the Government following the Ottawa Conference, states a message from Manchester, expresses the view that there are great possibilities for the wider use of Indian cotton in Lancashire as an adequate substitute for American.

Interesting and useful results have been achieved with even inferior grades and Sir R.H. Jackson, addressing a specially convened meeting of the Manchester Chamber of Commerce said on Monday that if sufficient interest is taken immediate improvement might take place in many Lancashire firms.

It was pointed out that with America going along strange currency roads and Japan envisaging an Indian boycott in cotton, the trend of events was towards inter-Empire circulation.

SUEZ CANAL FRAUD.

According to a message from Paris a large scale fraud in connection with the Suez Canal share certificates has been disclosed in connection with which two Dutchmen have been arrested.

It is believed that a considerable number of forged bonds have been put into circulation but only thirty have been recovered.

The discovery followed the presentation of certificates for payment, these carrying numbers which were redeemed thirty years ago.

The arrested men state that they have acted in good faith, having received bonds to the value of £160,000 through Geneva bankers to cover agreed speculations on the French bourse and, it was understood, that when these had been concluded the bonds would be redeemed without coming into the market.

The suggestion was made with the request of a settlement "on unconditional grounds". Earl Willingdon, the Vice-roy, has replied that he was not prepared to consider it while the Congress was committed to civil disobedience.

GOLD CURRENCIES.

According to a message from London the decision to free the gold exchanges from speculation has had considerable effects and signal success. On Monday gold currencies remained remarkably resilient regardless of the dollar's continued slump.

The especially vulnerable Dutch florin and Swiss franc led the recovery van while sterling remained firm and the French franc moved only narrowly.

At one time the dollar touched 4.85 (19/11) but recovered from impending parity to $4.79\frac{1}{4}$ (19/8 $\frac{1}{2}$).

Meanwhile the Canadian dollar temporarily reached 5.04.

The dollar's rapid "right" has aroused further questionings on both sides of the Atlantic as to the level President Roosevelt has in mind and it is thought that he might be forced to consider some stabilising plan much earlier than recently expected, indicating that the currency slide is running ahead of his purpose.

ANOTHER SLEIGHING ACCIDENT.

At Wang's Hill Again.

About 8.30 Tuesday evening James Dettleff, aged 11, had to go to hospital to have the little finger of his right hand dressed as a result of an injury he received while sleighing down Wang's Hill in Hebe Street.

It appears that his sleigh was in danger of coming into collision with another that was overtaking him and he put his hand out in order to stave off the approaching sleigh the runner of which passed over the top of the finger cutting off the tip.

This is the second sleighing accident on this hill since the winter began. On the previous occasion a boy cut his head open.

THE WEATHER.

In spite of assertions that we were not going to have any winter this year in view of reports from Norwegian whalers that the ice had gone north-east this year, and in spite of the marvellous conditions we had so far experienced - at least up to the past two or three weeks it appears that Winter has definitely come to stay for a while at any rate.

On eight days out of eleven since the beginning of the month the minimum temperature has been below freezing, the lowest being on Tuesday last when the thermometer registered 27 degrees F.. The highest temperature of the month was recorded on Saturday, the 1st, when the temperature was 47 degrees F.

On Tuesday four inches of snow were measured this being the deepest fall this year. The wind this month has not been blowing stronger than thirty miles an hour while visibility has been restricted to a distance of about 6½ miles.

ROMNEY SHEEP.

Theories As To Origin Of Breed.

The Romney sheep is the only sheep that has ever had its picture on a postage stamp to indicate one of the staple industries of a country, writes a correspondent in a recent issue of the Sunday Times.

"A postage stamp to commemorate the 1833-1933 centenary of the British administration of the Falkland Islands bears the picture of a Romney Marsh ram, so named on the stamp," states Mr. G.H. Garrad, the county agricultural organiser, in the 'Kent County Journal.'

"Large numbers of Romneys have been sent abroad to the Falkland Islands, where they have played a very important part in improving the breed.

"Various theories as to the origin of the Romney sheep have been put forward.

"One theory is that it first came from the Low Countries or from some other part of the Continent.

"It has also been suggested that some time or another some Cheviot sheep being shipped to London escaped from a wreck and over-ran the Kentish marshes so that some Cheviot blood was introduced into the local breed. There is, however, no solid foundation for this theory, and it seems to be based on certain similarities between the Romney breed and the Cheviot.

"The only real record we have of any change in the blood of the local Marsh breed is the systematic introduction of some of Robert Bakewell's improved Leicesters into Romney Marsh in the latter part of the eighteenth century. Since then no blood of any other breeds has been introduced, and there are some flocks in the county which have been owned by the same families for more than one hundred years."

The Ministry of Agriculture and Fisheries publication on "British Breeds of Live Stock" states that the breed is by no means confined to the Kentish marshes. Registered flocks are also to be found in Bedfordshire, Lincolnshire, Sussex and Scotland. It is also found in most parts of the world. In New Zealand it is specially in favour on account of its hardiness and freedom from disease. In South America, particularly the Falkland Islands, Chile, Patagonia, Argentina, Brazil and Uruguay, there is a large demand for rams, and satisfactory reports have been received of the breed in North America, South Africa and other countries."

BRITAIN RISING TO THE TOP.

"More Than Holding Her Own."

The Chancellor of the Exchequer's statement in the House of Commons on Monday on the Budget prospects is already encouraging and that "Britain is more than holding her own" is supported by the lowest unemployment figures since 1931 and the emphatic signs of trade revival which Monday's official statistics reveal.

New merchant shipping on the docks amounts to 287,502 tons, being an increase of 35,101 tons for the past three months, while the customs receipts for the past quarter are up £3,166,000 as compared with the same period in 1932. There is also a growing demand for iron and steel and better marketing for finished products.

The receipts for road vehicle licences during the past six months are up £291,253 compared with those of 1932 for the same period and the newly registered vehicles have increased 7,260.

The railway passenger journeys in April increased 4,487,889 and passenger receipts by £752,671 as compared with April, 1932.

Shipyard activity is most marked, having improved steadily since the upward trend commenced in 1930 while foreign yards are building ten per cent. less than in March with the lowest total for twenty-three years, confirming Britain's gradual recovery and dominance in merchant ship production.

THE WORLD CONFERENCE.

Hopes Of Some Agreement.

It now seems clear that the general opinion among the delegates to the World Conference is that there is a sufficient number of subjects to occupy the attention of the delegates, with some hope of agreement, within the next fortnight.

It is anticipated that the Plenary Session of the Conference may then be convened and its less important work adjourned until the Autumn.

The most important feature of Tuesday's private meetings was the gathering of the Conference Bureau which had before it the report of the Drafting Committee on the work of the two sub-Commissions of the Monetary Commission of the Conference.

The first of these is dealing with the immediate financial measures required. After a brief sitting of the Bureau under the Presidency of Mr. Ramsay MacDonald, the report was adopted.

It was recommended that the sub-Commission dealing with immediate measures for financial reconstruction should proceed, in the first instance, to the discussion of the subject of indebtedness. It was also recommended that the second sub-Commission dealing with permanent measures should take up the resolution adopted by its sub-committees on central bank cooperation and on the creation of central banks in certain countries where they do not already exist, and pursue through its sub-committees the examination of the question of silver and other subjects on the agenda which may, by general agreement, be suitable for discussion.

- o -

The sub-Commission on matters dealing with merchant shipping, in conformity with the decision of the Bureau, decided on Tuesday to appoint a Drafting Committee to draw up a report embodying the different points of view and the ideas put forward during its discussions. The Drafting Committee is composed of representatives of France, Italy, Japan, Norway, the United Kingdom and the United States.

INDIAN OFFICE DENIAL.

On Tuesday the Indian Office issued the following communique :
"There is no foundation whatever for the report in some newspapers that Gandhi had written to the Vice-roy of India seeking an interview unconditionally and stating that the Vice-roy had replied that he was not prepared to consider any such request as long as the Congress adhered to a policy of Civil Disobedience.

"No such request has been received by the Vice-roy from Gandhi."

THE DOLLAR.

According to a report from London the dollar moved erratically in the money market on Tuesday and, moreover, the reports of the American official operations have been discredited by exchange dealers.

It is understood that the reports of a silver agreement are somewhat premature for the tentative scheme still needs the final touches.

The agreement contemplates a sales restriction, the countries concerned being -

India, China and Spain as holders, and the United States, Canada, Bolivia, Peru and Mexico as producers.

THE ROOSEVELT UNEMPLOYMENT SCHEME.

A message from Washington states that President Roosevelt's National Industrial Recovery Act, backed by 3,000 million dollars, is to be administered by a Super-Cabinet, including all the Ministers, headed by the President and administrators already appointed who will sit continuously throughout the summer.

The Daily Telegraph correspondent states that with a view to absorbing the unemployed, the programme outlined includes 400 million dollars for road-building, 250 million for naval construction, four Treaty cruisers, twenty destroyers and two aircraft carriers, four submarines and ten million dollars for 290 aeroplanes. The Treasury is expending 100 millions on new post-offices, court houses, quarantines and customs sheds.

The President is insisting that the wages payable will ensure a decent living while strict measures are being enforced to prevent undue rises in food prices.

GOVERNMENT NOTICE.

His Excellency the Acting Governor directs it to be notified for general information that the Bank of England has issued a notice calling in, on the 31st July next, Currency Notes (or Treasury Notes as they are sometimes called) of the Third Series, the liability for which was transferred to the Bank of England when the Note Issues were amalgamated in November, 1928, and the present £1 and 10/- Bank Notes were first issued.

The £1 Currency Notes of the Third Series were first issued in February, 1917, and were printed in brown: the 10/- Currency Notes were first issued in November, 1918, and were printed in green: the Notes each bear the facsimile signatures either of Sir John Bradbury or of Sir N.F. Warren Fisher as Secretary to the Treasury.

Until the 31st July, 1933, the Currency Notes of the First, Second and Third Series will continue to be legal tender in the United Kingdom and may be used in the ordinary way, but Members of the Public, however, would be well advised to exchange any of such notes in their possession at the Colonial Treasury, Stanley, in order to avoid any inconvenience which might result from retaining them after that date.

As from the 1st August, 1933, Currency Notes of the First, Second and Third Series will cease to be legal tender, but they will continue to be exchangeable at the Head Office of the Bank of England for Bank Notes of the same value.

The Bank of England £1 and 10/- Notes are not affected by the present notice.

Special Notice : The foregoing notice does not in any way refer to Currency Notes issued by the Government of the Falkland Islands.

Stanley, (sgd.) A.I. Fleuret,

ARMED BANDITS.

Heavier Punishment.

A message from London states that the Government is taking steps ensuring heavier punishment for armed bandits through a Bill which Lord Lucan is moving on behalf of the Home Office in the House of Lords for passage this year.

The Bill provides for the same severe punishment for terrorism by imitation fire-arms as lethal weapons with fourteen years penal servitude for usage or attempted usage, in addition to the sentence of correlated offences.

The sentence for possession only, is seven years, unless covered by lawful objects.

BOXING.

Verdict For Petersen.

In the boxing heavyweight competition held at the White City, London on Wednesday evening Petersen gained the verdict on the disqualification of Doyle for low hitting in the second round.

Doyle had been constantly warned for low hitting throughout the 3 minutes 33 seconds the fight lasted while Petersen was obviously hurt by these tactics on half a dozen occasions but did not complain.

On leaving the ring Doyle was loudly booed.

TWO LONDON FIRES.

A message from London states that two fire outbreaks in the Capital on Wednesday, involving a chemical factory in East London and a millinery warehouse in the City, caused extensive damage to property but fortunately there were no fatalities.

The fire at the chemical factory involved two houses the other side of the canal where it was situated so intense was the heat and the lengths of the tongues of flames. Fortunately the residents of the houses were able to escape.

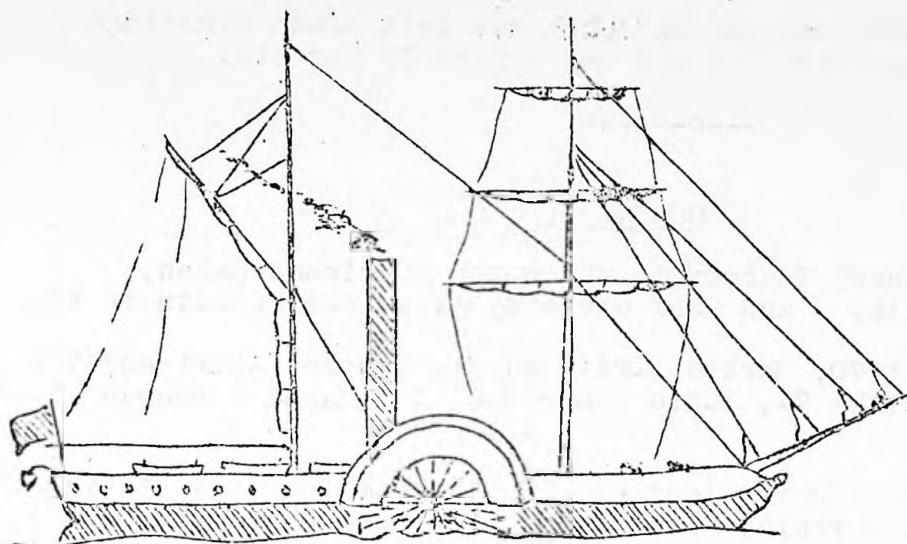

At the warehouse all the girls employed there made an orderly evacuation.

AIR ARMADA ARRIVES IN LABRADOR.

According to a message from Cartwright, Labrador, the Italian Air Armada, consisting of 24 flying boats, arrived there safely after covering the 1,500 miles from Iceland in 13 hours, making the greatest flight in the history of aviation.

The Armada is now more than half-way to its destination having completed 3,940 miles of the 6,190 miles. The next stopping place will be Shediac, New Brunswick from thence to Montréal and finally Chicago.

The take off from Iceland was of eight flights of three machines each at intervals which were extended to minimise risks from blind flying through the fog which is prevalent over the Atlantic, writes the Daily Telegraph correspondent. General Balbo, who is in command started off with the final group.

The Armada encountered a twenty minutes dense fog near Cape Farewell but thereafter the weather was clear. Before landing General Balbo sent a message to Mussolini "Flying over Sandwich Bay proud to have executed your orders."

Balbo received congratulations from Mussolini and also from the Chicago Fair where a royal welcome is being prepared.

THE CIVIL DISOBEDIENCE CAMPAIGN.

A message from Poona states that the fate of the Civil Disobedience Campaign in India is still undecided. Wednesday's meeting of the Indian Congress adjourned without taking any conclusive action states the Daily Telegraph correspondent.

The mass of opinion is overwhelmingly in favour of the withdrawal of the Campaign but many of the delegates attacked Gandhi for admitting failure.

Gandhi was present but his address and subsequent proceedings are as yet unpublished, though it is clear moderate feelings prevail.

It was stated from Bombay on good authority that the Campaign would be unconditionally withdrawn yesterday when Gandhi was expected to seek an interview with the Viceroy.

BISLEY.

Ashburton Day was held in drenching rain, a press message from Bisley stated on Thursday, Glenalmond winning the Shield and Medals with a score of 487, with Winchester second (480) and Marlborough third (478.)

---o---o---

ENGLISH WEATHER.

According to a report from London heavy lowlying clouds, bringing rain, were responsible for the first wholly sunless day in England on Thursday since the 2nd of May. The spell almost constituted a record. The temperature of 64 degrees was the lowest since the 10th of June, being seven degrees below the average.

---o---o---

AUSTRALIAN TEST VISIT.

Almost Certain Next Summer.

The Daily Telegraph stated on Thursday that the projected visit of the Australian Test cricketers next summer is now practically certain following the period of uncertainty due to the strained relations relative to the "body-line bowling".

It is understood that the country's response to the M.C.C. invitation for opinions shows a definite revulsion to these tactics and therefore assurance can be given to the Australians that they will not be adopted.

---o---o---

GERMANY & NATIONALISM.

The German Minister for the Interior, Herr Frick, outlined in Berlin on Thursday the main points of the country's national scholastic instruction programme, stressing that young Germans must be told of Germany's heroic struggle against a world of enemies made apparent during the last war, how Versailles humiliated the German people, how "treacherous forces" disintegrated the nation, and the importance of race.

Another vital point stressed is the insidiousness of international as opposed to the national idea which for above a hundred years threatened to "devour" the German soul because the German was more prone than other men to succumb to the influences of unworldly dreams.

WEST INDIES HURRICANE.

An official pronouncement from the Colonial Office states that the hurricane which did extensive damage in Trinidad on the 27th of June, passed about one hundred miles south of Jamaica but hit Grand Caymen Island on the 1st of July.

Roads and bridges in Jamaica suffered extensively throughout. The terrific rainfall which followed amounted to twenty-two inches in ten hours.

Five lives were lost through drowning and the gross estimate of the damage caused is from £30,000 to £50,000.

In the second round of the Golf Tourney at Forthcawl Burton, the British player of Hillside Club, led the field with a record score of 138 after a round of 67 (31 and 36); R.A. Whitcombe was next with 145 with E.R. Whitcombe and the American Runyan with 147 coming next; Hagen was fifteenth with seven others including the American Dudley who retired with 154.

---o---o---

U.S.A. & SOUTH AMERICA.

According to the Daily Telegraph correspondent at Washington President Roosevelt has announced the United States readiness to commence trade discussions with several South American republics. This is regarded as the President's indirect reply to the World Conference's failure to effect immediate trade agreements.

The Washington State Department on Thursday was visited by the Argentine and the Brazilian Ambassadors and the Columbian Minister, and apparently the Argentine are likely to play a leading part in developments, it being understood that tentative plans for a trade agreement are well advanced.

The discussions are at present informal without any mention being made of the World Conference since administrative opinion is that the bulk of the money spent in South American products would eventually return to the United States.

50,000 DOLLARS RANSOM.

The Daily Telegraph correspondent in Chicago learns that a 50,000 dollars' ransom is being paid for J. Factor's release. Factor, it is stated, is being held a prisoner not far from Chicago in a farm outhouse, his captors numbering about twenty. The ransom is being arranged by negotiations between the family and friends of the bandits, the payment being made openly in broad daylight in a Chicago suburb.

FRENCH LOAN PAYMENT.

A Paris message states that the French Minister of Finance has been authorised to repay immediately half of the London loan of £20,000,000 raised at the beginning of the year.

The payment is not due until November and it is understood that the second half is also to be paid in advance of the time it was due.

---o---o---

GANDHI HECKLED.

The Disobedience Campaign Conference at Poona on Thursday was marked by Gandhi being heckled, many of the speakers becoming personal.

The Conference again adjourned without coming to a decision on Civil Disobedience but the Campaign's withdrawal is strongly supported.

The Congress fears the "possibility of humiliating conditions" in connection with Gandhi's projected request for an interview with the Vice-roy a press message reports.

RETURN BADMINTON MATCH.

Town Club Win This Time.

A return Men's Doubles Badminton Tournament was played yesterday afternoon by the Town and Defence Force Clubs, the former being the hosts on this occasion.

In the previous match the Defence Force won by the odd game in nine but this time the Town Club turned the tables, defeating their guests 5 - 4 in games. Miss Oldham again took part since the Town Club could only raise five men while, in addition, one of the other men members had to deputise for H. Thomas (her partner) who was absent for two of the games.

The results were as follows (the visitors names being given first) :

Messrs. W.M. Allan & C. Henriksen lost to Messrs. L.F. Hodgson & T.D. Evans 6 - 15, beat Messrs. J.D. Creamer & W.D.A. Jones 15 - 9, beat Miss Oldham & partner 15 - 11.

Messrs. W. Aldridge & G.L. Pallini lost to Messrs. Hodgson & Evans 9 - 15, lost to Messrs. Creamer & Jones 12 - 15, beat Miss Oldham & partner 15 - 10,

Messrs. L. Aldridge & R. Campbell lost to Messrs. Hodgson & Evans 6 - 15, lost to Messrs. Creamer & Jones 6 - 15, beat Miss Oldham & partner 15 - 4.

It is understood that a "decider" is to be played when arrangements can be made.

OTHER BADMINTON TOURNAMENTS

All For A Sausage Supper.

On Wednesday last week the members of the Defence Force Club played a novel tournament as a result of which the losers were the "hosts" at a Sausage Supper held in the Club Room on Saturday evening.

Two teams were selected under the captaincy of Miss Mollie Davis and Miss Lena Davis consisting of both male and female members and a tournament of thirteen games was held under the knock-out system. Enthusiasm was intense and excitement ran high when at the end of the twelfth game each side had won six matches and when Miss Lena Davis's final pair won the last game we learn, unofficially, that her side immediately set to work to draw up a glorious menu for the benefit of the "caterers." Needless to add everybody thoroughly enjoyed not only the tournament but the subsequent prize.

Town Club's "Field Day."

On Saturday afternoon the members of the Town Club held an American tournament, the second of the season, followed by tea at Belmont House; on the previous occasion during the tournament they adjourned to Sydney House for tea.

After some excellent games - fast and furious - it was found that Mr. and Mrs. Hodgson tied with Miss J. Miller and Mr. T.D. Evans (- 2 handicap) for the "championship" and on the replay the honours went to Mr. and Mrs. Hodgson.

YOUNG PEOPLE'S CLUB.

A general meeting of the recently formed Young People's Club was held in the Church Hall on Friday evening last when the Very Reverend the Dean of Stanley, as chairman, addressed the gathering.

Many various and useful arrangements were made for the benefit of the members whose enthusiasm assured the continuance of the pleasant evenings already enjoyed. It was shown that there was a keen interest being taken in badminton which had been started recently and at which Mr. H. Jennings had devoted a considerable amount of time instructing the members. The very cordial thanks of all were expressed to Mr. Jennings for his kindness.

The honorary secretary of the Club is Miss C.M. Newing.

THE FOUR-POWER PACT.

According to a message from London on Saturday the Four-Power Pact was signed in Rome that day in the presence of a distinguished gathering.

The ceremony lasted only a few minutes, there being no speeches, and the signing was concluded with hand-shaking all round.

Immediately the ceremony was over all the church bells in Rome pealed joyously.

It is announced that the conclusion of the pact - which its authors hope will ensure peace in Europe for the next ten years - has given great satisfaction to Germany who is expected in the near future, as the result of the Pact, to improve her relations with France.

---O---O---

ETON V. HARROW.

A late message states that the cricket match at Lords between Eton and Harrow was left drawn.

The scores were : Harrow - first innings 237, second innings 146 for six declared; Eton - first innings 195, second innings 84 for four wickets.

THE ARMADA THERE.

A Reuter message from Chicago on Saturday stated that the Italian Air Armada arrived there that day, the fliers actual flying time from Orbetello to Chicago being 47½ hours for the 6,065 miles.

The airmen who were greeted by a huge crowd received an official welcome.

A Rome message states that the news of the arrival of the airmen at Chicago created intense enthusiasm. Huge crowds paraded the streets in torch-light processions on Saturday night, singing patriotic songs.

It is Italian opinion that this flight, combined with the Lake Garda speed records, has placed Italy to the forefront in the progress of world aviation.

RUSSO-GERMAN RUPTURE ?

Diplomatic circles in Berlin are discussing the possibility of a complete rupture of commercial relations between Germany and Russia, states the Daily Telegraph correspondent.

It is said that Russia is counting on supplying her needs in America and Britain and she will welcome such an eventuality.

It is stated that such a rupture would relieve Russia of the necessity of meeting huge obligations to Germany now due. The actual sum involved is not generally known but diplomatic quarters mention a figure in the neighbourhood of 2,000 million marks.

GERMANY EXPLOITING CREDITORS.

According to a message from Berlin new financial measures have been designed to develop Germany's trade in the world markets and are shortly to be promulgated. Under these Germany's long term creditors are being exploited in the interests of German exporters by granting to the creditors "scrip" in part payment of the interest due.

Should the creditors press for the discontinuance of the scrip they will forfeit 25 per cent of the sums due and these amounts are to be used to assist exporters to reduce their overseas prices.

Another financial development in Germany is the Government ban on trading in "frozen" marks which hitherto have been indulged in by international speculators. This was initiated under the Schleicher Government while the Hitler regime was apparently unaware of its existence until it was revealed by the Daily Telegraph.

Further decrees for the prevention of interference with business are announced and a Prussian edict provides penalties from death to long terms of imprisonment for "sabotage and unauthorised interference with commercial life."

---o---o---

GANDHI'S CAMPAIGNERS.

Like lihood Of Split.

The Daily Telegraph correspondent at Poona states that notwithstanding the fact that the Congress delegates were "sworn to secrecy in the public interest" it is learned that Saturday's meeting found the majority of the leaders against the continuance of the Civil Disobedience campaign while the "diehards" opposed such action. As a result a split which has already threatened the movement is becoming more imminent.

Gandhi himself is adamant against discontinuance and secured authority from the meeting to negotiate by seeking Viceregal audience in the form of an interview to obtain an "honourable settlement", the alternative being the resumption of the Disobedience campaign.

MANCHESTER NERVOUS.

A message from Manchester states that the cotton trade is regarding with misgivings the proposed conference between the textile leaders of Britain and Japan to arrange mitigation in the face of prevailing competition which is considered fierce.

The view is held that Lancashire has everything to lose and Japan has all to gain, and if the Government first took steps to protect British goods in the Colonial market the discussion would be entered into more confidently.

HOW HINKLER DIED.

It has now been ascertained that Bert Hinkler, the Australian airman whose body was found in the Italian Appenines after he had been missing for some weeks while trying to lower the England to Australian flight record, met his death 1,000 ft from the summit of a mountain. Usually the mountain top is wreathed in clouds and highland storms break over it. On such a day it is believed that the accident occurred.

Hinkler was probably flying low in the storm to try and locate a suitable landmark, and without realising how high the ground was crashed into the mountain side. He must have died instantaneously as there were two severe wounds in his head.

The plane did not crash head-on, but obliquely, as if the pilot had suddenly seen the ground looming ahead and had made a desperate attempt to raise the plane clear. The machine was not badly smashed, and the cabin was intact. All the four petrol tanks were still partly full. A slight fire had broken out after the crash, but the storm evidently extinguished this promptly.

CANADIAN EMIGRATION.

A Memorandum, issued for information by the Parliamentary Emigration Committee and Overseas Settlement Department, outlines a plan for extending Canadian emigration along more satisfactory lines through the establishment by the United Kingdom counties and towns of a "Foundation Settlement". Each centre would have its own settlement overseas where its own selected families could be placed and supervised and the return of "misfits" could be provided for.

Ontario, apparently, is most favourably placed for the scheme, the Memorandum states and the Dominion Government sees no reason for delay in taking immigrants while the Federal and Provincial Governments are willing to cooperate.

It is pointed out, however, that there should be some way to ensure a better selection of immigrants than hitherto with the little free land available at the moment for establishing new immigrants from the United Kingdom, neither the Federal nor the Provincial Governments can make cash contributions towards settlement costs.

RISE IN U.S.A. ACTIVITIES.

A message from New York on Monday night states that the latest figures relative to the rise in speculative and business activity in the United States for the past few weeks show, for violence in movement, that there has been no comparable period within living memory.

Commodities have been registering new high levels daily while security trading set up a June record with the bank clearings for the past four months up 33 per cent. The period railway revenues also show a first increase since 1929.

The average cotton mills output jumped from the recent 58 per cent to 109 in May and 125 in June while the takings of the latter month exceeded all monthly trade records.

The steel trade activities have increased 300 per cent and there is no sign of slowing down in the industry.

GANDHI'S REQUEST REFUSED.

According to a message from London Mahatma Gandhi's request for an interview has been refused in a telegraphed reply from the Private Secretary of the Viceroy of India.

Referring to the subject in the House of Commons on Monday, Sir Samuel Hoare said, that the reply had the full concurrence of the Government.

The general support of law and order in India, he said, is daily becoming stronger and summaries in the Indian press indicate a strong feeling among the rank and file of the Congress against the continuance of an unlawful and unconstitutional programme.

There could be no question of making a bargain with the Congress as a condition to their accepting ordinary obligations common to all law-abiding citizens.

U.S. INDUSTRIAL RECOVERY.

Progress Of Programme.

The Daily Telegraph New York correspondent states that this last week-end has been the most important since the American programme for a national industrial recovery was set in actual motion.

A new code for fair competition has been submitted to General Johnson, the industrial Co-ordinator, by the iron and steel trade while the wool manufacturers have also submitted a code. The steel code represents ninety per cent of the industry. Besides wage increases it provides penalties for unfair competition, allows employees to organise themselves and forbids child labour.

General Johnson has declared that a project for the inclusion of all the great industries will be under consideration within a fortnight.

The President, Mr. Roosevelt, and the Co-ordinator, are considering whether it will be necessary to formulate a "Blanket Code"; this would contain a minimum wage and maximum hour agreements for all industries at the Government's orders, pending the adoption of the different codes prepared by the industries themselves.

THE LATE MRS. BE NEWING.

It is with the deepest regret that we have to record the death of Mrs. Bessie Newing, the wife of Mr. Lawrence Newing, who passed away about 7.30 yesterday morning.

Mrs. Newing, who seemed to be in her usual state of health right up to the moment she died, celebrated her 75th birthday only last Friday, the 14th instant, and her passing came as a terrible shock to all who knew her and admired her so much for her happy disposition and cheerfulness, maintained to the end which came, happily, peacefully and without pain.

She came to the Falkland Islands as a maiden in her teens, in the sailing ship "Sea Witch", with Captain Thomas as master, arriving in the Colony in 1872. The voyage from Tilbury Docks to Stanley occupied about sixty-three days. Her birthplace was St. Mayben in Cornwall. She is survived by her husband, four sons and two daughters to whom we extend our heartfelt sympathy in their irreparable loss. We understand that the funeral is being arranged for 2.30 p.m. on Friday at the church.

BIG SHIPS TO STAY.

Europe Not Disturbed By U.S.A. Decision.

Does the decision of the United States Shipping Board to scrap the giant liner Leviathan and build in her place a cabin-class ship of about 20,000 tons smaller indicate that the era of the big ship is passing?

The Leviathan, formerly the German liner Vaterland, has been losing from £12,000 to £20,000 each trip.

"The American decision to scrap the Leviathan and build a cabin-class ship is not likely to affect the policy of the European shipping companies," an official of the Cunard Line has told a press representative.

"We have thirteen cabin-class ships and find that at present there is a big demand for accommodation in them, the difference between £60, the first class fare, and £34, the cabin-class fare, being a big consideration. But we are also building the biggest ship in the world, for we believe that when prosperous times return passengers will want the big ships. Moreover, the big ship is cheaper to run.

"France, Germany and Italy, as well as Great Britain, are building big ships, and they have long experience of the North Atlantic trade."

INSECT SURGERY.

Operating On Mosquitoes.

Surgical operations on mosquitoes. This sounds like one of those circus entertainments, but as a matter of fact, the operation is a new method of treating that dreaded form of human paralysis known as paresis.

Formerly paresis patients were infected with malaria through the bite of a live mosquito carrying the disease, it having long been known that malaria arrests the progress of paresis and in some cases effects cures.

Dr. Bruce Mayne of Columbia, South Carolina, has been experimenting with surgical operations on mosquitoes for the removal of their salivary glands - glands which must be magnified twenty times before they are visible.

Malaria germs are carried by the insect in these glands, which, on their removal, are made into a malaria serum for injection.

The insects on which the operation is performed are bred specially, and they are allowed to bite the person suffering from malaria. They are then placed under ether for the operation.

CLAIM BY TWO WIVES.

Sequel to Notorious Identity Riddle.

An unknown man was recently arrested from prison at Palermo and welcomed by the family of Professor Giulio Canella, a distinguished Italian scholar, reported missing during the war.

The identity of Professor Canella has been puzzling the courts in Rome for several years.

A man found in 1927 suffering from loss of memory in the streets of Turin and had to be taken to a lunatic asylum, was claimed by Signora Canella as her husband. On the other hand, the wife and relatives of a man named Bruneri who disappeared after being accused of theft, declared that the man in the asylum was Bruneri.

The Turin Court affirmed that the man was Bruneri, but Signora Canella persisted in her belief that the man was her husband.

WHO INVENTED THE SHINGLE ?

A Norse Fashion 1,000 Years Ago.

In recent years many people have claimed to be the inventor of the shingle, but no one has been able to establish an indisputable title, and it is possible that no one ever will.

Welsh women bobbed their hair 700 years ago, and there are older records even than that of closecropped feminine fashions.

A few years ago archaeological excavations near Tilsit, East Prussia, brought to light the remains of the Viking civilisation which revealed that many a Norse maiden wore her luxurious golden hair clipped short. Thus more than 1,000 years ago shingling was a fashion among women, while the mode for men was flowing locks.

MASONIC PEACE MEMORIAL.

Dedication Ceremony.

In the presence of six thousand Free-masons, including delegations from all parts of the Empire and from many foreign countries, the Duke of Connaught as the Grand Master of the United Grand Lodge of England on Wednesday, dedicated the Masonic Peace Memorial which, in the form of a central home for craft, has been built in Great Queen Street, London.

The movement, brought to a completion by Wednesday's ceremony, was initiated in 1919, the day before the signing of the Versailles Treaty.

It was decided that £1,000,000 should be raised for the building and endowment of the structure and this has been obtained by voluntary subscription.

The foundation stone was laid by the Duke of Connaught six years ago.

In the course of a reply to a telegram of loyalty to the King, His Majesty expressed the hope that the Temple "may stand for ever as a memorial to that spirit of comradeship which unites Free-masons to-day in remembering that their brethren who made the supreme sacrifice in the Great War should never be forgotten."

The Grand Master dedicated the building "To Freemasonry, to Virtue and to Universal Benevolence."

SUNDAY'S MATCH.

No. 3 Platoon 4 : No. 1 Platoon 2.

After a three weeks' spell of forced rest owing to weather conditions No. 3 Platoon resumed their fight for the Championship in their encounter with No. 1 Platoon on Sunday and won decisively by two clear goals, the score being 4 - 2.

No. 1 Platoon who hoped to rehabilitate themselves were very unfortunate in that they were compelled to play three reserves and their forward line suffered on account of this. L. Aldridge (outside right), C.G. Allan (inside left) and G.L. Pallini (centre-forward) were the men unable to turn out and their places were taken by Spence, D. Williams and Thomas while William's position at half back was filled by the inclusion of E. Biggs.

The weather could not have been better though the ground, still greasy from the bad conditions of late, was somewhat treacherous and made the ball difficult to control. From the point of view of good football the game was not outstanding though there were several good melees in front of the goals when anything might have happened but invariably didn't.

The wind was fairly strong in the first half but dropped altogether in the second, and though No. 3 Platoon played against it at the beginning they scored three goals before half-time with only one response from No. 1. No. 3's goals were scored by Beardmore, A.I. Fleuret and Grierson while Spencer "netted" for No. 1.

In the second half No. 3 Platoon eased off considerably and though their opponents tried hard, particularly the defence, to keep the lines clear they seemed to be as hard pressed as ever. No and again excitement grew intense as one or other of the losing wingers got away but No. 3's defence usually managed to intervene opportunely and clear.

If one may be permitted to give a word of advice to the defenders of both teams, particularly of No. 1, the game would be much quicker and more effective if the ball was cleared first time. It stands to reason that if a defender kicks the ball three or four times before he "gets rid" the opposing defence have ample time to get back to their positions and frustrate any openings which were at first available for his own forwards. The forwards too, must remember to keep their positions for they cannot expect harassed defenders to put the ball in the right spot if they don't know where the forwards are.

The goals in the second half were scored by F. White (for No. 3) and R. Campbell for No. 1. It should have been mentioned above that Halliday was included in No. 1's team to take the place of Thomas at inside right.

The goal scorers to date are :- No. 1 Platoon - L. Sedgwick (2), C. Clifton, F. O'Sullivan, L. Aldridge, C. Allan, R. Campbell & Spencer. No. 2 Platoon - J. Jennings (4), D. O'Sullivan (3), P. Hardy, C. Pike & D. Williams (own goal.) No. 3 Platoon - W. Beardmore (4), E. Pettersson (3), W. Grierson (3), F. White (3), A.I. Fleuret (2), F. Thompson & Pedersen (own goal.)

THE MOLLISON'S ATLANTIC FLIGHT.

Mr. and Mrs. J. Mollison left England on their Atlantic flight on Saturday. At 4.0 p.m. the same day they were reported missing but half an hour later the railway and postal officials of Robinson's, Western Newfoundland identified their plane while a message from Portland, Maine, stated that they passed over at 6.15 yesterday evening, flying at a low altitude and at the speed they were travelling expected to arrive at New York three hours later.

It is understood that a marvellous reception was being prepared for them in New York.

---O---O---

OTHER FLYERS.

Wiley Post, the American round-the-world flyer, who is beating all records, was expected to arrive at New York also yesterday.

There is no news of the German flyer, Wirtschaft, who was crossing the South Atlantic from Senegal.

THE KING'S CUP.

The King's Cup Prize at Bisley was won by Officer Cadet D.E. Woods of Nottingham University who made 287 in the final - four clear points above the next man. Regimental Sergeant-Major R. Leggate was second and a Canadian, it is believed, named McLeod was third.

The broadcasting of the final shoot was received at Stanley Studio and relayed to listeners-in but conditions were such that reception was not too good.

TENNIS.

In the Davis Cup Doubles, Inter-Zone finals at Paris on Saturday the Americans Vanrym and Lott defeated the British players Perry and Hughes 8 - 6, 6 - 4, 6 - 1.

In the singles played yesterday the matches proved to be intensely exciting, packed with incident and culminating in a dramatic close which gave England a well-earned victory.

Austin beat Allison 6 - 2, 7 - 9, 6 - 3, and 6 - 4.

Perry beat Vines 1 - 6, 6 - 0, 4 - 6, 7 - 5 and was leading in the final set by 7 - 6 when Vines dropped into a dead faint.

BATHING STARTS EARLY !

A youthful enthusiast - at least, we are inclined to think so judging by the whole-hearted spirit he put into his effort - determined to begin bathing on Sunday. It was about 4.0 o'clock in the afternoon while riding a bicycle along the Walk below the Battle Memorial when the inspiration came to him. So suddenly was his mind made up that he didn't even stop to get off the machine - he took it with him !

Luckily the tide was high so that he had about two feet of water in which to plunge. Otherwise he might have hurt himself considerably. Though thoroughly wet he was quickly helped out by his less venturesome companions and happily appears to have suffered no ill effects as a result of his accident.

Our bathing correspondent adds that this first "bather" of the season was merely copying the example of a girl who tried to do the same thing earlier in the day but in a less salubrious spot, namely, where the work of widening Ross Road is taking place at the botton of Little Italy corner.

THE RINGWORM EPIDEMIC.

Now Under Control In Stanley.

Only Three Fresh Cases.

The epidemic of ringworm which recently threatened to overrun the Colony is, we are able to state, now under control as far as Stanley is concerned. Since the 22nd of June last, when a special supplement was issued on behalf of the Principal Medical Officer drawing the public's attention to the disease and advising them as to the best methods of treatment and preventing further infection, there have been only three fresh notifications.

As far as is known approximately fifty persons have been affected in the East Falklands since the commencement of the outbreak among humans. And up to date seventy-five per cent of these cases have been cured while it is hoped to reduce the percentage to twelve during the present week. The situation in the Camp is being looked after by the respective Medical Officers.

Confined to the East Falklands, the epidemic was first identified among human beings in the Spring of 1932, these people - chiefly women and children in the Camp - having been infected directly as a result of handling cattle; The infection among the cattle was first noticed in 1931 and is believed to have been carried to them by the wild cattle in the hills with which they have come into contact.

Cleanliness - The Best Preventative.

In order to refresh our readers' memory as to treatment and methods of preventing the disease so that it might be completely stamped out we take this opportunity of repeating parts of the Supplement issued last month :-

"Ringworm appears on the skin as small red, round patches which often have a scaly appearance.

"Treatment :- Careful personal hygiene is essential. Frequent resort to soap and water is necessary. The hair should be worn very short and shaved off in the vicinity of the sores, and the scalp frequently washed. Tincture of Iodine or Iodine Ointment, or Ammoniated Mercury Ointment, or coarse salt mixed in fat should be applied to the sores.

"It is foolish to conceal the disease.

"Prevention :- Workers who come in contact with affected cattle, or persons, must exercise extreme care of their own person. The hands should be carefully washed after each contact. The hair should be worn short and washed frequently. Children should be warned not to wear one another's caps."

THE MOLLISONS.

Crashed - & In Hospital.

News was received late on Sunday night that Mr. and Mrs. J. A. Mollison crashed while landing at New York after the Atlantic flight, and that they were both rushed off to hospital. Up to the moment of going to press there is no definite news as to the extent of their injuries although a press message received yesterday reported that in an interview Mr. Mollison said to a reporter that their projected flight to Bagdad would not now take place. In view of this statement one is led to hope that neither of them are seriously injured.

There is a Bagdad in Mexico and it would appear that this is the town referred to in the interview.

THE JEWS & THE GERMANS.

No Official Boycott.

According to a message from London Sunday night after a two-hour session in camera the Jewish Board of Deputies which is the "Parliament" of the Jews in the British Empire, defeated a resolution for proclaiming an official boycott of German goods and services by British Jews by a majority of 110 over 27.

It is understood that the general feeling is keenly in support of a boycott but the view prevailed that the time is not yet opportune for an official proclamation though it was held that action was entirely a matter for the individual Jew.

A statement was issued to the meeting setting out the necessity of calling a conference of representatives of every country's Jewish organisations to discuss the "best methods of assisting Jewish victims of German persecution."

THE WORLD CONFERENCE.

Silver Treaty Signed.

A message from London reports that the Silver Treaty was signed on Saturday night and this is considered the most important entry on the credit side of the World Economic Conference in addition, according to the American Senator Pitman, "it is the beginning of a new effort to restore world prosperity."

Indian circles regard the agreement as extremely advantageous while China and inter-trading countries will benefit by the stoppage of price fluctuations. Canada foresees mining betterment and improved far Eastern trade.

The signatories were Australia, Canada, China, The United States, India, Mexico and Peru and the treaty is subject to ratification before April 1934.

MESSAGE TO THE MOLLISONS.

A message from New York states that Mr. Mollison gives as the reason for the accident a confusion of the lights, mostly due to his exhausted condition, as a result of which he tried to land on marshy ground near the aerodrome. There was a high wind blowing at the time and as his machine taxied along the ground it sank into a soft patch and turned over. The Seafarer, their machine, is a complete wreck it is reported.

Lord Londonderry, the Minister for Air, telegraphed the following message to Mr. Mollison :-

"Much regret to hear of your unfortunate accident to yourself and Mrs. Mollison and of the damage to the machine when you had accomplished so much."

Congratulations on the east to west flight and sympathetic messages to the disappointed pair have been received by Mr. and Mrs. Mollison from all over the world.

STERLING & THE FRANC.

In a Parliamentary answer on Tuesday the Financial Secretary to the Treasury, Mr. Hore Belisha, stated that there was no truth in any suggestion that sterling is tied to the Franc.

The policy of the Government is to prevent frequent and wide fluctuations in exchange due to purely speculative influences.

No inference can be drawn from the fact that the gold fluctuations in the gold value of sterling are not very wide at this particular time.

He added that there was no reason to suppose that the Dominion Governments and the Governments of countries in the sterling area see any objection to this policy.

ANGLO-JAPANESE CONFERENCE.

In a statement regarding the possible convening of a conference between British and Japanese industrialists with regard to Japanese trade competition, the Parliamentary Secretary to the Board of Trade, Dr. Burgin, said on Tuesday that a proposal was under consideration and that it had been suggested that it should be a "tri-party" discussion in India in the near future.

The "tri-party" discussion, it had been suggested should be between the representatives of the industries concerned of Lancashire, India and Japan, covering the whole field of all classes of textiles in which these countries are interested.

These discussions will relate to the Indian market and the British Colonial markets in which India is interested.

The proposal has been made on the understanding that the discussions in India would be immediately followed by discussions in Britain with regard to other textile markets between the industrial representatives of Britain and Japan.

FIRST & SECOND WIVES KILLED.

Tragic coincidences attended the loss by a Mr. A. Cordingley of Fradford recently of his second wife and six-months-old daughter. The woman was killed, like his first wife six years ago, by a motor-vehicle crashing through a wall. Each woman was thirty-two years of age, and each was wheeling a perambulator with a six-months-old baby in it.

The first Mrs. Cordingley's baby escaped through the mother pushing the perambulator out of the way. The second Mrs. Cordingley and her child received fatal injuries when a lorry struck a wall on a steep bank, taking the woman and the perambulator with it. The lorry came to rest just above a drop of fifty feet, the driver only receiving slight injuries.

Mr. Cordingley had gone to see a football match and during the game he was asked to go home at once.

In an interview with a Daily Mail reporter He said "It almost seems that it had to be - my first wife being exactly the same age as my second and each wheeling a six-months-old baby."

---o---o---

AN EMPIRE POLICY.

The Daily Telegraph states that the Dominion delegates in London are continuing to meet with the Home Government and progress is apparently being made with the discussions of a draft declaration of an Empire Policy which will probably be sufficiently advanced for publication by the week-end.

In view of the fact that the British Empire is the largest homogenous unit in the world they have pledged among themselves to maintain the greatest possible stability but while maintaining considerable flexibility some of the Dominions, apparently, would like the United Kingdom to adopt a clearer lead concerning its financial policy.

It is understood that there is a strong tendency among Ministers to defer a change in the currency position until the dollar finds its own level in foreign markets.

---o---o---

SILVER.

A report from Shanghai states that the silver market is not unduly affected there by the London agreement, the position remaining unchanged.

Local circles consider that the agreement will not ensure permanent strength to silver particularly in view of New York speculators holding 125 million ounces which might be marketed at any time. It is pointed out that Russia is not a signatory although recently a heavy seller of silver.

EDUCATION IN MALTA.

The situation in Malta was the subject of questions in the House of Commons on Tuesday, addressed to the Minister for the Colonies, Sir Philip Cunliffe Lister.

He was asked if he was aware that, in regard to the teaching of English and Italian the people were growing exceedingly anxious at the growing Italianisation of the British Colony. The Minister replied that the House of Commons unanimously approved of the course which the Government have taken with the regard to the teaching of English in Malta.

That decision would be strictly carried out. He thought the Maltese Government understood that there could be no question of modifying in the slightest degree the unanimous decision of Parliament.

NAZI COMB OUT.

Search For State Enemies.

According to a Berlin message on Tuesday a comb out, unprecedented in the history of the country, was staged that day by the Nazi Government.

Every train, omnibus and tram throughout the country was brought to a stand-still at noon and examined by the Police assisted by Brown-Shirts and Black-Shirts.

The ominous silence lasted forty-five minutes during which hundreds of provisional arrests were made of people whose identity papers were not satisfactory.

The Daily Telegraph correspondent states that the nation-wide search for State enemies was instigated by the Prussian "Ogpu" with all the other State Governments co-operating.

It is announced that many people against whom there have been warrants for arrest have been found to be in possession of illegal literature while many individuals driving cars have been found to be in possession of fire-arms without licences.

It is claimed that this proves that the State's machinery can work quickly and effectively at any given moment.

RESPONSE TO RECOVERY PLAN.

A New York message states that Roosevelt's broadcast appeal for the Recovery Plan of the United States has received immediate and ever increasing response.

The President said in his appeal that millions would be re-absorbed in industry by the autumn if the minimum wages' code were put into effect and "blanket" agreements would start the recovery wheels turning immediately.

He added "If any considerable lags or shirks the adoption of the code the great opportunity will pass by and we will go into another desparate winter."

Subsequent to his speech Wall Street opened firm on Monday but it was later announced that from Wednesday onwards the stock market hours would be from 11.0 to 2.0 p.m. with Saturday closing.

FARMERS' COMPLAINT.

"Facts Injuring Home Agriculture."

At a meeting held recently the Agricultural Party protested against the British trade agreements with Denmark and the Argentine on the grounds that they seriously injured the agricultural industry in Britain.

A resolution was passed that steps should be taken to present their protest at the Bar of the House of Commons. Another resolution was passed against the ratification of trade agreements with foreign food producers.

Mr. J.F. Wright, chairman of the party, said that the primary food-producing industry had been sacrificed to get an increased market for manufactured products and iron and steel.

THE YOUNG 'UNS WIN.

Wholesale slaughter took place in the Defence Force Drill Hall on Thursday evening when two rival factions met in deadly contest. The victims of this "civil war" were a mass of innocent sausages, in the form of rolls and tempered with liquid refreshment. These had to be provided at the subsequent peace conference by the losers - the Over 35s - at the dictation of the conquerors - the Under 35s.

Our war correspondent writes, at the peril of his life, that on each side there was an out-standing sniper (Bill Cooper for the Overs and O. Pike for the Unders). So successful were these two that both "armies" were in imminent danger of being wiped out. We also learn from an unofficial source that since they collected the same number of points they will not be satisfied until one has bagged more than the other.

The scores are given on the next page.

THE WORLD CONFERENCE.

British Commonwealth Decision.

Simultaneous with the adjournment of the World Conference, the nations of the British Commonwealth announced their decision to maintain exchanges within the Empire.

This means the creation of a vast sterling group and the biggest stable financial unit in the world to which the other nations may adhere while the doors are left open to the United States to join whenever she is ready.

As a unit the Empire will endeavour to raise wholesale prices and stabilise them when established, at the same time agreeing to discuss with British experts the voluntary restoration of agricultural imports into Britain in order to secure fair treatment for British farmers.

The views are held that by the elasticity of the association's terms and the closest co-operation of the central banks of the countries party to it, there can be created that stable element in international finance which is so urgently needed.

SUNDAY'S MATCH.

No. 1 Platoon 5 : No. 2 Platoon 2.

No. 1 Platoon gained their first victory of the season yesterday when they defeated decisively No. 2 Platoon by 5 - 2. Although both sides missed golden opportunities in front of goal and perhaps No. 2 even more than their opponents, the margin of the superiority of the winners was no wit less than that which the score indicated.

It can justly be said that No. 1 have found their form too late. Had they given an exhibition of Sunday's display at the commencement of the competition - and provided, of course, the other Platoons did not take a leaf out of their book - they would most likely have romped home with the Shield. Though their game was by no means perfect they showed a better understanding of Team Work than has been witnessed on the field for some time. The main faults of the winners were that the forwards were inclined to be erratic in front of goal, the halves still persist in hanging on to the ball too long and getting out of position while the backs are inclined to hesitate. Some of No. 1's tactics nevertheless were pretty to watch and the wing forwards centred well while Aldridge gave the centre-forward good opportunities; at half back C'Sullivan did a tremendous amount of work while Biggs kicked soundly; of the two backs Etheridge was somewhat better and had apparently found his proper form. No. 1's goals were scored by Thomas (3), Clifton and Spencer.

From the start No. 2 Platoon showed themselves weak and in spite of the fine play of Pike and Atkins which was undoubtedly of a high standard, and the not less dashing efforts of W. Summers, most praiseworthy for a veteran, it was obvious that if they wished to obtain the two points something short of a miracle would be necessary. Creece, played a good game in goal, though it was obvious he was somewhat nervous of his leg which had been badly knocked in a previous game. No. 2's defence played well; their weakness was in the forward line which was definitely at sixes and sevens. The goals were scored by Atkins and Pike.

The list of goal scorers to date will be given to-morrow.

CANADA RETURNS TO LONDON MARKET.

A London message reports that Canada has returned to the London Money Market. This is considered of imperial and international significance and underlies a recent declaration of the desire for imperial solidarity in monetary matters.

During the war Canada financed her great efforts mainly by internal taxes and internal loans. After the war, when the strain on the London Money Market was severe, Canada turned to New York to supply her capital needs.

The Daily Telegraph says that Canada's return to the London market is of real importance in three ways.

Firstly, it emphasises the Empire's solidarity in monetary matters; secondly, it reveals London as being in a position to resume sound overseas lending; and thirdly, it shows that America's big currency adventure is turning the thoughts of international borrowers to London as the soundest financial centre in the world.

GALE AT COWES.

Regatta Postponed.

High winds and heavy seas round the English coast caused some interference with the shipping services on Monday.

The pinnace from the Royal Yacht "Victoria and Albert", which is the headquarters of Their Majesties during the stay at Cowes, went to the assistance of a paddle steamer which, carried by the gale and strong tides, fouled some of the yachts in the Roads. When nearing the King's yacht "Britannia" the steamer dropped anchor and was later towed clear.

Owing to the gale the regatta of the Royal Yacht Club was postponed. This is the first time the regatta has been delayed in its history.

FRONTIER ACTIVITIES.

Developments in the situation on the North-West Frontier of India are being closely watched.

Troops are advancing from Peshawar to the support of the loyal Halimzai Tribe, which is threatened by the neighbouring tribes of the Mahmands.

Meanwhile the Government of India's demand for the surrender of certain agitators among the Bajauri tribesmen whose conduct threatens peace, and the fulfilment of international obligations has not yet been complied with.

The Royal Air Force aeroplanes accordingly have flown over Bajaur and on Monday dropped notices warning the villagers of their intention to bomb certain specifically limited objects.

The aeroplanes were fired at when over the village of Khar.

TUBE RAILWAY EXTENSION.

Longest Underground In The World.

The last section of the tube railway extension from South Harrow, to Cock Fosters, Middlesex, was opened to the public on Monday. This railway, which is now twenty-five miles long, is the longest underground railway in the world and the new addition, just completed, has cost about £5,000,000.

On some sections the speed now attained is three miles in five minutes.

Cock Fosters was formerly a rural beauty spot but housing estates there have rapidly increased in numbers during recent years and it is estimated that the number of the population will be increased by 50,000 within the next few years.

LIGHTING UP TIME to-night will be at 5.24 o'clock.

THE S.S. LAFONIA,

The s.s. Lafonia arrived at Stanley yesterday morning at 7.15 after a run of four days and about 10 hours from Montevideo. There were seventy-five bags of mail and five passengers, the latter being Dr. H.G. Edmunds, Mr. and Mrs. S. Miller Jnr., Miss O. Felton and Mr. E. Headford.

The vessel was expected to leave Stanley early this morning for Bull Point, George Island, Fox Bay and Egg Harbour, returning about the 9th instant.

TO-DAY'S SUPPLEMENT.

To-day we include as a supplement a copy of the Falkland Islands Horticultural Society's Exhibition Schedule for 1934. The Committee regret that they were unable to issue the Schedule at the usual time but circumstances made this impossible.

Among the changes in this year's Schedule special mention should be made of the alterations in Class G where there are now two sections for Collections of Vegetables - large and small - with the various vegetables to be exhibited specified under each item.

Awards for Dahlias and Geraniums have been added to the Flat Plant Class and Dahlias to the Cut Flowers Class.

Interesting additions in the Cookery Class are various jams and jellies while in Class D, mat-making and leather-craft items now figure for the children with awards for wool and rag mats in Class A, for adults.

A HIT SLOW !

Abdul Aziz, a wealthy young Moslem of the Arrah district of Bihar, has taken a vow to make a pilgrimage to Mecca on foot. After every five paces Abdul Aziz says a prayer. Progress has, naturally, been slow, and the devout youth who left his home nine months ago has not reached Allahabad yet.

Every ten days or so his mother pays him a visit. It is estimated that it may take Abdul ten years to reach his destination.

INGRATITUDE.

Seventeen years ago Mr. Joshua Jones of Hingham, Massachusetts, found a starving fox pup. He nursed it to health, and placed a leather collar round its neck. Six months later it escaped.

Now Mr. Jones has killed a fox which was after his chickens. Around its neck was the collar. Mr. Jones has been missing chickens from his coop for seventeen years.

CAT-AND-DOG SOAP.

Owing to the scarcity of fats suitable for making soap the Soviet Government factories have been boiling down dogs, cats and rats for the purpose. Now, however, the complexions of the Soviet "citizenesses" are to have a much needed rest from the commodity thus produced.

Sily acids for soap making and artificial tallow are going to be manufactured from oil waste at works now being constructed at Gorki - the former Nijui Novgorod.

AIR FLIGHT BY CAR.

A flying motor-car, able to travel on roads and fly in the air, is being tested by Senor de la Ciorva, the inventor of the autogiro.

In the flying motor-car the engine of an autogiro is connected with the wheels of the undercarriage.

It can be housed in an ordinary garage and driven by road to the nearest suitable point for taking-off.

The air speed of the new machine is given as 100 miles an hour.

CHICAGO DIZZY.

More than eighteen months ago the authorities of the Chicago World Fair had their buildings and palaces ready. The authorities decided that the palaces would have to be painted. They commissioned a famous architect to superintend the work. Then a psychologist was called in to suggest colours for the buildings that would indicate the things inside.

The psychologist suggested, the architect obliged, More than £40,000 was spent on the work.

At the finish some buildings were grey, others yellow, others white. The authorities did not like it. Now a further £20,000 is being spent on repainting the palaces. They are now almost finished again but this time they have alternate stripes of red and black, crimson and yellow.

NEW ENGLISH STAMPS NEXT YEAR.

Minor Changes.

Sir Kingsley Wood, the Postmaster-General, speaking at the banquet of the Philatelic Congress in London recently, hinted at forthcoming changes in the colour and design of English stamps.

"Great Britain, early next year, will have an issue of new stamps as the present contract will expire at the end of the present year," said Sir Kingsley.

"I hope to take the opportunity of making some minor changes in design and possibly in colour. It is not proposed to alter the size or general character of the stamps, which will, of course, continue to bear the head of the King.

"Criticism is sometimes made that our stamps remain unaltered.

It is the valued tradition of Great Britain that our stamps should bear the effigy of the ruling Sovereign. They are distinguished also by the fact that it is unnecessary for them to bear the name of the country of issue.

"Any variation in size would mean the complete alteration of stamp machines, of which there are 9,000 in London alone."

HINTS TO EXHIBITORS.

In The Horticultural Sections.

For Show purposes it is not enough to grow fine specimens of Vegetables. It is essential to prepare them correctly in order that their qualities may be seen to advantage. They must be harvested and handled with the greatest care, and each kind must be treated in the special way required. All vegetables should be perfectly clean and free from blemish. Quality, coupled with a size suitable for the table are points of paramount importance in vegetables. Size, much beyond that which invests the produce with the greatest value for the table, cannot be regarded as meritorious, as it indicates coarseness and must, therefore, be regarded as a defect. Gigantic vegetables belong to Agricultural rather than Horticultural produce. In cases of doubt as to whether (other things being absolutely equal) size or quality should be preferred, better quality prevails over larger size.

VEGETABLE GARDENS.

The greater the variety of vegetables grown well, the greater of number of marks recorded, but the less important kinds should only be grown in small quantities, the more important in larger, not only because they count more, but because they are generally more useful.

In order to place small plots on an equality with large ones, the MERITS only and not the Bulk of the crops are considered. The cultivation as well as the value of each crop is set down in marks, and the standard of merit is represented as follows :-

for Broad Beans, Beets, Cabbage (not Red), Carrots, Parsnips & Turnips (other than Swede) - up to 8; for Cauliflowers, Celery, Lettuce & Shallots - up to 6; for Cabbages (red), Leeks, Rhubarb, Spinach or Spinach Beet, Herbs, Radishes, Cress or Small Salads also all other crops together - up to 4.

PREPARATION OF PRODUCE.

Always stage fresh, clean produce only, and enter exactly the specified number of specimens or dishes. Mixing large and small specimens together weakens the exhibit. Very large specimens, coarse or unsightly, are less meritorious than others which are smaller (yet large enough for use), neat, clean and attractive. Judges at Exhibitions always search for faults as well as for merits, and specimens with the fewest faults win the highest prizes. This applies to Flowers & Fruits as well as Vegetables.

- ERRATUM : Class F 3 should read "Cornflower (any colour) (12 blossoms) 1st 3/-, 2nd 2/-." and not "cornflower (white) &c."
- ADDENDUM : Class D 35. Leathercraft 1st 5/-, 2nd 2/-.

THE FATE OF THE ENGLISH CHURCH

IN MONTEVIDEO.

What Is It To Be ?

What is the fate of the English Church of Holy Trinity in Montevideo to be ? For some time past this important matter has been hanging in the balance and the present situation has been graphically reviewed by the Editor of the Montevideo Times. In the June 30th edition of that paper he writes in the following terms" :

"For nearly a hundred years (1844) Holy Trinity Church has stood at the foot of Calle Treinta y Tres and watched Montevideo grow, change, vary and develop into its present state. The Church has been the witness of scenes and events which are the most intimate and sacred memories of many of the Colony, and, as time has mellowed its walls and softened its lines, it has become the most truly English institution in Montevideo. Within its walls rest the bodies of Englishmen who died in battle when they stormed the breach in the walls of Montevideo and mixed their blood with that of the Uruguayan defenders.

"The city has changed during these hundred years. The church, which at that time was situated in the aristocratic quarter of Montevideo, now rears its proud old head in the midst of squalor and degradation. It is out of the way - and has therefore lost much of its past glory, as it's Worshippers have moved

with the city and find it difficult to come back.

"When the plans for the boulevard around the beach were completed and the Municipal authorities decided to destroy the old district surrounding the Church, it was decided that it should be pulled down and all traces of its presence effaced. Legal steps were taken and the Church was doomed to destruction. However, months have passed and the work begun remains uncompleted. The plan of moving the Church to another site has been postponed until sufficient funds are available.

"It still remains looking down upon the dragged debris of a partly destroyed quarter.

"One of the foremost of the community has presented a plan which will save the old Church and maintain it as it should be - a monument of English history in Uruguay. He began his efforts in 1931, approaching the Government for permission to initiate a movement in the Community to maintain and restore the Church as well as to beautify its surroundings by the construction of a plaza in front of the Church building which would be one of the beauty spots of Montevideo. At first the request was refused by the authorities and the matter dropped.

"However, new negotiations have been begun and it is hoped that this time they will be successful."

THE CAREFUL ABERDONIAN.

An Aberdonian had £30: He was determined not to lose it, and so he put the money in a pocket-book, locked the pocket-book up in an attache case, and double locked the attache case in a cupboard. The keys of the attache case and the cupboard he then locked in a writing desk. Finally he concealed the key of the desk in the kitchen.

But a brother Aberdonian, Peter Stephen Gray, a pedlar, found out from his friend where the money was hidden and stole it. He is now to spend four months in prison.

New System Of Cinema Projection.

Professor A. Emilio D'Argenzio, who has been engaged in researches for the benefit of the film industry, claims to have perfected a method whereby films can be thrown on the screen in broad daylight or in a brightly lighted theatre with better results than are now possible in a darkened one.

He is to show a film in broad daylight when the National Institute for Educational Films has an exhibition in Rome next winter. A large Roman cinema theatre is installing his apparatus.

UNPLEASANT SURPRISE FOR A BPI DE.

Registers Declare She Is Dead.

When Miss P. Cavalazzi, aged twenty-two, applied to the local registrar for documents which the Italian law demands before marriage banns can be put up, she was met with the astounding statement that she had no place in the world as a living person because she had been registered as stillborn by her own father.

The mystery was accounted for when her parents remembered that she appeared lifeless at birth, and the doctor had issued a certificate to that effect. Careful treatment, however, brought signs of life in the newborn child, who was soon a healthy baby.

But the father, overjoyed at his little daughter's recovery, forgot to cancel the first certificate at the registrar's and now she has had to postpone her wedding until she can produce witnesses to testify that she is the same person as the small baby whose life was not saved until twenty-four hours after her death had been registered.

As the case must go through the Civil Tribunal of Ravenna, she will have to wait several months before getting her birth certificate.

Both the "Snipers" retrieved their reputations on Thursday last when the Married men opposed those less (un)fortunate in a shooting match, the former winning by the very narrow margin of two points. At first "Sniper" Cooper - the first man on the field for the Married 'Uns - fared badly in opposition to his doughty opponent "Sniper" Pike who returned with 98. But he who laughs last laughs longest so they say and when "sniper" Cooper so courageously fill the breach at the critical moment, it was his turn to show that his reputation was as good as ever it was. The Married 'Uns were a man short and though he had made but 83 Bill Cooper lay down determined to get the necessary 88 or more to uphold the honour of the side - and he did it too with one to spare.

NEW BRITISH EFFORT

ON WATER SPEED RECORD.

Entirely new principles of speed-boat construction have been introduced in "Miss Britain III" which has been built secretly at Hythe and which will be shipped next week for America. In her, next month, Mr. Hubert Scott Paine hopes to challenge Gar Wood's "Miss America III" for the British International Trophy on Lake St. Clair, Detroit.

The new speed-boat is built of steel and resembles the fuselage of the Schneider Trophy seaplane and the driver and mechanic sit in a small cock-pit.

Since the boat was completed a week ago secret speed trials have realised over 100 miles an hour. When at full speed it rises well clear of the water but at rest it has only two inches clearance.

The boat, which has cost £22,000, is equipped with only one Napier engine but it has the lowest weight per horse-power of any similar craft ever produced, being able to develop 1,375 h.p..

IS GERMANY VIOLATING

THE 4-POWER PACT ?

The distribution of leaflets from German aeroplanes flying over Austria, inciting the Austrian population against their own Government, and broadcast talks which have been delivered from South German stations appealing to the Austrians to support the Nazis in Austria, has created a situation which is under the consideration of the Governments of France, Italy and Great Britain in the light of Article 80 of the Treaty of Versailles and the Preamble of the Four-Power Pact.

By Article 80 Germany "acknowledges and will respect strictly the independence of Austria within the frontiers which may be fixed in the Treaty" and undertakes that this independence shall be unalienable except with the consent of the Council of the League of Nations.

The Preamble of the Four-Power Pact reads that the signatory Governments have expressed the conviction that any state of disquiet which obtained throughout the world could only be dissipated by re-inforcing their solidarity in such a way as to strengthen the confidence of Europe.

In response to requests, the Austrian Government have furnished the British, French and Italian Ministers in Vienna with the details relative to these incidents but did not couple this information with the request for intervention.

TRADE .

Britain Up - U.S.A. Down.

According to a message from London on Wednesday, Britain is overcoming the American competition in the Empire and Europe and while the United States exports have been halved during each of the past two years, Britain has increased her exports. Spain, The Netherlands, Portugal and Sweden have been among Britain's heavy buyers.

American manufacturers are reported to be planning a spectacular propaganda car tour throughout Spain in an effort to stem their trade loss for there Britain's orders have multiplied twelve times during the past two years and are still increasing while the United States exports are now only a fraction of their previous figures.

Simultaneously the Swedish Air Ministry has decided to adopt British aeroplanes for military purposes in the future, primarily as a consequence of the numerous recent fatal accidents. Haker Osprey and Hawker Hart are the machines chosen and technical experts are proceeding to Sweden to supervise their construction.

A Reuter's message from Lisbon states that the Portuguese purchased British anti-aircraft batteries are proving completely successful and are in operation in the army who are developing great proficiency.

PREVENTING U.S.A. PROFITEERING.

According to a message from Washington drastic steps are projected by the Recovery Administrators to preclude the possibility of profiteering, including the publication of the Government's view of the fair retail price bulletins which are first to be limited to bread, milk, meat and other food-stuffs, with the inclusion of textiles and clothing later.

HEAT WAVE STATISTICS.

World-wide reports have been received of the remarkable heat-wave weather being experienced in the northern hemisphere with devastating fires breaking out in Portugal and France. The temperature in Spain has been as high as 107.

Over one hundred and fifty heat-deaths occurred in the United States on Thursday, there being thirty-two in New York Alone.

Over Great Britain the hot and oppressive conditions continue and these are not anticipated to break before Sunday. The night temperature on Wednesday created a record for August 1st to 10th since 1871. Meteorological experts indicate the likelihood of Bank-Holiday warmth reaching a new record.

NO. 3 WIN THE SHIELD.

Sunday's Decisive Game.

Considerable speculation was rife before the match on Sunday as to who would be the champions this season and though No. 2 Platoon had a considerable backing among the public in view of their great effort during the season to shake off the 'stigma' of their efforts in previous years, No. 3 were the favourites particularly since they had a match in hand. Now, however, if No. 1 Platoon come up to scratch next Sunday and scrape a victory over the Champions No. 2 will find themselves again at the bottom of the League on goal average.

It was a pity that No. 2 did not take full advantage of their opportunities in the first half on Sunday when they had the strong wind in their favour. They should have had at least three if not four goals by half time and with such a lead it would have been very difficult to tell whether their opponents could have prevailed or not. On the other hand it must be admitted that No. 3 missed at least two glorious sitters in the first half and so had neither side lost their opportunities the result might have been just the same. The winners certainly deserved their victory. Their team work was far superior and their dash was most effective. The defence was particularly good, and special mention must be made of Pettersson's play at back. He did a great deal to nullify Pike's work. The last-named with S. Atkins were No. 2's best men.

At half time the score stood at 1 - 1 and at that time it was obvious that nothing short of a miracle could give No. 2 the victory. In the second half, with the wind just as strong No. 3 walked away with the game, piling on five more goals before the final whistle went. Pike scored No. 2's goal while Beardmore and White obtained 3 each for the winners.

The teams were : No. 3 Platoon - D. Peck; J. Pettersson & D. Atkins; T. Evans, D. Fleuret & G. Pearson; M. Hardy, F. White, A.I. Fleuret, A.W. Beardmore & W.J. Grierson.
No. 2 Platoon - M.G. Creece; A. Shackel & W. Summers; G. Skill- ing, D. Wallen & J. Gleadell; J. Jennings, O. Pike, D. O'Sullivan, S. Atkins & P. Hardy. Referee - Mr. J.D. Creamer.

The goal scorers to date are :- No. 1 Platoon H. Thomas (3), L. Sedgwick (2), C. Clifton (2), F. O'Sullivan, L. Aldridge, C. Allen & R. Campbell. No. 2 Platoon J. Jennings (4), D. O'Sullivan (3), S. Atkins (2), P. Hardy, O. Pike (2) & D. Williams (own goal.) No. 3 Platoon A.W. Beardmore (7), F. White (6), E. Pettersson (3), W. Grierson (3), A.I. Fleuret (2), F. Thompson & Pedersen (own goal.)

IRISH GOVERNMENT "PANIC."

According to the Daily Telegraph correspondent in Dublin an extraordinary position prevails in the Irish Free State due, it is alleged, to what is described as the "panic action" of the de Valera Government.

This state of affairs is the result of a fear rumouring a coup d'etat by General O'Duffy's Blue Shirts.

Troops with fixed bayonets are guarding the gates of the Government's headquarters with additional uniformed police and detectives strengthened by at least fifty armed members of the newly recruited Defence Corps.

O'Duffy, who is a patriot and formerly a remarkably efficient Police Chief dismissed without cause, states that the Blue Shirts are a peaceful body of men.

BRITAIN & IRELAND.

According to a message from Dublin rumours persist in spite of an official denial that negotiations are proceeding for terminating the economic war between the Irish Free State and the United Kingdom.

The South African Minister of Finance, Havenga, lunched with de Valera and other members of the Free State administration at the Government buildings on Saturday last and this lends weight to the rumours in view of General Smuts' earlier interests.

Simultaneously the Free State Government announces the formation of a new armed force to guard the Government buildings, particularly Leinster House.

STANLEY'S NEW ROAD.

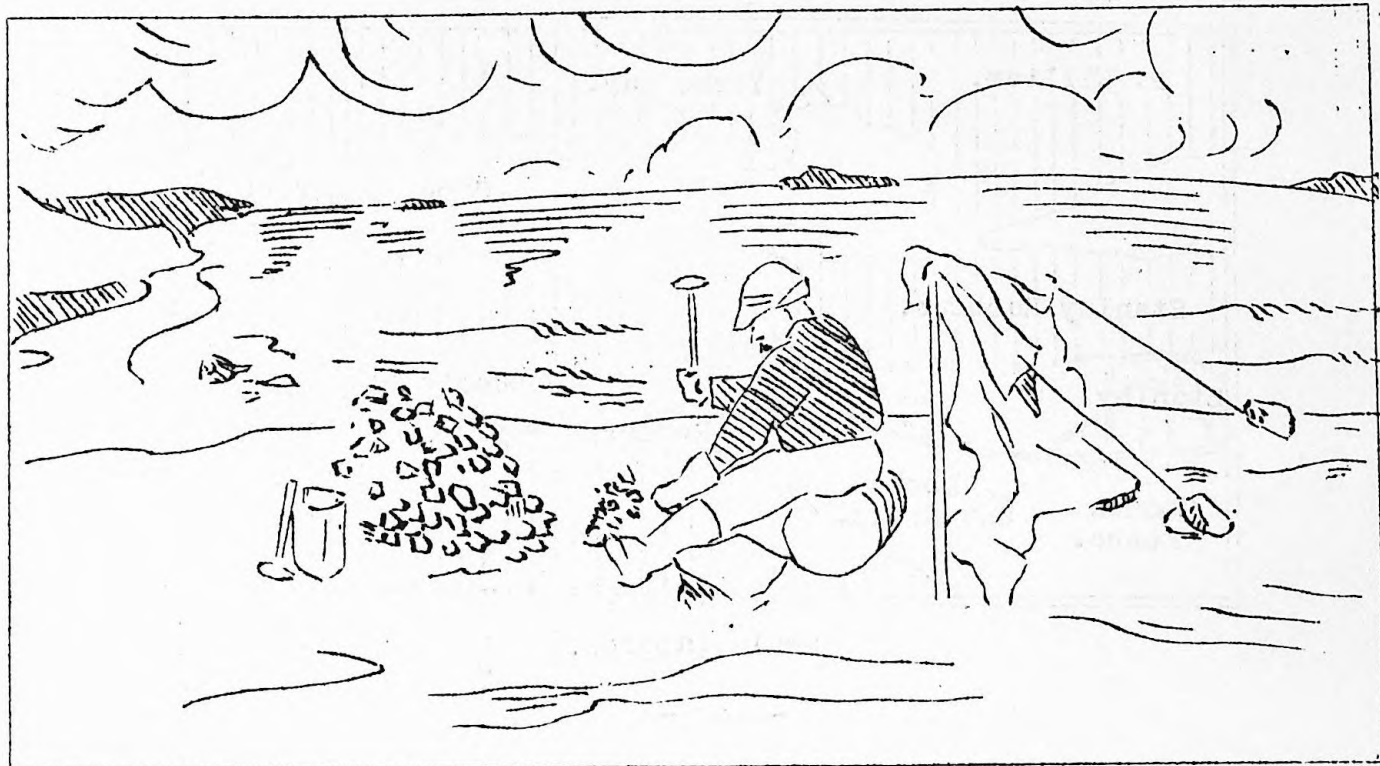

To Rookery Bay & The Peat Bogs.
Nearing Completion.

On Monday, 17th July last, the two sections of the new road stretching from Stanley to Rookery Bay met, thus completing the first and most difficult part of a project undertaken by the Public Works Department, with the dual object of opening up the peat banks on that side of the town and providing work for a large number of men.

Originally the road was intended to go to Surf Bay, north of Hooker's Point, but in combining utility with the means of providing employment, the direction was changed to Rookery Bay, south of Hooker's Point, whereby it passes close to the new peat fields which are capable of yielding some 500,000 cubic yards - the equivalent of a twelve years' supply - for the inhabitants of Stanley. Further, the road makes it possible for the fuel to be transported easily and quickly instead of by tedious carting over rough tracks in some cases two or three miles from the town.

(continued over -

The Road itself is a continuation of Davis Street and goes directly to the bogs. On the right, through the Common Gate, it passes the remains of the "Look Out Rocks" which have been practically demolished for the purpose of providing a mattress. In past days pilots used to shelter under these rocks whilst watching for sailing ships - and then race to their boats in order to secure pilotage, and from this it can be seen that an exceptional view of the vicinity of the Town, the Harbour, Port William and the South Shore is obtainable there.

Breaking Pebbles on Rookery Bay Beach for the Road. Wolf Rocks, Hooker's Point (left) & Rookery Point (right) are to be seen in the sketch.

Moving eastwards the road dips to the south of the extreme edge of the Wickham Heights before passing the peat bogs where has been achieved a piece of construction work reflecting great credit on the Hon. G. Roberts (Director of Public Works) and those associated with him. Leaving the Old Wireless Station to the left, the new "artery" suddenly opens out into Rookery Bay and here, one cannot but pause for a moment with an exclamation of pleasant surprise at the vista brought to view. On a sunny day - and may there be plenty - the Bay should prove a veritable paradise for children with its sandy beach where romps can be enjoyed with perfect safety. Pic-nic parties could find no better spot. Cyclists, motor-cyclists and motorists will also be able to enjoy a quick run out with the added pleasure of a delightful ride.

There is no doubt that a haven so close to hand and gained without the toil of trudging over camp pitted with bogs and strewn with boulders, should do much towards improving the amenities of the Town.

Opposite the spot where the road joins the beach the Wolf Rock stands out conspicuously from the sea - an arresting warning of the dangers besetting the coast and where, twenty-five years ago,

the disabled barque "Kirk Hill" foundered. To the left the bay is sheltered by Hooker's Point and to the right by Rookery Point.

Commenced simultaneously at the beach end and by the "Look Out Rocks" the undertaking has, from the very first, been beset with difficulties owing to the route having to pass over long stretches of peat varying from two to fifteen feet in depth. Where-ever possible the deeper bogs were avoided by diversion. But where this was impracticable or impossible a raft of timber, strengthened with strong guage wire-netting, was made upon which was placed the rock mattress. This method of construction has been adopted over a distance of some 250 yards forming a sure foundation for a road which otherwise would have been threatened with peat slipping and causing continual obstruction. A conspicuous example of this danger - now obviated - was experienced at the cutting where the road turns south, $1\frac{1}{4}$ miles along. Some forty tons of black peaty substance subsided on to the track, burying it completely and necessitating a drastic diversion, the re-layed track having a raft foundation.

One third of the distance has been completed while the other two-thirds need surfacing. It is hoped that the road will be serviceable for traffic by summer time.

Facts & Figures.

From the Common Gate to Rookery Bay the road is $2\frac{1}{2}$ miles long and in its construction 11,800 tons of clay and peat have been excavated in addition to 2,450 cubic yards of serviceable peat; 3,500 tons of rock used for mattress, and up to the present some 1,950 tons of shingle from the beach at Rookery Bay have been cleared and broken up for surfacing. Besides this 250 yards of timber rafting has been requisitioned for a foundation through peat swamp.

Altogether Stanley and its immediate neighbourhood can now boast of practically $14\frac{1}{2}$ miles of road-way as compared with $5\frac{1}{2}$ miles in 1928. This is made up of the Rookery Bay Road ($2\frac{1}{2}$ miles,) the North Camp Road (3 miles,) the Sappers' Hill Road (3 miles,) and six miles of road in Stanley itself.

THE LOOK OUT ROCKS.

"Old Stager's" Reminiscences.

To, The Editor of the "Penguin,"
Sir,

In your article on the Rookery Bay Road in the "Penguin" on Thursday last, you make mention of the Look Out Rocks being demolished in its construction. These particular rocks, you will be interested to learn, acquired the name only in recent years through confusion with the original "Look Out Rocks" situated to the westward of the old stone house now occupied by Mr. Sylvester Barnes. The use made of the rocks is also somewhat different to that given in your account.

For many years in the past keen competition existed between the Falkland Islands Company and Messrs. Dean & Sons for the trade of ships calling at Stanley for stores or repairs. And when a vessel hove in sight the rival firms sent out post haste to it a six-car gig with a representative of the company on board, and a great race would ensue. Generally the first gig reaching the vessel would obtain the trade. Sometimes the gigs would be weather bound for perhaps two days and an anxious time followed for the relatives and friends in town while they rested in Sparrow Cove or elsewhere on the lee-side of the shore waiting for the high seas to abate.

The Look Out Rocks were used as a point of vantage by the store-keepers in ascertaining the business of the approaching ship; whether it was just a passing passenger vessel or whether it was a barque hoving to with shortened sail preparatory to making for port. On receiving news that one was in sight they quickly went up to investigate. Hardly a day passed but some sail or other was to be seen and the first person to go down and tell the store-keepers - generally one of the boys playing on the hills - used to get a small bottle of sweets or some other "prize" for his pains. I, myself, early one morning many years ago obtained a bottle from each of the store-keepers when I was lucky enough to see a ship

close in to the Wolf Rocks when nobody else was about.

The Pilot - there was only one - kept a "look-out" from a hut at the top of Flagstaff Hill. In later years a flagstaff with a crow's-nest was erected there for his convenience but both the staff and the crow's-nest have now disappeared leaving posterity to remember them only by the familiar name of the hill.

I am, yours faithfully,

"Old Stager."

"EMPRESS OF BRITAIN" RECORD.

By crossing the Atlantic this week from Father Point in the St. Lawrence River, to Cherbourg, in four days, seven hours and thirty-two minutes, at an average speed of 24.93 knots, the Canadian Pacific liner "Empress of Britain" has set up a new record for the Canadian service, beating her own record in 1926 by twenty-six minutes.

THE ANTI AUSTRIA CAMPAIGN.

Hope is expressed in Vienna that the further broadcast speech attacking the Austrian Government which was delivered on Thursday night by Theodore Habicht from the Munich Broadcasting Station, marks the end of the series and that it was given before the undertaking by Chancellor Hitler had had time to take effect in the issue of instructions from Berlin.

It is stated in Rome that it is absolutely necessary to close these incidents in order to establish the desired return to normality in the relations between Berlin and Vienna. This has been warmly endorsed and in view of the assurances given by the German Government to the Italian Ambassador in Berlin that propaganda by means of wireless and aeroplane incursion will be prohibited, it is emphasised that the German Government must be credited with the intention of carrying out its promise.

There is, therefore, disinclination in London to attach, at this stage, excessive importance to such a single incident as Habicht's speech. The French Ambassador called at the Foreign Office Thursday afternoon.

THE ANGLO-JAPANESE CONFERENCE.

The Daily Telegraph correspondent at Tokio reports that the selection of art silk delegates for the London Conference is being held up by continual objections by influential members in the trade in Japan who insist that talk on an agreement is futile unless the Germans, the Italians and the Dutch are approached.

A confused situation may entail a modification of the acceptance of the Runciman Note on the subject.

GERMAN "CULTURE".

According to a report from Berlin the Prussian Minister for Culture has decreed that from now onwards teachers and scholars in Prussian schools must greet one another with the Hitler salute, that is, by raising the right arm.

It is now expected that every German, whether belonging to the National Socialist party or not, will use this form of greeting as a symbol of sympathy with the New Germany.

Defence Force Win The Rubber.

The Town Club caught a bad cold when they opposed the Defence Force B.C. in the Drill Hall on Saturday afternoon. The match was the final of a rubber in which each side had obtained one win. The spin of the coin decided the "scene of action" and the Force in winning made no mistake as to what the end should be, although it must be admitted that the Town Club were not up to their usual form. Though the end was conclusive some of the games were won by the margin of a single point and some excellent rallies were witnessed. The detailed scores were as over the visitors being shown first :

L.F. Hodgson & T.D. Evans lost to W.M. Allan & C. Henriksen 9 - 15, beat W. Aldridge & G.L. Pallini 15 - 14, beat L. Aldridge & R. Campbell 15 - 14.
 J.D. Creamer & H. Thomas 1st to Messrs. Allan & Henriksen 12 - 15, lost to Messrs. W. Aldridge & Pallini 14 - 15, beat Messrs. L. Aldridge & Campbell 15 - 7.
 S. Miller & W.D.A. Jones lost to Messrs. Allan & Henriksen 0 - 15, lost to Messrs. W. Aldridge & Pallini 0 - 15, lost to Messrs. L. Aldridge & Campbell 12 - 15.

SUNDAY'S THRILLING GAME.

No. 3 Platoon well merited their win against No. 1 Platoon yesterday for at half time they were losing 3 - 1 but through the complete collapse of their opponents in the second half they put on four more goals and won comfortably. For the first thirty minutes of the game No. 1 carried everything before them. Their passing was almost perfect and they took their opportunities but later in the game they had completely lost control of the situation and towards the end it was merely a matter of kicking at goal; and but for erratic work by No. 3's forwards and some fine saves by J. Peck in No. 1's goal the score might have been considerably higher. No. 1 Platoon were extremely unfortunate in losing the services of L. Aldridge within a quarter of an hour after the start and with a depleted side the pressure of their opponents and the fast nature of the game exhausted them. There was some excellent team work and individual play on both sides and it would be invidious to single out any one in particular except in the case of the two sparkling goals scored by Beardmore for No. 3 which were obtained with headers from two magnificent passes by Grierson on the left wing.

It was hard luck for No. 1 who put up a good display but there was no doubt that No. 3 showed themselves to be undoubtedly "Gock of the Walk" and they thoroughly deserve their position. The teams were : - No. 3 Platoon - D. Peck; J. Pettersson & D. Atkins; T. Evans, D. Fleuret & G. Pearson; E. Pettersson, F. White, A.I. Fleuret, A.W. Beardmore & W.J. Grierson. No. 1 Platoon : J. Peck; E. Biggs & B. Fleuret; A. Etheridge, F. O'Sullivan & W.J. Halliday; W. Spencer, D. Williams, H. Thomas, L. Aldridge & C. Clifton.

The goals were scored by A.W. Beardmore (2), A.I. Fleuret & F. White and E. Biggs (into own goal) for No. 3; H. Thomas (2) and W. Spencer for No. 1.

Goal scorers for the season are :- No. 1 : H. Thomas (5), L. Sedgwick (2), G. Clifton (2), F. O'Sullivan, L. Aldridge, C. Allan & R. Campbell; No. 2 : J. Jennings (4), D. O'Sullivan (3), S. Atkins (2), G. Pike (2), P. Hardy & D. Williams (own goal); No. 3 : A.W. Beardmore (9), F. White (7), E. Pettersson (3), W. Grierson (3), A.I. Fleuret (3), F. Thompson, Pedersen (own goal) & E. Biggs (own goal.)

SNOOKER.

The final of the Defence Force Snooker Handicap was played off on Saturday night and won after a close game by D. Atkins whose opponent was Mr. J. McAtasney. The winner was consistently good but was two points down up to the moment he potted the black thereby obtaining a lead of 5 over his opponent.

The final score was D. Atkins 42, Mr. J. McAtasney 37. The latter made several fine shots and when he potted the pink with a very tricky stroke he was loudly applauded.

At the peril of his neck, so he says, our "artist" managed to secure caricatures of the players : above is one of D. Atkins, the winner, and on the left one of Mr. J. McAtasney, runner-up.

SHIPPING MOVE IN GERMANY.

A London message states that further information is awaited with regard to the position of foreign shipping companies in Germany in the light of the German Foreign Exchange Control Department's new order.

The Berlin press reports that the State order will be rigidly interpreted and in consequence passages by foreign vessels would be, in future, booked to Germans only up to the sum of 300 marks which is the maximum amount to be exported without express authorisation.

It is added that such authorisation would be with-held unless the applicant showed good reason for travelling by a foreign vessel. The order also applies to foreigners who may book passages in a foreign vessel only if they import money for the fares.

The possibility of representations being made by the British Government under the Anglo-German Treaty of 1924, if these discriminatory measures are put into effect, is discussed by the newspapers, but the matter has not yet been raised officially and hopes are entertained that negotiations between the shipping companies may result in a modification of the order.

CIVIL DISOBEDIENCE SENTENCES.

Official figures published at Simla show that the number of persons in prison for civil disobedience activities at the end of June was 6,915, representing a reduction of 75 per cent compared with the total at the end of June 1932.

Owing to the expiry of sentences or because detention was no longer considered necessary, about half of the political prisoners in the north-west frontier provinces have been released since the end of June.

AUSTRO-GERMAN CLASHES.

An Innsbruck message states that there is no confirmation obtainable concerning the German report that Governor Weiart Hemberg was fired on by the Austrian Heimwehr when he accidentally crossed the frontier two or three days ago.

But a serious clash is reported near Klobenstein on the Austro-Bavarian frontier where a party of Bavarians crossed the frontier and fired on three Austrian gendarmes who were resting off duty. The Austrians returned fire and the Bavarians retreated with, it is believed, several of their number wounded.

A further message states that Bavarians are reported to have fired on Austrian gendarmes guarding an ammunition dump but nobody was wounded.

NEW CUBAN PRESIDENT.

Debts To U.S.A.

A message from Havana on Sunday stated that a salute of twenty-one guns fired from a Cuban fortress signalled the approval of the Cuban Army to the appointment of Cespedes as the provisional President that day.

The downfall of the Machado regime was celebrated by a wild crowd who sacked the presidential palace, killing at least five members of the Secret Police. Soldiers and sailors stationed at the palace made futile efforts to restrain the excesses of the mob which stripped the palace grounds of trees and flowers.

Meanwhile Machado is believed to be on his country estate outside the capital where he is heavily guarded.

All communication with the interior has been cut off and the General Staff has ordered the army to patrol the streets in an effort to maintain order.

Cespedes position is not yet legalised as the Congress has first to pass Machado's petition for leave of absence.

According to a report from New York while President Roosevelt is awaiting the reply to his demand for the cessation of political warfare in Cuba, the United States proposals for a "new deal" for the Island are approaching completion.

It is understood that they include a sweeping revision of Cuba's internal and external debts with a view to reducing taxation besides obtaining a reciprocal tariff and a quota limiting Cuba's sugar exports to American markets 1,750,000 tons annually.

COMBING GERMAN COMMUNISTS.

Extensive arrests of communists in several parts of Germany over the week-end has been reported from Berlin.

All cars, lorries, motor-cycles, milk and vegetable carts entering or leaving Berlin have been searched by Nazi Storm-troopers under the instruction of the Secret Police. In addition a strong force has been searching the streets for distributors of communistic leaflets. Three communists have been caught in the act of posting anti-Nazi posters, their capture being effected after a chase.

The discovery of a communist headquarters is reported from Essen where the police, in the course of a ten days' drive, have also made 200 arrests.

A similar drive is understood to have taken place at Baden.

GET YOUR CAMERA READY FOR SUMMER :- With the approach of summer, cameras which have been put away during the winter months should be brought out and carefully tested and dusted. Use a soft haired brush and pay particular attention to the lens, and the corners of the view finders. The velvet used to protect the face of the film in winding should also receive attention as any dust or grit in this means scratched negatives. If your camera has rollers instead of velvet see that these are not jammed at all as this also will cause scratches.

Remember, you must take care of your camera to get the best results. Another help is to use good materials. You cannot get first class results with second class films and developer.

KODAK VERICHROME FILM is the best film obtainable and can be used with confidence.

DEPOSED CUBAN PRESIDENT'S ESCAPE.

The Daily Telegraph correspondent in New York states that General Machado, the deposed Cuban President, escaped on Saturday in the nick of time by plane from Havana, and landed on the British island of Nassau, West Indies.

According to some reports he has deposits in the Bank of England amounting to £100,000 and is expected to visit Europe shortly.

Dr. de Cespedes, who is the son of the Island's first President known as Cuba's George Washington, formally became President on Sunday. He has been Minister at London, Paris and Washington. He is popular with all parties and will hold office until the next presidential election in November, 1934, when he will probably be succeeded by Colonel Mendieta.

A rumour is current that Machado was forced down and captured by Cuban aviators.

But the news of Machado's landing at Nassau has brought to an end in Havana twenty-four hours of the fiercest rioting Cuba has ever known. At least fifty people have been killed with nearly 300 seriously injured. The damage is estimated at nearly 2½ million dollars.

It was only when Machado found the army against him that he finally decided to go. Tyrannous and despotic as his regime has been, he showed undeniable courage on Saturday. For when the army told him to go or be bombed out he went to the barracks and confronted them. At the aerodrome he was refused a plane until he produced a War Department permit which took ninety minutes to obtain.

During this time Machado was the only member of his party who remained calm, the others being hysterical. Meanwhile the news of his dash to the air-port leaked out and an infuriated crowd arrived as the plane took off.

MIGRATION MEASURES.

At Montreal on Monday a new migration drive from Great Britain to Canada was urged by the Canadian Pacific Railway President, Mr. Beatty, who stated that the time was now opportune for the Dominion to engage upon a "definite policy of immigration, particularly from Great Britain."

Stressing the paucity of the population, Canada's greatest drawback, Mr. Beatty said that he did not think there was anything to fear from a deliberate but not extreme policy of admission of one's own race and results might be expected from the plans which were now being worked out in the United Kingdom on inter-Empire emigration.

From Melbourne it is announced that a settlement has been reached in connection with the grievances of British migrants to Australia and arrangements are being made for immediate cash payments with arbitration machinery in questionable cases.

It is understood that the British Government is satisfied with the settlement.

HOME TREASURY RETURNS.

The latest Treasury Returns, a British Official Press message on Tuesday stated, show that the total ordinary revenue for the current financial year up to the 13th of August, amounted to £207,662,091. At the corresponding date last year the amount stood at £201,036,870.

The ordinary expenditure to date for the current year totalled £255,571,093 which is £33,000,000 less than the total ordinary expenditure at the corresponding date of last year.

BANDIT MEASURES.

A report from Harbin states that in view of the prevalence of banditry, the Manchurian authorities supported by the Japanese, are planning comprehensive and radical measures for safety.

It has become known that one Japanese and one White Russian who were fishing on the Sungari River right in the heart of the city of Harbin, were shot dead on Sunday. The perpetrators are still at large.

SHIP OWNER'S WILL.

Probate has been granted of the will of Sir John Ellerman, the ship-owner, who died at Dieppe on the 16th of July last.

The will is a remarkable document of twenty-six pages with a special index and in it detailed arrangements for the disposition of his enormous fortune are made.

Although the estate has been proved at £17,224,425 so far as can be at present ascertained, it is considered likely that the entire estate, including Ellerman's holdings in commercial undertakings which have not yet been valued for probate, will approach £30,000,000.

The testator has provided more or less liquid resources to the value of £6,000,000 for immediate payment on account of estate duties. A large number of bequests include legacies to officers and others in the employ of shipping companies with which Ellerman was connected.

S.S. LAFONIA
ON THE FLOATING DOCK.

During the latter part of last week the s.s. Lafonia was to be seen in a new setting & in it presented a spectacle that in future will not be foreign to the eyes of the folk in Stanley. She was high and dry in the Company's floating dock for the first time.

Originally intended for taking the s.s. Falkland and other vessels, the dock was enlarged so as to accommodate the s.s. Lafonia & this vessel

is the third that has now made use of it, the oil tanker C.C. 82 and the Afterglow having already done so. The approximate lifting capacity of the dock is some 750 tons and the Lafonia is about the maximum weight of vessel which can be carried.

The task was undertaken on Thursday last when the Hon. L.W.H. Young (Manager of the Falkland Islands Company) and the Hon. G.J. Felton watched the proceedings which were supervised by Mr. J.M. Thomson, the Company's Engineer, with Captain D.W. Roberts in command of the Lafonia.

A calm sea and bright weather augured well for the venture and in the morning the inlet valves of the dock were opened to admit water to the various compartments of the four pontoons. At noon, when the structure was fully submerged and the valves closed, the Lafonia was offered. Fifteen minutes later, with the vessel set, the discharge valves were opened and the pumps were put into action operated by Diesel engines, the whole process terminating about 3.0 p.m. when the ship lay snug and secure - an imposing sight out of the water. Throughout Friday workmen scraped, cleaned and painted below the water-line and on Saturday with the dock submerged again, the Lafonia steamed clear about 3.30 in the afternoon.

IRISH SECRECY.

A message from Dublin announces that the closest secrecy is being observed as to the Free State Executive Council's decisions connected with the present situation, but it is generally assumed that a military tribunal is being set up almost immediately under which unrestricted penalties will be possible with no appeal.

At the request of the religious authorities General O'Duffy cancelled his Blue-shirt parades at the churches for this coming Sunday, instead of which meetings will be held and a message read. The tension remains unbroken, giving rise to rumours that O'Duffy has been shot at, but these, however, have been proved to be false.

An amusing aspect has been introduced by the Government order for the removal from the entrance of Leinster House, where the Dail sits, of Queen Victoria's statue, but the vase is being retained for use for another monument at some later date.

JAPAN'S "WAR TO THE HILT."

A message from Tokio states that the Japanese Cabinet has formally appointed delegates to go to Simla for the Textile Conference but the "Osaka" reports that the industrialists in Japan opine that the negotiations with Simla and London will be mostly useless, because they assert that Britain has frankly shown she intends barring Japan from the British controlled markets and retaliation by "war to the hilt" is the only possible answer.

With the powerful weapon of low prices, the Japanese mills are determined that Lancashire shall not regain the dominant export position.

The Manchester Chamber of Commerce, in telegraphing to the Bombay Mill Owners' Association, dwells on the desirability of using the opportunity presented by the Conference to cultivate the Anglo-Indian understanding with a view to future co-operation.

GERMAN VICTIM OF JEW.

A twenty-three-year-old Jewish student of medicine, named Blumenstein, was arrested in London on Tuesday for attempting to murder a German lady in Hyde Park. As far as can be ascertained up to the moment the sole cause of the outrage was because of the victim's nationality.

Blumenstein declared on being arrested that he committed the outrage because his victim was a German.

The assailant was brought before the police court but the proceedings were adjourned a week in order to give the doctors an opportunity of examining Blumenstein's state of mind for he is now attempting to pose as insane.

Blumenstein's victim, whose name is not disclosed, was seriously injured and is now in hospital.

Mr. Ramsay MacDonald, the Prime Minister, left Loughborough on Wednesday afternoon and was due to arrive at London early yesterday morning by rail. He was then expected to consult his departmental heads and deal with certain State matters before leaving for Scotland again to resume his holiday at the end of the week.

---o---o---

BRITISH TRADE.

The Board of Trade Journal states that in the current year there has been a slow but steady expansion in the value of the United Kingdom exports and, having regard to the decline in the average value of exported goods, it is probable that for May and June, as well as for July, the volume of shipments exceeded those of the corresponding months of last year.

Though the volume of retained imports is normally much smaller in summer than in the early months of the year, there has been a tendency this year for the retained imports also to increase in volume, this being mainly due to raw materials.

Regarding the distribution of overseas trade it is stated that the imports into the United Kingdom from British countries, in the first six months of 1933 were valued at 38.78 per cent of the total imports from all sources, as compared with 36.23 per cent and 31.36 per cent in the corresponding periods of 1932 and 1924 respectively.

Exports of United Kingdom produce to British countries accounted for 44.12 per cent of the total value of shipments to all destinations as against 44.82 per cent, and 40.71 per cent, respectively.

It is added that the slight decline from 1932 was much more than accounted for by the smaller purchases this year by the Irish Free State.

---o---o---

GANDHI.

According to a message from London, Gandhi, who is serving a year's sentence in Funa Prison, made another attempt on Wednesday afternoon at a death-fast, but abandoned the fast when the authorities gave him permission to continue his labours on behalf of the untouchables.

Gandhi, at the beginning of his sentence, was deprived of all the privileges he enjoyed the last term.

He sent the prison warden an ultimatum that he would enter into a hunger strike if he was not permitted to take charge of the interests of the untouchables.

The authorities agreed on condition that Gandhi, in his campaign for the rights of pariahs would keep away from politics.

Gandhi refused to compromise and at once started a death fast. In view of this turn of events the authorities yielded and allowed Gandhi to carry on his campaign on certain conditions however not yet made known to him.

497 Articles In Man's Stomach. :

Diet Of Nails and Live Bullet.

Discovered in the stomach of a patient during an operation at the County Mental Hospital, Upton, near Chester, an amazing array of 497 articles, weighing altogether 3½ lb., were on view at the inquest, a Dail Mail report states.

It was revealed by the police that the extraordinary diet of the victim, Frederick Vincent Edwards, aged 28, a farmer, of Riddings, Wybunbury, near Crewe, included :-

200 nails, from half an inch to 4½ inches long, 36 staples, 35 gramophone needles, 4 pennies, 2 halfpennies, a shilling, 6 brace buckles, 2 links of beads, 8 teaspoon handles, 3 keys, 1 live revolver bullet, 1 brass tap key, 3 penknives, 2 safety pins, 4 sewing needles, 6 pins, 6 bolts, 5 nuts, 1 button-hook, 2 metal guides for spring bed mattress, 1 alarm clock key, 4 screw-in handles for a sideboard, 1 motor tyre valve, 1 tiepin, 1 gas lamp burner, 2 buttons, 1 watch key, 1 rolled gold ring, 1 pebble stone, 13 pieces of glass and earthenware, 4 collar studs, 5 washers, 9 screws, 7 curtain rings, 1 bicycle valve and 92 miscellaneous articles which were minute and could not be described.

Evidence was given that Edwards had been strange in his manner for about three years, but the family had no suspicion that he was swallowing things.

Dr. H. Grills, medical superintendent of the hospital, declared that Edwards had a delusion that his stomach was too smooth. He was surprised that a man could live with so many articles in his stomach.

WEST INDIES AMALGAMATION QUESTION.

The report of the Commission consisting of General Sir Charles Ferguson, chairman, Sir Charles Orr, and Mr. MacNeill Campbell of the Colonial Office, which has been dealing with the question of a closer union of the Leeward Islands, the Windward Island, Trinidad and Tobago, recommends that the islands forming the Leeward and Windward Islands should be united into one Colony under a Governor with headquarters at St. Lucia.

The report states that whatever advantages may have accrued from the amalgamation of Tobago with Trinidad always the former has been a financial burden to Trinidad since the amalgamation and Trinidad is strongly adverse from embarking upon more experiments in a direction leading to a closer union with other islands.

LONGEST OLD BAILEY TRIAL.

A message from London reports that the Old Bailey's longest trial, lasting thirty-three days, terminated on Saturday with the sentencing of sixteen persons accused of outrages in fire-raising conspiracy and fraud. The judge commented on their "utter recklessness and the appalling danger" of their actions which involved the fate of claims amounting to £270,000 of which £216,000 had been paid.

Justice Humphreys in his summing up spoke for twelve hours and twenty-five minutes. This is believed to be the longest summing up heard in any English court, while there were 100,000 documents dealing with the thirty-two counts in the case.

The aggregate sentences amounted to 199 years penal servitude and 85 of imprisonment. The ringleader Leopold Harris received the maximum of 14 years each on ten counts, two years each on fourteen other counts. The judge described him as a charlatan.

The jury which served throughout without a breakdown and then deliberated for four and a half hours have been exempted serving again for life and at the conclusion of the trial the judge ordered the presentation to the three serving women bouquets of roses and carnations - an unprecedented act in British courts.

IRISH BLUESHIRTS.

A message from Dublin states that the Blueshirts have defied the Government by holding their proposed parades throughout the State but to a late hour on Monday the police had taken no action and no serious disturbances have been reported.

The Civic Guards, the police and de Valera's OGPU have been posted at all the vantage points and are holding the Dublin approaches but the Blueshirts have avoided clashes and have attended in large numbers the scheduled assemblies where O'Duffy's message was read.

According to the Daily Telegraph special correspondent O'Duffy stated "If the Government declare the National Guard unlawful they are guilty of a tyrannous act and the National Guard will neither dissolve nor be driven underground."

In denying election rumours de Valera, addressing a meeting at Thurles, commented on O'Duffy's force. "In ordinary circumstances," he said, "we could laugh at these people, but when methods are adopted which are associated with dictators of other countries the Government thought it was time to cry a halt."

WORLD'S MOST EXCLUSIVE CLUB.

Bear Teeth As Membership Fee.

The Royal and Ancient Game is played in almost every part of the world and Canada's greens are known to every golfing enthusiast. But if a golfer has besides the love of the game a love for the unique, let him hie himself to Chesterfield Inlet, on the northern shore of Hudson's Bay, where the world's most northern links are situated.

His membership fee will be ten polar bear teeth and he will have the honour of being the fifth member, for it is so exclusive that it has a membership of only four - the Church of England missionary, the Roman Catholic missionary, the Hudson Bay Company's factor and his assistant.

The course is still being built and so far three holes have been completed. They are 400, 250 and 350 yards long and are played three times in succession. Bogey for the course is 36.

Tundra moss is used for the fairways, since grass will not grow so far north, while the "greens" are made from hand packed beach sand of which there is an expanse of ten miles near the course.

Incidentally the golfer who does make a visit to Chesterfield Inlet will naturally have an Eskimo boy as caddy. There are four of them at the moment, one for each member, but a fifth can be obtained if necessary.

CUT BY LIGHTNING.

Dead Man's Stud Found Severed.

Remarkable evidence of the action of lightning was given at the inquest at Leytonshire on Ewing Hunter, aged 69, of Wanstead, Essex, recently. He was found dead in an open stretch of Epping Forest.

The doctor said that Hunter was clasping an open umbrella.

The evidence showed that the unfortunate man had been struck by lightning which had burnt and stopped his wrist-watch and had cut his collar stud in two. His boots were also burnt.

A verdict of accidental death was recorded.

GOLF BALL IN SHOE.

Problem For Players In Championship.

A terrific thunderstorm which broke over the Royal Liverpool Golf Course at Hoylake, during the British Amateur Championship produced one freak incident.

Pools of water collected everywhere, and a woman spectator, stepping into one, her shoe filled with water.

She removed the shoe, and was about to tip the water out when a golf ball driven by one of the competitors landed in it.

She did not know what to do. Up came the owner of the ball. He did not know what to do. His partner came up and was equally nonplussed.

Then someone suggested that the owner of the shoe should tip out the water and the ball. She did, and the game went on.

WHEAT CONFERENCE.

There was a full meeting at the Wheat Conference held at Canada House, London, on Wednesday afternoon. The reports of the two sub-committees appointed on Monday were received and considered.

On the basis of the report of the committee dealing with the technical points in the draft agreement, it was agreed that the international wheat price mentioned in paragraph three of the draft agreement should be on a gold basis in relation to the world market average quotation.

A further effort was to have been made yesterday to agree on the average price which shall bring this agreement into force.

After considering the report of the committee set up to consider the conditions and functions of the International Advisory Committee, it was agreed that the proposed committee should be temporary in character and should devote itself to watching over the working and application of the agreements reached and its functions would not extend to supervision of production and trading.

It was agreed that the four principal exporting countries, Australia, Canada, Argentina and the United States, with the U.S.S.R. should be represented and that the Danubian countries should have two representatives.

Importing countries are themselves to decide which of their number shall be represented.

The headquarters of the Committees will be in London.

RECOVERY CAMPAIGN HITCH.

A wireless message from Washington states that credit pools are badly needed to encourage the U.S.A. Recovery Campaign and to provide financial aid for cooperating business concerns, and General Johnson is devising means of making these available.

He is expressing annoyance with the commercial banks which are not rallying to his aid as he expected after the leading New York banks promises.

Inflation enthusiasts interpret General Johnson's actions as meaning that the President will shortly utilise his currency expansion authority, but official circles are making no comment although the effect is being felt in the money market.

Pressure is being brought upon the Treasury to hasten the release of some of the 2,000 million dollars tied up in the closed banks, and the Assistant Secretary of the Treasury states that all the National State Banks which are members of the Federal Reserve System, will be opened for sixty days.

THE WHEAT CONFERENCE.

Without reaching any decision on the international price of wheat necessary to bring the Agreement into force, the Wheat Conference adjourned on Thursday. The Conference is being held at Canada House, London.

The session was devoted to a discussion on the terms of the draft agreement presented last Monday by the exporting countries. An Advisory Committee is to be appointed to watch the working of all agreements reached. The countries chosen to be represented are - France, Germany, Italy, Spain, Switzerland and the United Kingdom besides one Northern European country.

AUSTRIAN HURRICANE.

A storm of extreme violence swept all over Austria on Wednesday night and towards morning rose almost to hurricane strength.

Chimneys were overturned, roofs torn off and thousands of windows were shattered while trees were torn out by the roots and several persons and many farm animals were struck by lightning.

A railway train near Leisung was brought to rest by the storm and the roof of one of the carriages was torn off.

DOLLFUSS & MUSSOLINI MEETING.

France Satisfied.

A message from Paris states that with reference to the Dollfuss-Mussolini meeting at Riccione on the 20th of this month, the French Government is satisfied that Mussolini's sole desire is to collaborate loyally with France and Britain in the Austro-German question and that there is no question of an Italo-Austro-Hungarian bloc.

The plan agreed upon at Riccione for economic help for Austria takes the form of a bi-lateral agreement between Austria, Hungary, Italy and Czecho Slovakia and possibly other of the Danubian States.

IN IRELAND.

It is understood from Dublin that the Government's drastic action in establishing a military tribunal is passing off without serious disturbance, the Blueshirts office remaining open and carrying on with business as usual.

According to the Government's "Irish Press" the National Guard will probably be given a few days grace providing the opportunity to resign.

The general view held is that unless the occasion warrants sterner action, there will be considerable resort to summonses rather than to swift arrests.

General Mulcahy, a member of the Dail, suggests the significance of the Government's action on the eve of the election for which they are preparing was to endeavour to bring about a breakdown of the public spirit and obscure the conditions of the serious issues involved by giving free rein to intimidation, violence and disorder at the polls.

U.S.A. CURRENCY DISCUSSIONS.

The Daily Telegraph correspondent at Hyde Park, New York, states that currency inflation has been the subject of discussions between President Roosevelt, the Secretary to the Treasury (Woodin) and the Budget Director (Douglas,) but it is understood that the President has not altered his position with regard to direct action and is only expected to do so at the last possible moment when it will be sudden to minimise the effect on Wall Street.

Considerable pressure has been brought to bear upon the President recently, to exercise inflationary powers but the fact that the Federal Reserve Banks have launched a new credit campaign in the open market, is interpreted by the administration as adhering to a policy of expansion without debasing currency for the time being.

Within forty-eight hours the Federal Banks had purchased 35 million dollars of Government securities to stimulate further advances in currency prices, this marking the greatest activity since the opening of the campaign in May last, while certain authorities expect the programme to reach 100 million dollars weekly in the near future.

THE SCRAMBLE FOR GOLD.

Great interest has been shown in financial circles during the past few days in view of the fact that Mr. Montague Norman, the Governor of the Bank of England, is due to spend next week in New York where, it is understood, he will meet Mr. Harrison, the Governor of the Federal Reserve Bank.

The scramble for gold goes on merrily, writes the Sunday Times City Editor. On Saturday continental buyers paid 129/4 per ounce for £200,000 of metal, this being the highest price since then end of 1932.

The rise has followed the depreciation of sterling against the gold currencies. The sterling franc dropped from 84 13/32, to 81 31/32 since Monday last week.

The dollar fell sharply on Saturday, the price being 4.62 as compared with 4.48½ a week ago. The fall is being largely helped by continental selling and on inflationary rumours from the United States.

Leading opinion predicts the recovery of the dollar in the near future. On Friday President Roosevelt declared his intention of maintaining the value of the dollar.

THE IRISH CASE.

Further Danger.

For the third successive Sunday the Irish Free State has been faced with the danger of a clash between the Government and the outlawed National Guard.

Anxiety chiefly centred round the district near Cork where Michael Collins lived and where he was ambushed and shot down.

The Blueshirts, who are exceptionally strong in this area, declared their intention on Saturday night of carrying out the customary annual parade in defiance of the ban.

The Government were drafting large police forces to the spot. On previous occasions when he has found himself faced with the police General O'Duffy has accepted his position. This, however, is the heart of the Michael Collins country and it is suggested that even if General O'Duffy were to advise compliance with the ban, the local Blueshirts would fulfil their fanatic declaration and hold the parade.

MONTAGU NORMAN IN AMERICA.

A message from Hyde Park, New York, reports that on Monday Mr. Montagu Norman, the Governor of the Bank of England, and Mr. Harrison, the Governor of the United States Federal Reserve Bank, had tea with the President on the veranda of the latter's summer home and stayed to dinner.

The discussions, learns a Daily Telegraph correspondent, showed that Britain and the United States had similar domestic and economic policies. Both countries desire to increase the price level of commodities in order to bring their income more closely into line with the debt settlement question and both seem to lean towards the inflation of currency as one of the chief methods.

Here the similarity apparently ends for Britain is represented as anxious to bring about stabilisation promptly while America is more concerned with the success of her domestic recovery plan.

It is predicted in New York that Britain will allow the sterling to drop if the dollar falls still lower. The prospects of France soon being forced to "devalorise" the franc are being discussed. If, as anticipated in some quarters in America, the gold block surrenders the way should be made clear for a general stabilisation on a new gold basis all round.

SCHOOLBOY HOWLEPS.

Essay on the banana (by a Japanese schoolboy). The banana are great remarkable fruit. He are constructed in the same architectural style as the honourable sausage. Difference being, skin of sausage are habitually consumed, while it are not adviceable to eat rapping of banana.

Perhaps are also intrissing the following differences between the two objects. Banana are held aloft while consuming, sausage are usually left in reclining position. Banana are first green in culler, then gradual turn yellowish. Sausage start out with indefinit culler (resemble herrier cotta) and retain same hue indeffinitely. Sausage depend on creation upon human being or stuffing machine, while banana are pristine product of honourable mother nature. Both article resemble the other in that neither have pit or colonel of any kind.

In case of sausage both conclusions are attached to other sausages, honourable banana on opposite hand are joined on one end to the stem. other termination are entirely loose.

Finally banana are strictly member of the vagitable kingdom, while affiliation of sausage is often undecided.

SOUTH AFRICAN GOLD BOOM.

Frenzied Dealings.

According to a message from London the recent big rise in the price of gold has led to a fresh boom in South African gold mining shares and Monday's transactions were equal to any of the spectacular booms in the history of the market.

In some cases the prices reached record levels. A slight reaction in the price of gold to 128/8 $\frac{1}{2}$ failed to check the demand for gold shares.

A significant feature is not so much the fresh rise in share prices which have been advancing steadily recently, reports the Daily Telegraph, but the enormous amount of business.

A Reuter message from Johannesburg states that frenzied dealings took place when the Stock Exchange opened on Monday. Gamblers, speculating on a further rise in the price of gold, bought the shares freely but profit-taking limited the rise in prices.

Brokers however, were nervous because the reasons for the rise in the price of gold was unknown and cautious investors who were fearful of some European collapse, sold their holdings.

IN IRELAND.

Great political importance is attached in Dublin to the decision to elect General O'Duffy as quickly as possible the head of all the opposition to the government.

All obstacles to fusion have now been removed, states the Daily Telegraph correspondent, but no official announcement need be expected until the meetings take place this week to confirm it.

Mr. Cosgrave's party, the Cumann Nan Gaedheal, Frank Derrnott's Centre Party and the National Guard are to form a new national party under the leadership of General O'Duffy.

The possibility of an early general election has served to bring home to the opposition the danger of continuing as separate parties.

THE AUSTRIAN ARMY.

The first open breach in the military provisions of the Peace Treaty has been made by Austria with the consent of the Western Powers, a message from Vienna reports.

The War Minister, Vaugoin, has announced that a new army system is being adopted this week. Besides the Federal Army, which continues for the moment on a long service basis, a second army will be established to give its members six months compulsory training. From 8,000 to 10,000 recruits will be called up every half year. It is said that "this can be regarded as the first step towards universal military service."

It is believed that the Austrian Government would like to transform the whole of the present army into a militia on account of the lower cost.

SAMUEL INSULL CASE.

A press message from Athens on Tuesday states that the Court of Appeal has decided that Samuel Insull must be detained pending presentation by the American authorities of documents containing the new indictment.

Mr. Insull stated he was born in England and became an American subject in 1896.

FORMER MILLIONAIRES ON TRIAL.

According to a message from Bremen the trial opened on Tuesday on the former millionaire brokers - Carl and Heinz Lahusen, once the chief proprietors of the North German Wool Concern, the £15,000,000 business whereof collapsed in 1931 and was one of the chief causes of the financial crisis at that time.

The brothers are charged with keeping books disorderly, falsifying the balance sheets and obtaining credit under false pretences from the Danat Bank and other banking houses.

INDUS RIVER FLOODS.

A Reuter item from Calcutta states that the rise in the water of the Indus following the bursting of the Shyok Dam on Saturday last is causing great anxiety.

At Attock Bridge, six hundred miles below, the waters are still rising and are now (Tuesday) 33½ feet above the normal level. It is not, however, expected to reach the 52 feet registered last year when widespread damage was done.

TRAIN CRASHES

INTO MOUNTAIN TORRENT.

A message from New York states that six people were killed and forty injured when one of the Golden State Limited trains plunged into the swollen mountain torrent at Tucumcari, New Mexico on Tuesday. The train was on a journey to Chicago from Los Angeles.

The engine and six coaches fell into the gulch, which had been washed away by the recent heavy rains.

FRENCH FRONTIER FORTIFICATIONS.

According to a message from Paris the Premier, M. Deladier, who has been touring the eastern frontier defences, has stated that, after four years of superhuman labour "these defences are guarded against all surprise."

These French fortifications, states the Daily Telegraph correspondent, run about eight miles within the frontier and are virtually completed through Alsace Lorraine.

In the marshy regions there are facilities for flooding the entire countryside. Elsewhere artificial precipices, absolutely camouflaged, offer complete protection against tanks.

For over sixty miles there is a long uninterrupted series of hidden forts below which, at a depth of 300 feet, strange underground cities have been built with even a railway line capable of transporting troops to any point where they are most needed.

ANOTHER HEAT WAVE IN ENGLAND.

A message from London on Tuesday reported that the heat wave now passing over the country reached 87 degrees in the shade in the city while in Essex it was reported to be as high as 90.

The experts predicted cooler weather for the next few days of the week.

FORD IN TROUBLE.

A Washington message states that President Roosevelt has asked General Johnson for a detailed report on the failure of Henry Ford to enrol under the Motor Industry Code.

Unless Ford signed the Motor Code said General Johnson on Wednesday, he would get no Blue Eagle Badge.

He hinted that the Government, which uses a large number of Ford vans would be reluctant to continue patronising the Ford firm. Ford employees are receiving about 55 cents a day above the Code Minimum but they work a little longer.

Ford's main objection seems to be connected with the policy of "open shop" or the employing of non-union labour.

---0---0---

TRADE REVIVAL PROSPECTS.

A further indication of the revival of trade is contained in the weekly traffic returns of the four railway groups, a message from London reports. These show an aggregate increase of £119,000.

Other encouraging signs are the increased orders received by the Welsh tin-plate trade, the ordering of seven new vessels on the Clyde during the month of August, the re-kindling of three blast furnaces, and the re-opening of the L.M.S. coal dock at Swansea.

RACING CAR CRASH.

A remarkable motoring accident occurred during a practice for to-morrow's Ulster Tourist Trophy Race on the Ards Circuit near Belfast on Wednesday.

A small car driven by Lt. Balmain skidded when travelling at over seventy miles an hour and turned four somersaults, landing on its wheels thirty yards from where the skid began.

Balmain, who was pinned in the driving seat, was unhurt, but his mechanic, named Dunkley, was thrown out and killed.

213th CHORUS FESTIVAL.

"The Three Chorus Festival", one of the oldest and most notable musical events in Britain, which is held in turn each year in the Cathedral of either Gloucester, Worcester or Hereford, will begin its 213th meeting at Hereford Cathedral on Sunday.

Sir Edward Elgar will conduct two of his oratorios "Gerontius" and "The Kingdom" while among the British composers contributing to the programme are Doctor Dyson and Martin Shaw.

---O---O---

SENSATIONAL OUTRAGE.

According to a message from Innsbruck the most sensational outrage committed yet by the Austrian Nazis was the kidnapping on Wednesday of Franz Hofer, the Nazi leader, from Innsbruck Gaol.

Two men in the uniform of the Heimwehr Auxiliary Police arrived at the gaol at 1.0 a.m. with an apparently handcuffed civilian. The warder let the three into his office when he was attacked with chloroform.

The officer on duty was similarly overpowered and another warder too, though the latter managed first to ring the alarm bell.

With Hofer, whom they released from his cell, the three men drove off at full speed up the Brenner Pass.

The police posts fired as they passed and the car was found near the Italian frontier pierced with bullets and bloodstained.

It is believed, says the Daily Telegraph correspondent, that owing to a wounded man they were unable to reach the frontier. Soldiers and bloodhounds are searching every cranny in the mountains.

LORD GREY.

Earlier hopes, encouraged by a more favourable bulletin regarding Lord Grey, were disappointed later on Thursday when it became known that the patient's condition was less satisfactory and that there was a diminution in strength.

On Thursday night it was stated that his condition was extremely serious. It is understood that he is in a state of coma and unable to recognise those attending him.

ELIMINATING THE SLUM EVIL.

A slum clearance scheme, estimated to cost £7,400,000, was on Thursday approved by the Liverpool Corporation Housing Committee. The scheme includes the demolition of 12,742 slum houses and the erection in their place of 15,692 houses to accommodate 40,600 people. The building operations which will extend over several years will alone provide employment for 1,600 men.

The scheme is to be submitted for the approval of the Minister of Health who has called upon all the local authorities affected to produce, by the end of September, five year schemes for the definite elimination of the slum evil.

Many schemes have already been submitted and are receiving the consideration of the Ministry. A few have been judged as not sufficiently drastic and have been returned to the local authorities for prompt amendment.

Numerous progressive boroughs have already freed themselves of the slum evil but in other instances local difficulties have been encountered which are expected to be swept aside in the campaign now being undertaken by the Ministry.

RUSSIAN TIMBER TRADE IN JEOPARDY.

A message from Moscow on Thursday reported that the entire male peasant population of the great northern region of Russia is being mobilised for a month's intensive labour in the timber forests.

An official decree states that the lumber transport is in a "catastrophic condition" and the entire export programme in jeopardy.

The decree orders all members of the Communist Party and the Young Communist League to mobilise the peasantry throughout the entire region for twenty-five days labour, reports the Daily Telegraph correspondent. "Not one log of timber must be left unfloated to the ports."

The same methods are to be used as in February last when the cutters were obliged to work from earliest morning until dark and transport continued day and night.

IRISH GENERAL ELECTION ?

According to reports from Dublin a general election is foreshadowed and important meetings were to have been held in the city yesterday (Friday.)

The definite amalgamation of the opposition forces is almost certain as a result of these meetings and if the amalgamation is decided upon there is every possibility of de Valera appealing to the country.

THE SUNNIEST AUGUST.

A message from London reports that the sunniest August experienced in England this century closed with a total of 249.9 hours of sun-shine. It is second only to the record August of 1899 when the number of hours was 262.

There has been an excess of 168 hours above the normal total for the past three months.

THE LAND OF HIS FATHERS.

Lindberg's Visit.

A Reuter bulletin from Copenhagen on Thursday stated that Colonel and Mrs. Lindberg were received the previous day at Amalienborg Castle by the King and Queen of Denmark.

Later the renowned flier and his wife lunched with the Crown Prince and Princess of Sweden at Sofiero.

This is the first visit Colonel Lindberg has paid to the land of his fathers. His father was born at Stockholm and taken to the United States when he was only one year old.

SPEEDBOAT RIVALS.

Hubert Scott-Paine, a Reuter message from Algonac announces, may have another opponent besides Gar Wood in the first race there to-day (Saturday) when he challenges the American for the Harmsworth Speedboat Trophy.

Mr Horace Dodge of Detroit, the motor magnate, says that if his boat the "Delphine" does ninety miles an hour in her trials he will also enter the race.

---O---O---

THE ESCAPED HOFER.

A warrant was issued in Vienna on Thursday for the arrest of the National-Socialist district leader Hofer and his liberators. It is held that the warrant will save the Austrian authorities the trouble of demanding extradition.

The Italian frontier officials who took charge of the fugitives, made them sign an undertaking to hold themselves at the disposal of the Italian authorities.

Hofer was permitted to visit his parents who are spending a summer holiday at Brixen while Hofer's companions were taken to Boyen by the police.

Hofer's liberators have now been identified as the garage-proprietor Kopper Schickh, his nephew Franz Kollinger and a young chauffeur named Muehlfellner from Halzburg.

Sixteen National-Socialists, including Schickh's book-keeper, Miss Paula Hohensinn, have been arrested in Kufstein on suspicion of being implicated in the affair.

It has been now ascertained the Hofer was carried over the mountains to Italy through the night. Two of his companions are suffering from wounds in the legs from shot fired at the escaping car.

I.L.P. & GERMAN SITUATION.

On Wednesday last week Sir John Simon received a deputation from the Independent Labour Party, headed by Mr. James Maxton M.P.. According to Mr. Maxton the deputation desired to express to the Foreign Secretary the intense feeling among the working class regarding the treatment of certain people and the present regime in Germany.

Mr. Maxton said in an interview to the press afterwards, that the Foreign Secretary assured the deputation that the British Government was watching the happenings in Germany with the closest attention.

G.T.U.C. DENIAL.

Communism & Fascism.

An emphatic repudiation of a dictatorship, whether from the left or the right is contained in the report adopted by the General Trades Union Congress to come before a meeting at Brighton this week.

The report declares that the "Principle of a dictatorship, whether of Communists or Fascists, in each suppresses its opponents ruthlessly."

"The first duty of Trade Unionism is to affirm its adherence to the democratic spirit which has made its existence possible. We should resist any attempt to supercede Parliament or to undermine its democratic working," the report states.

The demand by some trade unionists for a "United front with the Communists and with Fascism" is strongly opposed by the advocates launching a big campaign against Fascism.

NEW RECORDS BY THE LAFONIA.

The s.s. Lafonia arrived at Montevideo at 5.0 a.m. yesterday morning thereby making the best trip on this passage since she was commissioned, her time being three days and twenty-three and a half hours from San Carlos.

In addition the Lafonia has established a new record for a day's run by covering 265 nautical miles in one day, this being on Friday last, while the next day she logged another 260 miles making another record of 525 miles in two successive days.

Her average speed for the voyage was 10.6 knots.

SPECIAL BROADCAST PROGRAMMES.

We congratulate Stanley Studio on having secured, under the recently inaugurated scheme for Empire Broadcasting, two of the series of programmes specially prepared for Empire radio enthusiasts; namely - "Nuts and Wine" to be broadcast on Wednesday (to-morrow) and "Robin Hood, the Sorrowful Knight" to be given in conjunction with the Children's Corner on Saturday.

The programmes, which are of half-an-hour's duration, have been specially prepared on records at Broadcasting House, London, particularly for the benefit of listeners-in like those in the Falklands whose reception at so extreme a distance from the Homeland lends itself to the vicissitudes of atmospheric disturbances and fading. Originally the programmes were broadcast in England and relayed throughout the Empire.

To-morrow we will publish in detail the programme of "Nuts and Wine" and on Saturday the full programme of the Children's Corner will also be published in the "Penguin."

CUTTERS COME IN.

Yesterday saw the arrival of two cutters at Stanley. One the Falkland Island Company's Eileen and the other the Shamrock.

The former came from Speedwell with Mr. H. Halliday as passenger. We understand she is to be laid up to undergo an overhaul and that she will not be returning to the Station until the middle of the month or thereabouts.

The Shamrock came from Port Louis with a cargo of shingle and Miss P. Robson as passenger.

---o---o---

MR. W. CLEMENT.

As announced in yesterday's "Penguin" Mr. W. Clement arrived at Stanley on Saturday having crossed from the West and ridden in from San Carlos to assume his duties as Stock Inspector.

Although well known on the East Falkland Mr. Clement is a more familiar figure on the West where he has lived for a number of years and where his father Mr. H. Clement, who is now retiring, has been manager of Messrs. Bertrand and Felton's farm at Roy Cove for many years.

ROMNEY MARSH RAMS FOR DARWIN.

Pedigree Stock Arrive.

In the local Quarantine Station there are twenty-two Romney Marsh pedigree rams that have been brought all the way from England for the Falkland Islands Company's Darwin Station. They arrived in Stanley on Tuesday last by the m.v. Lautaro and were received by Mr. G.M. Goddard, the Company's Darwin Manager.

The rams came from Sittingbourne and this is the second time within the space of about three years that stock from this world famous Kentish breed has been obtained by the Falkland Islands Company.

After the usual period in quarantine the animals will proceed on the final stage of their long journey to serve their purpose in maintaining the quality of the stock at Darwin.

WOOL & WHALE OIL

Encouraging Sign In Staple Industry.

Messrs. Buxton, Ronald Du Croz and Company in their returns for the May quotations for Falkland Islands Wool stated that though there had been no public auctions in June those due to commence in July were expected to show a rise in values of about 15% to 20%.

This is, undoubtedly, encouraging news, but in view of the uncertainty of the market at that time such hopeful anticipation should be tempered with judicious reserve.

The May prices are :-

| | <u>A or Good</u> | <u>B or Medium</u> | <u>C or Inferior.</u> |
|----------------|------------------|--------------------|-----------------------|
| Fine quality | 11½d | 10d | 8½d. |
| Medium quality | 9d | 8d | 6½d. |
| Coarse quality | 6d | 5½d | 5d. |

The price of whale oil at the beginning of July is given by Messrs. Meade-King, Robinson & Company, Limited as :-

| | | |
|-----------------------|-----------|--------------|
| No. 1 Crude Whale Oil | £12. 0s. | 0d. per ton. |
| No. 2 " " " | £10. 15s. | 0d. " " |

CALCUTTA AUXILIARIES CALLED TO DUTY.

According to a message from Calcutta on Sunday the Auxiliary Force was called out there on the previous evening.

At the time the message was sent it was uncertain whether the move was a routine precautionary measure or whether it was dictated as a result of the murder of the magistrate, Bei Burge, in the Midnapore district.

Twice during the performances in the main cinemas the programmes were stopped while it was announced that the officers and men of the Auxiliary Force and the Special Constabulary, were required for immediate duty.

The Auxiliary Force which is composed of European British subjects comprises all branches of the Service - cavalry, infantry, artillery and engineers - and its duties are to assist in home defence.

SPEEDBOAT EVENTS.

In the speedboat events at Algonac, Michigan, U.S.A. which commenced on Saturday, Gar Wood covered the thirty-five-mile course in 29 minutes, 18.72 seconds, averaging 82.493 knots an hour.

Scott Paine's time was 30 minutes, 49.50 seconds, an average speed of 78.449 knots.

"To-day, I could not take risks as there was a heavy swell which made driving tricky. The boat was never at full throttle," said Scott Paine afterwards to which Gar Wood replied "I didn't open Miss America up either; I never had to."

Horace Dodge entered a British built speedboat called the Delphine but when making for the starting line it caught fire.

The second race was held yesterday.

TRAGIC END TO FLYING ACE.

A Reuter message reports that while taking off from New York aerodrome on Saturday, the Marquis Francesco de Pirado, the Italian ace, crashed and was burned to death in his cockpit. He was just beginning his attempt to break the long distance record by a flight to Baghdad.

A later message states that behind the tragic death of the Marquis lies a story of a former national hero, virtually exiled on account, it is believed, of a rumoured romance with a royal princess, trying to stage a spectacular come-back which would restore him to favour.

That romance was said to be the virtual reason for his exile as Air Attache from his position as Second in Command of the General Staff of the Italian Air Force.

The opinion in New York is that the machine was too heavily laden to rise.

THE BENEFITES CONCERT.

An Evening Of Hilarity.

Though the weather was anything but fine on Friday last it failed to deter the public from attending the Concert given in the Town Hall by the "Benefites", the proceeds of which were devoted to the Stanley Benefit Club's Children's Party Fund. The experience of former performances by Mr. Billy Catten and his merry troupe of artistes alone would ensure a "full house" and it speaks well for public appreciation that besides the money collected from reserved seats, over fourteen pounds were taken at the door. Altogether the concert realised some £24 and with the deduction of expenses the Children's Fund is expected to benefit by about £17.

Among those present were His Excellency the Acting Governor, Miss E. Halkett, Mrs. G.J. Felton, Major the Hon. J. Innes Moir (Aide-de-Camp) and the Hon. G. Roberts and Mrs. Roberts.

After a rollicking opening chorus in which the whole company took part a "Cow Camp" scene, breathing the fresh air of the "wide open spaces" gave ample opportunity for the display of a type of talent which Stanley audiences greatly appreciate and which in consequence received its due measure of applause. Among those taking part were Messrs. J. Jennings, K. Lellman, A. Pettersson and D. Williams who gave us, with the aid of a banjo and a guitar a "camp-fire" scene full of atmosphere, while special mention must be made of Masters Billy Catten and Barry Goss's yodelling number which "brought the house down."

Whenever we see Billy Catten (young Billy's father) down for an item we are always certain of a pleasant surprise and in "Manners Makyth Ladye (Sez You !)" the Sez you puts into an nutshell the clever impersonation effected by, I think we can say, Stanley's foremost comedian.

In a short one-act sketch Mrs. Pallini (already popular as a "star" in our local firmament) assisted admirably in bringing some new talent to the fore and those taking part were well applauded for their efforts. The characters in the piece were Miss Flighty (Mrs. Pallini), Mr. D. Dinmont (Mr. A. Pettersson), Wimple (Mr. C. Evans), "Garnera" (Mr. J. Jennings), and the trainer (Mr. R.L. Robson.)

Miss Dorothy Atkins, who is also a familiar figure in local entertainments was to be seen in a new role - that of a soloist - and in her rendering of "The Desert Song" showed herself possessed of a pleasant contralto voice of which we hope to hear more in the future. The final item on the first half given by the Band was another greatly appreciated number: Among the selections played were "My Bonnie," "That Tiny Cottage," "Hide Away," "A Bungalow, a Piccolo," "That Dear Old Home," and "Whistling Rufus;" whilst those playing instruments were - Messrs. A. Peck, R. Robson, F. O'Sullivan, D. Peck, E.J. Gleadell; D. Williams, J. Watts, W. Catten and K. Lellman.

The second half of the programme saw in action a Nigger Minstrel Troupe who "did their stuff" well with Mr. R.H. Hannaford as an admirable Massa Johnson assisted by Messrs. S. Summers (Pete) and R.L. Robson (Rastus) as corner men. Outstanding items in the repertoire were the songs by the Tambo Twins (Masters L. Lindenberg and L. Summers) and the Two Piccanins (Masters W. Catten and B. Goss) with the hilarious "hit" of Missy Johnson (Mr. W. Catten) and her pickaninny, which caused its "proud parent" some concern, and the Story of William Tell when Pete scored a "bull" with Master L. Summers. The remainder of the Troupe who helped to make the Show the happy effort it was, were - Messrs. E.J. Gleadell (Moses)

A special word of thanks is due to Mrs. R.L. Robson who did sterling work just out of view at the piano and at the rehearsals and to Mrs. W. Catten whose work also "behind the scenes" was of inestimable value and did much to ensure the success of the concert which was excellently stage-managed by Mr. Fred Davis. The lighting effects were managed by the Government Electrical Department while Mr. G.L. Challen looked after the curtain.

MR HENDERSON AT THE POLL.

Polling took place on Saturday in the Parliamentary bye-election at Clay Cross, Derbyshire, where Mr Arthur Henderson, the Chairman of the Disarmament Conference, is the Labour candidate.

He is opposed by a National candidate in Mr John Moores, and a Communist in Mr Hardy Pollitt.

At the last election Labour gained the seat with a majority of 9,552.

THE ANGLO-ARGENTINE AGREEMENT.

The ratification of the Anglo-Argentine Trade Agreement signed last May was made dependent on supplementary conventions on tariffs and terms for the proposed bourse issue to "unfreeze credits."

The Tariffs agreement is virtually complete the Daily Telegraph understands and a satisfactory conclusion of the question of credits may be expected within a few days.

---o---o---

DE VALERA INTERVIEWED.

In one of his rare interviews with "foreign journalists" Mr de Valera was asked on Monday by the Daily Telegraph representative what the position would be if the Labour members of the Dail supported the new opposition? He said that his progressive, social and economic policy was entitled to receive the support of Labour.

"If all parties, other than the Fianna Fail," he went on to say, "unit against us then our majority of one would be too slight to enable us to carry on."

He declared he had no intention of holding an immediate election or considering the advisability of doing so.

It may be remembered that he used similar words immediately before last January's election.

Questioned on the rumour that he would appeal to the country on the question of establishing a republic he replied "on no account will I entertain the idea of creating a republic without a mandate from the people and as I have already stated I have no intention of calling a general election."

In spite of this emphatic denial there is a strong feeling in Ireland that a general election is near.

It is believed, however, in Dublin that de Valera will be able to count on the support of Labour on vital issues which might lead to a defeat as the majority of the Labour deputies do not want an election immediately.

A NAZI MARCH EAST.

From 11.0 a.m. to 4.0 p.m. on Saturday last a great "march past" of 120,000 Nazis took place at Nuremberg. The proceedings proved that the Nazis have abandoned nothing of their extremist views.

A riot of jingo patriotism was expressed in the drums, trumpets and banners & tens of thousands of marching men have all shown, says the Daily Telegraph, that Hitlerite fanaticism is unabated.

---o---o---

THE ULSTER T.T.

A message from Belfast states that half a million people gathered round the famous Ards circuit over the week-end for the great international trophy road race to see the duel between Nuvolari, admittedly the world's champion driver, and Freddie Dixon of Middlesborough who leapt to fame in this race last year.

There were many fine drivers with fast cars entered for the race but these two - Nuvolari, slim and wiry; and Dixon, broad and powerful - had captured the imagination of the crowd.

Before the race began the betting favoured the Italian. But it was uncertain how it would continue in view of Dixon's determination. Last year when Dixon was leading by "streets" he "fell asleep at the wheel" and jumped off the road into a cabbage patch.

The result of the race was - 1st Nuvolari in an M.G. Magnette at an average speed of 78.65 miles an hour; 2nd Hamilton in an M.G. Midget at 78.46 miles an hour; 3rd Rose Richards in an Alfa-Romeo at 78.71 miles an hour; while the 4th was Dixon in a Riley. Nuvolari beat the second man by only eighty seconds.

TREASURY BILL APPLICATIONS.

Applications for tenders for Treasury Bills were opened on Monday at the Bank of England and totalled £66,580,000. The amount allotted in Bills at three months was £45,000,000. The average rate per cent accepted was 7/1.95d as compared with 7/1.64d per cent last week.

---o---o---

GOLD HOARDERS.

According to a message from London the chief reason for the record gold figure of 130/3 $\frac{1}{2}$ is the fall in sterling in terms of francs.

Another cause is persistent buying for hoarding. It is believed most of the gold bought for this purpose is being hoarded in London.

As sterling falls the price of gold automatically increases but lately the keenness of the demand by hoarders has resulted in a premium over exchange parity.

During the past few days gold has changed hands in London at the rate of £250,000 daily but no one knows who has bought it.

The City does not believe that it has been bought for the Exchange Equalisation Fund nor for the Bank of France, but it believes that individual continental firms, nervous over the currency instability of their own countries, are turning their capital assets into gold and hoarding them in London.

In that case, the Daily Telegraph suggests, the hoarders, who are well aware of the Bank of England's powers to force anyone holding over £10,000 to sell to the Bank at 84/9 $\frac{3}{4}$, have reason for secrecy.

---o---o---

DROUGHT DANGERS IN ENGLAND.

The drought being experienced in England is sufficiently serious, a message from London stated on Wednesday, to lead the Ministry of Health to warn local authorities to conserve their water supplies.

Generally there is no shortage in the large gathering grounds which supply the big towns but serious shortage exists in some of the rural areas.

Macclesfield has exhausted its normal supplies and is living on emergency reserves. Unless heavy rain falls shortly some of the silk mills will be compelled to close down.

In South Cheshire many cases have been reported of cattle dying from lack of water.

Thousands of troops were called out to assist in fighting a huge heath fire near Cambriley which travelled five miles in eight hours with flames forty feet high.

---o---o---

HENRY FORD.

Acting Independently.

A message from Washington at the beginning of the week stated that Mr Henry Ford had failed to communicate with the administration over the week-end but his objections to the Motor Code appear to be :

1. He will not deal with the Unions.
2. He fears that teaming up with the other manufacturers may lead to the disclosure of his method of rapid production.
3. He is opposed to the spirit of collectivism.

General Johnson has come out whole-heartedly in favour of relying on the support of the public to the Association to ostracise Ford products.

A later message announced that Henry Ford is producing a code of his own.

He plans to increase the wages of his own 40,000 employees from 15 to 20 per cent besides giving them a cooperative interest in the Ford Company.

Here, his rivals are unable to follow him. If General Johnson insisted on him signing the Automobile Industry Code he will have a strong position as a result of having had his offer to help recovery refused.

President's Appeal.

A press report on Tuesday announced that the officials of the Recovery Administration are hoping that President Roosevelt will send a public message to Henry Ford appealing to him to back up the National Recovery plan independent of his personal feelings.

This would force Ford's hand, says the Daily Telegraph correspondent, and bring to an end the tedious game of "wait and see" which has lasted over a week.

The last hour for compliance was at mid-night on Monday and General Johnson has no idea of passively waiting Henry Ford's pleasure, the correspondent adds.

GANDHI'S VISITORS.

A Bombay correspondent writes that the number of political visitors received by Gandhi lately has led to a misleading statement that he is organising a big conference to bring about peace between the Government of India and the Congress.

It is understood that the political visitors have been doing their utmost to persuade him to forsake politics and devote himself entirely to a campaign in the interests of the depressed classes.

The idea is that he should undertake a big tour of India to arouse the country on their behalf.

AUSTRIA'S SPECIAL FORCE.

Official notes published in Vienna explain that permission has been given to Austria by the Western Powers to establish a special force of 8,000 men.

Austria finds it inopportune to raise a Federal army from the 22,000 to the 30,000 troops permitted by the Treaty of St Germain as it would have to be recruited for six years. A temporary reinforcement of the Gendarmarie for one year would be much cheaper.

It will be created to maintain order internally and to cooperate with the frontier police forming a part of the armed forces.

Sir John Simon, in acquiescing, refers to the terrorist campaign conducted against the present government of Austria.

MORE PEOPLE AT WORK.

According to a message from London nearly 600,000 more people were at work in England on Monday than a year ago. According to the figures issued by the Ministry of Labour the insured persons working on August the 22nd last totalled 9,657,000 which is 6,480,000 more than a year ago and the best figure since 1930.

The unemployed totalled 2,411,137 which is 448,691 less than a year ago and the lowest since November 1930.

Definite indications that the depression is lifting are provided in special reports received by the Daily Telegraph.

The average monthly production of iron and steel has risen to 530,500 compared with 438,000 tons last year.

Lancashire reports the best season for light cotton fabrics for years. One retail house reports a thirty per cent increase over last year. The exports of cotton goods to India and South Africa have risen at least twenty per cent during August last.

Wool, hosiery, boots, shoes and lace concerns report better trade now than for several years past.

In the motor car and pedal cycle industries all production records have been broken during the last few months.

The exports of coal from the north-east coast are increasing.

It is emphasised that the improvement is slow but it is sufficiently widespread and steady to justify a general renewal of confidence.

THE PACIFIC NAVAL QUESTION.

The Foreign Office at Tokio, a press message reports, admits that there is still naval rivalry existing between the United States and Japan. A spokesman in Parliament announced that the new American naval programme has been unfolded to Japan to accelerate their own naval construction.

Meanwhile the new Japanese plans for construction have been prepared allowing for more ships than in the American programme but execution has been held up by financial exigencies and work will not be started until 1936.

A ROUND UP ON THE WEST.

Wild Horses Taken Off Hummock Island.

Never before has Hummock Island, Roy Cove, known such a stir as it experienced at the beginning of August last when a round up of wild horses was held there. Some twenty men took part in the expedition and went over from Roy Cove and other stations in the "Gentoo" which had been chartered by the lessees of the island - Messrs George Goodwin of Hill Cove, and George Llamosa of Port Howard.

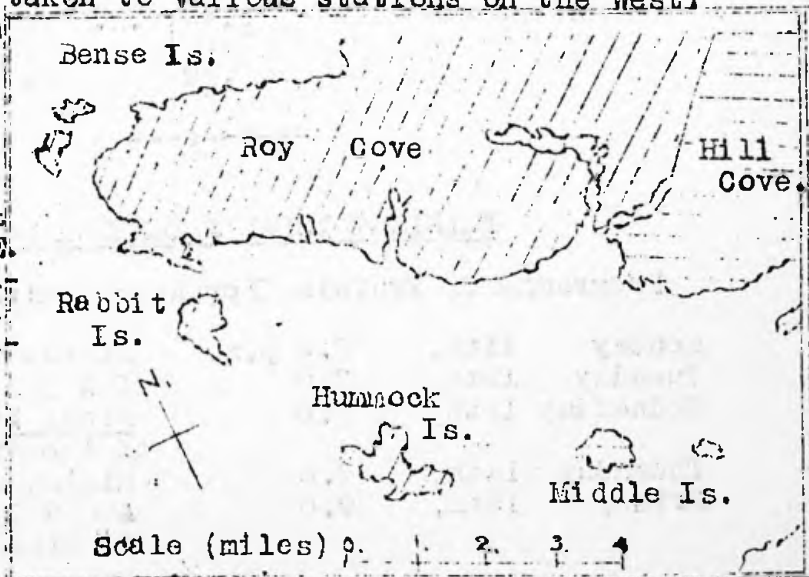

Hummock Island has been used as a manada ground since 1927 when a stallion & several mares were placed ashore there and except for a trip about three years ago when a corral was built no organised visit

to the island has taken place.

As can be imagined some exciting times were had and in all about twenty animals were bolassed and then paliqued in the corral, several mares and yearlings, however, being left free. Afterwards the captures were brought down to the beach by a specially cut track through a large clump of box-wood, blindfolded and taken out on swimming ropes to the "Gentoo" which was lying about 800 yards off-shore. They were then hoisted aboard and transported to Roy Cove where, a fortnight later a number of them were taken to various stations on the West.

Those who took part in the round-up were: Messrs. A.G. Barton, I.B. Steen, A. Henricksen, A. May, A. Peck, K. Lindenber, and R. Yates from Pebble Island; K.W. Luxton, George McKay & J. Binnie from Chartres; E. Johnson, T. Goodwin, G. Goodwin and D. McKay from Hill Cove; G. Llamosa & S. Johnson from Port Howard; and W. Clement, J. Clement, J. B. Browning and V. Goodwin from Roy Cove.

Four horses were also taken over to assist in the round-up.

S. S. LAFONIA.

ANOTHER REVOLUTION IN CUBA.

Warships Hurry To Scene.

Another revolution broke out in Cuba at the beginning of the week. Immediately he heard of the rising which is headed by a Sergeant-Major Batista, the acting President, de Cespedes, with his fellow Ministers decided to give up the reins of government.

The insurgents appointed a commission of five to govern the island temporarily.

All the senior posts in the services have been given to N.C.Os and Batista has decided to call himself "The Revolutionary Chief of the Armed Forces of The Republic."

At first two United States warships were sent for the sole purpose of protecting Americans there and with no intention of interfering with local politics.

The new government issued a statement that it would resign as soon as a constitutional assembly was elected.

A message on Wednesday stated that a small fleet of American warships were assembling off Havana, consisting of two cruisers and four destroyers.

There are over 250,000 Americans, Europeans and other foreigners in Cuba. The United States capital invested in the island totals 1,500 million dollars while there is over £40,000,000 of British capital also invested there.

The United States Secretary of State, Mr Hull, has declared from Washington that America will remain neutral to all political elements in Cuba and she was solely interested in seeing the normal processes of government maintained.

A press bulletin from Washington received on Thursday night reported that within the next few hours thirty United States warships would be in or on their way to Cuban waters while 1,000 marines were awaiting orders at Quantico.

It stated that the next twenty-four hours would determine how much support the Junta of five commissioners really had.

The only development which would make intervention inevitable would be the outbreak of street fighting endangering Americans and other foreign residents. Under the Platt Amendment the United States alone are responsible for their safety.

With communications hopelessly disorganised by the recent hurricane and diplomatic problems arising from the council of five not being officially recognised, the problem is very difficult.

COTTON DEPRESSION "CORNER TURNED."

"I believe that trade in Lancashire generally and on the Liverpool Cotton Market in particular has turned the corner of depression," declared Mr H.L. Cappel, the President of the Liverpool Cotton Association in an interview on Thursday.

"The spinning industry in Lancashire," he went on to say, "is in a better condition than in any other part of the world to meet trade expansion. In spite of the depreciated Yen and the cheapened labour I don't think Japan is happy to-day."

37 HOURS SUNSHINE IN 4 Days.

Exceptionally good weather has been experienced in Stanley over the week-end and since Friday thirty-seven hours of sunshine have been charted - not to mention thoroughly enjoyed by all and sundry in the town. The daily record of sunshine for these four days has been - yesterday, over 10 hours; Saturday, over 10 hours; Friday, 9 hours; and Thursday 8 hours.

Since the beginning of the month we have had three days on which there was not a glimmer of the health giving rays; they were the 2nd, 4th and 6th.

HOSPITAL NEWS.

An emergency operation was performed on Miss E. Peck in the Hospital on Friday night last.

---o---o---

CUBA CHAOTIC.

The chaotic condition continues in Cuba, a message from Havana reported on Saturday night.

It is believed that the United States may take strong measures and turn out the rebels by force if the junta does not restore a capable government.

In addition to the thirty United States warships already off Cuba, eight destroyers now off Virginia are expected to be ordered to steam immediately to Cuban waters.

President Roosevelt had cancelled his plans for a week-end cruise in order to watch developments.

The tense situation at the National Hotel where three hundred army and naval officers took refuge has been relieved and the officers have left the building.

The hotel was surrounded by soldiers with machine guns while the refugees were presented with an ultimatum by the non-commissioned officers requesting them to resume their former commands. They refused unless Dr. de Cespedes was re-instated with full power.

---o---o---

SCOTTISH TRAIN SMASH.

According to a message from Glasgow on Friday when an express train from Helensburgh crashed at fifty miles an hour into four stationary carriages six coaches were derailed.

All of the derailed coaches were torn from the under-carriages and smashed to pieces while the engine was embedded several feet in the turf but no passengers were injured.

PIRATES RELEASE BRITISH OFFICERS.

A news bulletin from Newchang reports that the negotiations for the release of the three British officers - A.D. Blue, Clifford Johnson and W. Hargreave who were captured from the steamer "Newchang" by pirates in March last, were successfully concluded on Thursday last.

The final negotiations were conducted through the Japanese Gendarmerie.

Although they were believed to have suffered severe hardships during their 163 days in the hands of the pirates the officers' condition was not too bad.

After spending some months in junks, they told the Daily Telegraph correspondent, they were taken inland and wandered about the bandit villages. The food was poor but they had it three times daily.

There was no torturing and their worst enemies were not the bandits who first captured them nor the bandits who stole them but the mosquitoes, fleas and bugs.

---o---o---

THE LATE KING FEISAL.

The death of King Feisal of Iraq is believed to be the direct result of a motor drive on Thursday last when the car took a wrong turn and climbed over 2,500 feet, the extra strain on his heart leading to a fatal attack.

RAILWAY SMASH.

A Reuter message from Binghampton, United States, announces that the back coaches of the Erie Railroad Flier, which was on its way from Chicago to New York was wrecked.

The Flier was following a milk train which crashed into a stationary train.

Fourteen people were killed and twenty-five injured in a wooden coach which was sandwiched completely between two steel coaches and demolished.

The express was crowded with visitors returning home from the World's Fair.

---o---o---

IN IRELAND.

The new United Ireland Party which was formed on Friday at a great convention held in Dublin is going into action forthwith as the Government has decided to hold local elections on the 14th of November.

Hundreds of delegates representing Cosgrave's and MacDermott's parties will then endorse the decision of their Executives of uniting with General O'Duffy. A manifesto outlining the new party's policy is expected to be issued shortly and is understood to embrace the basic policy of the centre party which is - the reunion of Ireland and thus end the trade war with Britain.

The united party will then begin a nation-wide campaign, says the Daily Telegraph.

It is felt that the formation of the new party must force the Fianna Fail to decide between remaining in the British Commonwealth and declaring an independent Irish Republic.

NEWS IN BRIEF.

Burnham. Golf : The 19-year-old P. Risdon has defeated Michael Scott, the British Amateur Champion, in the first round of the West of England Amateur Championship by 2 and 1.

Perthcawl. Golf : In the Welsh Amateur Golf Championship Black, who beat the holder, Howell, is to meet A.A. Duncan in the final.

New York. Speaking at a dinner to the overseas competitors in the American Lawn Tennis Championship, Dwight Davis deprecated the intensive seriousness which has crept into the game. Players, he said, were inclined to lose their sense of perspective and if amateurs could not get any fun out of the game they should give it up.

San Francisco : Mrs. Wills-Moody is suffering from a dislocated vertebra and is resting at Stanford hospital. It is unlikely that there will be an operation.

Belfast. S.W. Boyd has purchased the Coleraine Distillery and has now secured the control of the Irish Malt Whisky industry with a view to an expected demand from the United States.

Darlington. After cremation Viscount Grey's ashes were scattered in the Bird Sanctuary at Falloden.

Vienna. Prince Starhemberg, the Commander of the Austrian Heimwehr has returned to his country from Italy full of enthusiasm for Fascism. "We must do everything to ensure that Austria goes Fascist," he said.

Washington. General Johnson has settled the three weeks controversy of the coal industry in America by handing the representatives of the industry a draft of the Coal Code.

Paris. There are persistent rumours, states the Daily Telegraph, that the French Minister of Finance, M. Bonnet, intends to increase the importance of the Paris Stock Market by abrogating a law forbidding the introduction of foreign shares without express authorisation.

Montpelier. The American State of Vermont is the twenty-fifth State to decide against prohibition. So far no State has voted against the repeal. It is practically certain that the necessary thirty-six States' majority will be obtained before Christmas.

Berlin The Bourse received a shock when it was reported that the firm of brokers connected with the German Lye Trust is insolvent. Combined with the knowledge that foreigners were selling their shares in the leading German companies, shares dropped from 3 to 6 points all round on Saturday last.

Vienna. Gun emplacements have been erected at Sharnitz and other places on the Austro-German frontier to prevent an attack of some 8,000 Austrian Nazi troops assembling in Bavaria.

AUSTRIAN CHANCELLOR'S ATTACK.

"Old Parliamentary System Gone."

Chancellor Dollfuss, in addressing 40,000 supporters at a "Fatherland Front" gathering in Vienna on Monday, made a remarkable attack on democracy and parliamentary liberty, stating that "The old parliament with the old leaders has gone never to return, and the epoch of the capitalist and economic system together with the period of socialist influence has vanished for ever and there will not be again a rigid party system in Austria."

The extremists are disappointed with the speech which has not offered any clear cut programme says the Daily Telegraph correspondent.

But the Fascist followers are satisfied with the announcement of parliament's death though this is qualified by the phrase "A Parliament such as the last one will not return."

It is understood that the announcement of a dictatorship has been dropped owing to French intimation that it would not support a Fascist Austria; the Farmers' Party is in opposition to the Anschluss and the determination of President Miklas to uphold the present democratic constitution.

GERMAN TRADE.

Despite official statements that the trade depression in Germany is despersing the price level of all industrial securities continues to decline rapidly.

According to press computations the Bourse quotations show an aggregate decline of 350 million marks since the 31st of July, while during the present month heavy falls have been registered in the Dye Trust, Siemens Rhenish Lignite and the Schultheiss Brewery which is the biggest undertaking of its kind in the country, and fixed interest bonds are sagging. Attention is being directed to the contradiction existing between trade tendencies and stock prices.

PROFESSIONAL TENNIS DISPUTE.

According to a message from Paris Cochet is understood to have stated that he would meet Tilden on the 27th of September. But he does not intend to be classed as a professional as a part of the gate proceeds are to be devoted to charity.

Pierre Gillou, the president of the French Lawn Tennis Association, however, takes another view and has declared that while he is president there will be no open tennis tournaments in France.

EFFORT TO COPE WITH COTTON PRICES.

The formation of large combines in the Egyptian Section of the cotton industry to cope with the evils of price cutting is being seriously considered in Manchester, says the Daily Telegraph correspondent.

A group of Bolton employers are carrying out a campaign to put an end to unprofitable trading.

"If the present movement fails to secure a voluntary agreement," said the head of one concern, "then we must move towards forming one or two big combines in the Egyptian Section. Working with the existing combines they could control the section and restore prices to an economic level."

SPAIN AGAIN "AT THE CROSS ROADS."

The Spanish Republic is endangered by the resignation of Senor Azana's Cabinet which is the outcome of a severe defeat of the Government's candidates at last Sunday's elections; the municipal councils in ten of the fifteen regions returned opposition members to The Tribunal of Constitutional Guarantees.

Once more Spain stands at the cross roads, says the Daily Telegraph correspondent at Madrid.

While the return of the monarchy is not desired owing to the dangerous crisis which would ensue, only a reversal policy will satisfy the great bulk of opinion.

A general election is feared as the right wing would sweep everything before it but the president's desire, however, to dissolve the Cortes and hold elections is well known.

A SOLEMN BLAST.

A New York message states that a blast on a ram's horn in a colourful ceremony held on Saturday last by the Union of Orthodox Rabbies of the United States was the signal to ban all Jews who handle German goods.

The procedure, according to old traditions is known as the "Shofer" and the ban as the "cherin."

DEATH OF DEAN BRANDON.

The Passing Of A Great Worker.

Memorial Service

To Be Held In Stanley.

It is with profound regret that we learn by this mail of the death of Dean Lowther E. Brandon M.A. on the 16th of July last. Though only known by name to the younger generation of the Colony it can be truly said that he lives still in their lives through the goodness of his work, while those who remember him and Mrs. Brandon - and there are many - have vivid recollections of the long sojourn in the Falklands of these two loving souls so gently revered; in the hearts of these the passing of the Dean leaves a pang of deep sorrow.

In the magazine of The Holy Trinity Church, Montevideo, Canon Elount publishes a long memorial notice of the late Dean Brandon from which we feel we cannot do better than but re-print extracts. We understand from the Dean of Stanley that the Memorial Notice will be published in full in The Christ Church Cathedral Magazine which Dean Brandon founded over forty years ago.

The Dean of Stanley also informs us that a Memorial Service will be held in the Cathedral on the 20th of September (Wednesday next) at 7.0 p.m. when a collection will be taken for the Dean Brandon Memorial Fund started last year by the Very Reverend the Dean.

"A Tribute To An Old Friend."

"On July 16th, at Rathbran Glebe, Stratford-on-Slaney, Co. Wicklow, the Reverend Lowther E. Brandon M.A., who had reached the advanced age of eighty-seven years, was called to his rest. He had been incumbent of this small Irish parish, since his retirement from the Falklands in 1907, where for thirty years he had been the Colonial Chaplain, and for almost twenty years Dean of Christ Church Cathedral, Port Stanley.

Dean Brandon, as he was known to the last, was one of the six sons of an Irish clergyman. His father, though he never held a rich living in the Diocese of Ossory, Ferns and Leighlin, and for the greater part of his ministerial life was a poorly paid curate, managed to give all his sons a University education at Trinity College, Dublin, and they were all subsequently ordained, and his daughters became missionaries in India. The youngest of his sons, Ernest Brandon, died only a few months before the Dean.

"The future Dean, born in the year 1846, was the smallest member of his family, his brothers were extremely big men, and he used to account for his medium height and spare figure by saying that the year of his birth coincided with that of the notable potato famine. He did well in college, and took a second class testi-

monium in the Divinity School. He was ordained in 1869, just at the time of the Disestablishment of the Irish Church. He served for four years as a curate in Co. Carlow, and was incumbent of the parish of Kilnehue, Co. Wexford for five years. In 1877 he was appointed Colonial Chaplain at Port Stanley, Falkland Islands, where he succeeded the Reverend Charles Bull.

"Here he found the scope for his great life's work, ministering not only to the small population of the settlement of Port Stanley, where in those days there could not have been more than five hundred people, but to the whole population of the Colony, scattered over the two large islands, each a hundred miles long and fifty miles broad, and twelve smaller islands, which were reached in cutters from distant points of the main islands. The Colony was very primitive at that time. To get there from the River Plate meant usually a stormy voyage in a sailing schooner, not particularly comfortable or well-fitted for passengers, and the journey might take five days or a fortnight.

"Not many years after he went to the Falklands the Dean married his cousin Miss Josephine Jameson of Co. Carlow, who survives him, and never had any clergyman a better partner, and who, like himself, gave her whole energies to the work. Her great ability in many directions was a tremendous asset for the Church, and on the solid foundations laid by them the parochial life of to-day has been built. Mrs. Brandon devoted herself more especially to the Sunday School, which under her care became most efficient, the Band of Hope, and the Cathedral music and choir. She was thorough in all things, and the young women who came under her influence were devoted to her.

"Nine years after his arrival in the Colony the Dean found himself confronted with the task of rebuilding the church. The old building, known as St. Thomas's Church was so badly damaged during the peat slide of 1886 that the building was unsafe for further use. Originally the building was known as the "Coin Exchange." It was decided to rebuild on the same site, and in 1888 Bishop Sterling issued an appeal in the English papers for £8,000 to erect a Cathedral, and Dean Brandon not only superintended the work, but collected much of the money required. The Cathedral was designed and planned by Sir Arthur Elomfield. But the Cathedral cost far more than the estimated cost.

"In the whole of his thirty years down south the Dean was a great worker, and was always planning what he could do to make the hard lives of the Colonists more comfortable. He was always an exceptionally early riser, spending much time in prayer and study before he appeared in his garden where he was generally to be seen in the summer time before the workmen turned out. When he started the Falkland Islands Magazine he had a small Albion printing press in his attic, where he did all the setting up of type and "pulling off" (some four hundred copies a month) himself, and the cost was so low he had to kneel for the whole of his job. He used a typewriter and wrote his sermon notes in shorthand.

"By tradition and training, and I think one may say by conviction, the Dean was an extreme Evangelical, though he did not unduly press his views on anyone else. He was a wide and judicious reader, quite scholarly and abreast of the times, and not narrow minded with regard to how things were done in the church. He was an austere man of blameless character, whom his friends loved and all who knew respected. All the Chaplains who have ever worked in the Falklands agree that he was the best priest, the best friend of the people, the hardest worker, and the most consistent liver who has ever been there, and that never will the people whom he loved, and for whom he was such a true pastor have a better.

"His mortal remains were laid to rest in the churchyard of the little church in the hills of Stratford-on-Maney."

SPANISH SITUATION.

According to a message from Madrid Spain remains without a Cabinet following on the resignation of the Azana Government on Friday last, and laborious negotiations are continuing for the formation of a ministry.

The leaders of the revolutionary movement are adopting all means of avoiding a general election, according to a Daily Telegraph correspondent, owing to the evidence provided by the local elections of a profound change in public feeling wherein many exiled monarchists have been nominated for the constitutional tribunals and other posts.

The radical leader Lerroix is endeavouring to maintain the Cortes with the hope of pacifying the discontented elements by a moderate policy while it is obvious that public opinion demands an appeal to the country on a straight issue of Conservatism versus Marxism.

SEVERE SOVIET DECREE.

The Soviet Government, so a message from Moscow reports, is perturbed by the excessive grain losses through waste, theft and neglect on the fields, farms, elevators, rail depots and trucks.

The Public Prosecutor has ordered all courts to apply decisively the decree for the Defence of the State and Social Property which provides for the death penalty or ten years imprisonment for all who are held responsible for the grain losses after delivering it to the government inspectors.

IRISH BASS CAMPAIGN.

An intensive "Bass Campaign" is being carried out in Ireland. The latest outrage is reported from a town on the outskirts of Dublin where a publican was taken at the revolver point from an hotel and driven into the mountainous district blindfolded and after being beaten, stripped and then released with "Boycott Bass" stamped on his back.

AMERICAN INFLATION EXPECTED.

The Daily Telegraph Washington correspondent understands that the subject of the long discussions between President Roosevelt and the financial leaders of the country on Tuesday was the method of producing substantial expansion credit although the participants declare that inflation was not discussed rumours are prevalent that important moves leading to inflation will be made in America during the next few days.

It is believed that the administration is planning the step with the object of prevailing upon the banks to relax the credit they have been demanding and the unusually high securities for loans since March.

Although the administration remains outwardly optimistic Wall Street and the general public fear that the recovery race is reaching a dangerous bend and with the plans of success virtually in the consumers pockets more buying is still needed to save the campaign. Otherwise the over ten million remaining unemployed will be dependent during the coming winter on charitable associations.

---o---o---

SITUATION IN CUBA.

According to a message from Havana on Wednesday the anti-American feeling is growing better and the possibility of intervention is becoming more remote daily.

President San Martin has rejected the demand from the discontented officers to resign in favour of de Cespedes and he ordered them to surrender within thirty-six hours.

The presidential troops are endeavouring to starve out the officers who are quartered in the National Hotel to the great inconvenience of the other residents including the United States Ambassador.

FORMER CHIEF CONSTABLE'S DEATH.

The Late Mr W. Atkins.

It is with deep regret that we have to record the death of Mr William Atkins, formerly the Chief Constable and a Foreman of Works in the Colony, the news of which was received by the last mail.

Mr Atkins was born at Tipperary, Ireland in 1853 and was brought to the Colony by his parents when only four and a half years old. For a number of years he worked at Port Louis and at Johnson's Harbour with Guachos and later on the West Falkland.

Previous to retiring he was in the service of the Colonial Government for twenty-seven years during which time he performed many and various duties included among them being - Police Constable, Sub-Inspector of Stock and Government Storekeeper and Customs Officer from 1895 to 1902. In the latter year he was appointed Senior Constable and in 1904 he became Chief Constable, Outdoor Foreman of Works and Assistant Inspector of Stock. In 1920 he retired on pension and proceeded to the United Kingdom but three years later he returned to the Falklands and in 1923 was appointed to act as Chief Inspector of Stock pending the selection of an Inspector of Stock. Finally he left the Colony to settle down at Bristol in 1924, his death taking place on the 11th of August last.

A "RECOVERY" PROCESSION.

According to a message from New York a "Recovery" procession is being organised to celebrate the end of the United States' depression. It will be the most impressive in the city's history for over a quarter of a million people are participating from all ranks, labour and capital, with many in fancy dress and over a hundred bands.

Administrator Johnson, in addressing a mass meeting at Madison Square Gardens, declared that the Recovery Act had already lifted the United States a quarter of the way out of the depression with 85 per cent of the nation's employers enrolled.

Not mentioning names he criticised "rugged individualists" who had brought the country into the depression and were now crying again for the old lack of business rules.

The Daily Telegraph correspondent states that it is believed that General Johnson's attack is partially inspired by the possibility of important coal interests challenging the legality of certain codes, a move which was inspired by prominent industrialists & bankers.

The representatives of some 30,000 Pricedale miners have unanimously decided in favour of striking until the coal code has been signed.

DE VALERA'S MOVE.

The Daily Telegraph correspondent in Dublin announces that de Valera has formed an alliance with the Free State labourites and the Fianna Fail is now prepared to modify its policy to meet the demands of the new ally against the United Ireland Party.

Labour will support the Government on the condition that social service measures will be adopted. The measures include widows and orphans pensions, unemployment relief, house-building work and men's compensation. The Government is prepared to meet these demands.

THE RETURN HOME.

Bisley Team Welcomed Back.

There was a good attendance at the Return Home Dance given in the Town Hall on Friday evening last when the Bisley Team were welcomed back to the Colony by His Excellency the Acting Governor.

On the platform with His Excellency were the Hon. G. Roberts and Mrs. Roberts, the Hon. L.W.H. Young and Mrs. Young, Lieutenant W.M. Allan (Adjutant of the Defence Force) and Mrs. Allan, Mr. J.W. Grierson (captain of the Team) and Mrs. Grierson, Mr. and Mrs. C.F. Thompson and Mr. M. Campbell.

In his speech His Excellency said : "Ladies and gentlemen, Mr Grierson and members of the 1933 Bisley Team. On behalf of the Colony it gives me very great pleasure to welcome the team home again.

"There is no need for me to introduce the team, they are all well known to you, but I am sorry to note that Sergeant Harries is not here to-night. Now you know that the team, with the exception of Mr John Grierson, the captain, left here on the 3rd of June last. They were away just over three months and in my opinion this was not sufficient time for the members of the team to get accustomed to strange surroundings and to feel their way at Bisley, and also to get sufficient target practice (hear, hear.)

There are some of you in this room to-night, no doubt, who have been to Bisley. I consider that people competing should be there for some time to get acquainted properly with the conditions. I was at Bisley last year when the final of the King's Prize was shot off. From what I saw of it I consider that our local team should get to England earlier to accustom themselves to conditions at Bisley. Now one of the things that affected our team was the extreme heat - had our chaps had cooler weather than I think the results would have been different.

"Did Their Best."

"The teams from Sierra Leone, the Gold Coast and so on suffered no ill effects at all from the heat but naturally our men were placed at a very great disadvantage - I think all of us will appreciate this. But notwithstanding this I feel sure that all will feel that our team did their best and they could do no more (hear, hear,) and we are very grateful to them for what they did. Also we must thank them for undertaking the great adventure. It is a great adventure going there and back - 16,000 miles - to represent the Colony. They did that, and what I mean by 'great adventure' is going that distance, undertaking various risks of travel, which many of you can understand, by sea and land. We have the case of Mr Grierson, the captain, he was in a train smash but fortunately he suffered no injury. When you come to think of it, it is a great adventure. All of us who have been away consider it a great adventure - we have to travel a long way and incur the risks attaching to sea and land travel and possibly by air.

"Now, our team here went home to represent the Colony. Perhaps they did not wish to go particularly but they went because they were asked to do so and all the more credit is due to them for going. I hope that next year it will be possible to send a team home but that depends upon financial conditions. At the present time the Colony is in a good position and I believe that it is one of the only Colonies that has no public debt. Another thing is, as you know, Sir Arnold Hodson, our late Governor, took a team home from Sierra Leone and won the Mackinnon Cup. On behalf of the Colony I sent him a telegram of congratulation and last mail I received a letter from Sir Arnold expressing his thanks to the Colony."

"I will now ask Mr Grierson to give a short account of the team's experiences at Bisley." (Applause.)

"96 In The Shade."

In reply to His Excellency Mr Grierson said : "Your Excellency, Ladies and Gentlemen. On behalf of the Bisley Team I wish to thank you for the reception you have given us, not only for organising this dance this evening, but also for the sympathy you have shown us since our arrival. In fact the public in general have shown us a great deal of sympathy rather than blame us for our failure in not bringing one of the Cups back with us. I assure you it is no easy matter to bring a Cup back to the Colony. We competed against some very good teams and as the majority of them came from tropical climes the conditions favoured them very much. At the same time we must give them credit for the excellent scores they put up and I thank His Excellency for his remarks.

"We in the Falklands are very pleased to be able to congratulate Sir Arnold Hodson on his winning the Junior Mackinnon and then taking second place in the Junior Kolapore.

"It may interest you to know that at the general meeting of the Rifle Association Sir Arnold was called upon to propose a vote of thanks to Lord Cottesloe. Sir Arnold made a lengthy speech and most of it was referring to the Falkland Islands. He went so far as to say that there were no better shots in the world than the Falkland Islanders - given good rifles and, of course, favourable conditions.

"The conditions at Bisley this year - well, when I tell you that the Junior Kolapore was shot off with the thermometer standing at 94 and 96 in the shade, you can understand what a proposition we were up against.

"I do hope the Colony will send a team next year and I hope it will have better success than we have had. Your Excellency we do appreciate your kind remarks and the kindness of the Colony. Once again, on behalf of the team, I thank you." (applause.)

Local Bisley Prizes.

His Excellency the Acting Governor then presented the prizes won at the Local Bisley Meeting held in 1933 and at the conclusion His Excellency remarked that a great deal of importance attaches to the Local Bisley Meeting.

"It encourages keen shooting and, moreover, it also produces marksmen for Bisley," His Excellency said. The Acting Governor then referred to his previous remarks about Sir Arnold Hodson. "Now, Sir Arnold instituted the Local Bisley Meeting and, moreover, he was the first to send a team from this Colony to compete at Bisley - as you all know he was a very keen sportsman and you know that he did a very considerable amount of good for this Colony.

"I remember reading an account of the Boer War where one of the Boer Commanders stated that he considered any one of his men was equal to ten Britishers on account of the fact that his men were all expert marksmen.

"Our men are equal to any others as marksmen and we have proved that from early days when our teams have met the Navy. Every time, so far as I know, we have defeated them and I hope that when the "Dauntless" arrives and we have some matches that we will do so again." (applause.)

A very enjoyable time was spent by all at the dance which ended in the early hours of Saturday morning.

BROOKLANDS FATALITIES.

Immediately before the commencement of the Brooklands 500 miles' race on Saturday - the world's fastest long-distance event, an R.A.F. bomber crashed adjacent to the aerodrome and the pilot, Leslie Few, was killed while two others were injured. The machine was wrecked.

During the race an H.G. Midget, driven by M.B. Watson, skidded and somersaulted and took fire. Watson was thrown clear but he was rushed to hospital in a critical condition, suffering from injuries and burns. Later he died from a fractured skull.

SIR ARNOLD HODSON.

Father Migone's Tribute.

The Catholic News published on the 12th of August last writes :
"We have received from Port Stanley, Falkland Islands, two very
interesting articles in which Father Migone, the Priest in Charge,
pays a very warm tribute to the ex-Governor, Sir Arnold Hodson.
According to Father Migone Sir Arnold was a model Governor who worked
hard for the welfare of the Falkland Islands and left no stone un-
turned to benefit all classes and sections of the community.

"We understand that a record of it all will appear in book form,
in Spanish, and it will no doubt receive a warm welcome from all
those interested in the far-off islands in the southern hemisphere."

JEWISH CRITICISM.

A message from London on Sunday stated that the Board of Deputies of British Jews (The British Jewish Parliament) at a meeting that day criticised the activities of the sponsors of the Anglo-Jewish Conference which is summoned for the 5th of November for the purpose of proclaiming a boycott on the German goods services.

P. Guedalla, the novelist, said that every member must make a decision without diplomatic mystery while Phorowitz thought that a boycott by the Jews was the strongest weapon they had and they were fully entitled to use it.

The Board is not taking any official action.

COAL CODE "COAXING."

It is announced from Washington that the negotiations for the Coal Code, under the United States Recovery Plan, have been held up at the eleventh hour by the Appalachian Field owners who are strongly opposed to the Labour Unions. They refuse to sign the Code which specifically outlines the workers right to be represented by anyone they choose.

The Anthracite section has already made the Code operative and as a result of this now set back General Johnson threatens to lay the matter before the President with a view to bringing the recalcitrant bituminous groups' point of view forward as a cause for action.

A further message from Washington on Sunday night stated that the Recovery Administration Code was signed by the operators at 1.0 p.m.

TWO NEW CRUSOES.

Loneliest Island To Be Explored.

"Discovery" Scientist's Adventure.

Two young Englishmen are going to live a Robinson Crusoe life on Tristan da Cunha, the loneliest inhabited island in the world, writes a special correspondent in an issue of the News-Chronicle of July last.

For the greater part of two years they will be entirely out of touch with the outside world, during which time they intend to make the most complete survey ever made of the island.

The young adventurers are : Mr Francis K. Pease, aged 27, a member of the 1925 Discovery I expedition to the Antarctic and of the William Scoresby Antarctic Expedition of 1927, and Mr Edward B. Marsh, aged 21, a former public schoolboy of Leicester.

The Colonial Office is taking a sympathetic interest in the expedition.

Mr Pease and Mr Marsh sailed in the 75-ton schooner Sallan at the beginning of August bound for the islands. They took with them a lifeboat so that they can communicate with the neighbouring islands, a cinema camera, clothes, books, and foodstuffs, scientific instruments, and, a short wave receiving set.

"Our first object," Mr Pease told the News-Chronicle correspondent, "will be to keep a complete meteorological record which should be of considerable value. We shall also set up self-working meteorological stations on three of the neighbouring islands - Nightingale, Gough and Inaccessible.

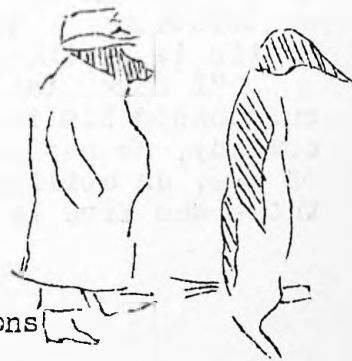

"Our next task will be to make the first complete land survey of the islands, and to find, if possible, a landing ground for aeroplanes as a half-way house for an air service between South Africa and South America.

"Then we hope to find a good anchorage for a whaling station and to ascertain what are the mineral deposits. We also hope to stamp out the plague of rats and lice that infest the island."

For a start the young Robinson Crusoes will live in tents, but they intend to build a mud and stone dwelling house.

DE VALERA "COURTS" LABOUR.

According to a message from Dublin the Labour Party leader, Norton, in addressing his constituents at Kildare, revealed the terms of the agreement with de Valera for the support of Labour: The principal feature of the terms is that the Government undertakes to consult Labour in advance upon all projected legislation, says the Daily Telegraph correspondent.

The Government, having assured them that they will give an expression of Labour's views, there will be a fortnightly meeting for the discussion of policy among the leaders and the executive council.

Labour's policy already provides for early legislation on pensions, dees, housing, compensation and relief works.

General O'Duffy, speaking at Thurles, said that the Blueshirts stood for no dictatorship except that of the people while de Valera was demanding a dictatorship for himself and if he (de Valera) attempted by laws, perversion or any other act to get rid of their law-abiding movement because it was endangering his success at the polls, the "dictator" was entering on a course which would bring the Government's existence to a sharp and speedy end.

De Valera, in announcing the Labour Pact said that differences had been set aside in order to safeguard the nation. He described as madness the acts of the United Irish Party - who by militarism would compel the country's surrender to the British and others who profess that the Government is not prosecuting the economic war with sufficient vigour. They were helping the British and disgusting and discouraging sane patriotic Irishmen.

"The people gave us a mandate," he concluded, "and we don't intend to let any minority deprive us of our leadership or authority."

According to a message from Graz some 200 Nazis on Monday, by using smoke bombs attempted to break up a National Guild Front meeting with the result that over a 100 were injured in the subsequent panic, ten persons including eight women were burned - all of whom were taken to hospital. Over a 100 arrests were made while 10 Nazis were severely handled by the crowd before they could be rescued by the police.

Herr Winkler, the Guild leader, said that he was prepared to cooperate with Dollphuss in a "patriotic front" but he declined fusion.

THE C.S. NORSEMAN.

72 Miles Of Cable Raised.

The Cable ship Norseman left Stanley for Montevideo shortly after 4.0 p.m. yesterday, having been in Colonial waters since Thursday last, and took with her six bags of mail for Europe and the River Plate.

The vessel belongs to Imperial and International Communications of Great Britain, her base being at Rio de Janeiro.

Imperial and International Communications purchased from the Admiralty the cable between the Colony and Montevideo and the object of the Norseman in coming to Stanley was to pick up some of the cable for use in repair work off the coast of Brazil where she is continually employed, and where, owing to the shallow water, breaks are almost of daily occurrence.

Captain L. Gates, the Master of the Norseman, stated that although the weather had been stormy he had successfully picked up a length of seventy-two miles without trouble. The cable was secured with the first grapple and found to be in excellent condition notwithstanding the fact that it was laid some eighteen years ago. It is understood that its value is £200 per mile.

This is not the first visit of Captain Gates to the Falklands for in 1908 he stayed in the Colony for some months when an apprentice on the sailing ship Simla, and on his return he has expressed his pleasure at being able to renew his acquaintance with Port Stanley.

BEAUTY QUEEN'S CRUEL.

Only a swaying branch, to which she clung for fifteen hours, has saved a Rumanian beauty queen, Helen Verzea, of Braïla, from being dashed to death at the foot of a cliff.

The girl was with tourists in the Carpathians when they saw a bear.

After a shot had been fired, the animal charged. In her flight Helen fell over the edge of a deep ravine, but clutched the branch of a tree, from which she was eventually rescued.

DYNAMITE "CURE" TOO DRASTIC.

A deaf-mute's attempt to cure himself by shock methods has ended fatally at Germiston, U.S.A..

The victim, a twenty-four-year-old youth, had been told that shock might cure him, so he obtained several sticks of dynamite, placed them in a shallow wall and exploded them.

The detonation was terrific and the deaf-mute was fatally riddled with pieces of splintered rock. An open verdict was returned at the inquest.

BIGGEST BIRD.

Remains of a bird, believed to have been the biggest that ever lived, have been found in New South Wales. They were found by the Australian Museum staff who have been searching for remains of animals at Cuddie Springs, near Brewarrina. It is considered that this bird was probably even bigger than the extinct Moa.

BRIDEGROOM FORGETS WEDDING-DAY.

A bridegroom-to-be with a bad memory caused a commotion in the Turriff district of Aberdeenshire recently.

The bride, the guests and the minister were all waiting at an hotel. A quarter of an hour passed - then half an hour.

The bride was on the point of collapse. She fought down an inclination to go into hysterics and set off on a bicycle to find him. Then she was given a lift in a motor-car.

She searched every likely place, including her bridegroom-to-be's home. Finally, in desperation, she went to the farm where he was employed.

She found him, hard at work, blissfully unconscious of the trouble he had caused. It was too late for the ceremony.

PETROL FROM COAL PROGRESS.

Bright Outlook For British Scheme.

According to news from London further progress connected with the production of petrol and heavy fuel oil from British coal is reported by the South Wales & Monmouthshire Development Council who are approving of a scheme for the erection of ten low temperature carbonisation units and a hydrogenisation plant costing approximately £7,000,000, while Chemical Industries are about to place at Sheffield orders for £250,000-worth of equipment for a £2,500,000 plant they are building at Billingham-on-Tees. A £32,000 plant for the latter is also under consideration in the North Wales area.

The South Wales scheme is anticipated to produce 100,000 tons of petrol annually, using 365,000 tons of coal and providing employment permanently for 1,000 miners and 1,500 processors while the construction is engaging 15,000 men for the year.

The carbonisation plants are to treat 3,650,000 tons of coal, producing 240,000 tons of heavy fuel, 40,000 tons of light fuel, 70,000 tons of pitch, 2,520,000 tons of smokeless fuel and 322,000,000 cubic feet of gas yearly, and employing 4,000 miners, 1,400 processors in addition to temporarily engaging 12,000 for the year.

Speaking at the Technical Institute at Bishopsgate on Monday, Mr Frank Hodges, the former secretary of the Miners' Federation, said that the scientific utilisation of coal must be the subject of a mass research attack for the re-establishment of British mining.

U.S.A. ALARMED ! - SHORTAGE OF LIQUOR.

According to the Daily Telegraph correspondent in Washington with the imminent repeal of prohibition in the United States the country is facing a shortage of whisky and wine stores owing to the deterioration of the vineyards during the "dry" period and the cessation of manufacture.

But the production of pure alcohol is advancing rapidly though it is estimated that the first year's demand of matured whisky will be 80,000,000 gallons while only 16,000,000 gallons will be available.

Virtually no wine has been held and according to the Rheims' Daily Telegraph correspondent the French champagne vintners are studying the position across the Atlantic with a view to re-opening offices in New York, Boston and Washington, anticipating sales for an initial consignment of 3,000,000 gallons.

NEWS IN BRIEF.

- Simla : The Baezai and Ehweezai tribes of the Upper Mohmands of the North-West frontier have accepted the terms of settlement demanded by the Government and on Wednesday the oath of observance was taken by all present.
- London : A deluge resembling a cloudburst which fell in many parts of England on Wednesday ended the drought with two hours of incessant and heavy rain. Floods are reported from the low lying areas.
- Tokio : Two trade missions representing industrial and commercial firms from Tokio, Yokohama, Nagoya, Osaka and Kōbe are sailing for South America where they are holding a widespread campaign and sample fairs for the purpose of popularising Japanese merchandise.
- London : A Royal Scot class engine with seven coaches has covered the ninety-four miles between Euston and Coventry at an average speed of 74.8 miles an hour.
- Athens : The United States representatives in Athens have presented an application to the authorities for the extradition of Insull who is at present detained there.
- London : Following on the Australian reports the wool prices are rising still 15 per cent above the recent levels and are 50 per cent above those of a year ago. The Wool Exchange is being fully attended and there is a great competition for offerings, Germany opposing Bradford in the bidding.
- Hague : Queen Wilhelmina's address at the opening of Parliament, broadcast nationally and to the colonies, forecasted measures for making imports "subservient to the promotion of exports" due to the London Conference having proved itself "powerless to establish reasonable proportions in trade in goods."
- Wellington: The past eight months trade returns in New Zealand show that the exports have increased by nearly £2,850,000 compared with last year. Imports have declined £1,250,000.
- Coventry : The Motor export figures given by the Parliamentary Secretary to the Board of Trade shows an increase from 15,000 in 1924 to 40,000 in 1932 and 53,000 in the first eight months of 1933.
- Llandridod Wells : Only 98 competitors are remaining in the Motor cycle Reliability Trial as against 114 on Wednesday while Germany has taken the lead from Britain in the International Trophy owing to a check sustained by a member of the British trio, costing two marks. One woman rider remains in.
- Wellington: Proposals put forward by the British Importers Association have been endorsed by the Dairy Conference and this will probably result in closer cooperation and improvements in the marketing of New Zealand products.

JAPAN WANTS LARGER ARMY.

A message from Tokio states that the Japanese military authorities are seeking sanction for the reestablishment of four army divisions scrapped in 1925, bringing the army force up to twenty-five divisions. This application has been submitted in view of the increased commitments arising out of the Manchukuoan Treaty in London.

U.S.A. "COURTS" U.S.E.R.

A Washington message on Thursday stated that the Secretary of State, Mr Hull, in addressing journalists hinted an early recognition of the Soviet by the United States and the President is considering the matter.

It has been represented to the President that Russia could absorb America's surplus commodities and the Soviet has already offered to buy 3,000,000 bales of cotton with favourable credits extended, while the Reconstruction Finance Corporation is considering the extension of credit from fifty to seventy-five million dollars for this purpose.

The State Farmers' Union have joined the cotton growers in their demand for inflation.

THE DOLLAR SLUMP.

The slump in the American dollar to the lowest level for fifty years is attributed in New York to the lack of confidence and finding the depression heavy for selling. It is expected that the Government will be forced to adopt inflation by the middle of October but in any event, it is practically certain to take place in January next when Congress meets.

THE REICHSTAG FIRE TRIAL.

Elaborate arrangements have been made for the Reichstag Fire Trial which opened at Leipzig on Thursday, including the fitting of a searchlight in the court, making it possible for the filming of outstanding features, while selected portions of the hearing are being recorded by gramophone for subsequent broadcasting.

Apparently, there is no attempt to shun publicity and more seating accommodation has been allotted to foreign journalists than to German.

The unofficial International Legal Commission, sitting in London, to examine the evidence relating to the Reichstag Fire, has concluded that no connection whatever, can be traced to the Communist Party and that there are "grave grounds existing for suspecting that the fire was started by or on behalf of the National Socialist Party."

Thursday's hearing opened with melodramatic staging but the seven hours hearing was uneventful. The President of the Court, Dr Buenger, read a declaration emphasising the importance of the trial and referred to the London Commission's findings which he described as "efforts to anticipate a verdict" and "without precedent." He further commented upon the German refusal to permit the accused having representation by foreign counsel, petitions for which were "not free from the idea of sowing mistrust in German legal procedure."

AUSTRO-GERMAN "SETTLEMENT".

The Daily Telegraph correspondent at Vienna reports that disclosures have been made concerning negotiations which have been proceeding recently between Germany and Austria for the settlement of differences.

Germany apparently has been represented by Baron Von Neurath and the Nazi press chief - Rosenberg, and Austria by Dr Tauschitz.

All points of difference have been considered and Von Neurath has forwarded a programme for a whole-hearted cooperation in foreign policy and commerce; the adaption of Austrian conditions to the German model without undue interference in Austrian international affairs; the solution of the Austrian Nazi problem without German interference.

Official quarters in Vienna have not denied the accuracy of the revelations and the press is only half-heartedly doubted.

THE CUBAN SITUATION.

A message from Havana on Wednesday stated that heavily armed rebels from Camaguey were marching on the capital while a second revolt had broken out at Sanctus Spiritus.

San Martin who has declared "I'll leave when I am told to by anyone who has the right," despatched troops of armed students against the Camaguey forces who were reported to have been defeated.

A later Rauter bulletin stated that San Martin had tendered his resignation.

Cuban news on Thursday reported that the situation was still becoming more steadily acute and no decision had been reached on the resignation tendered by San Martin while it was stated that ex-President Cespedes had taken refuge at one of the foreign legations.

The revolution in the Santa Clara Province had been complicated by an outbreak of malaria.

A message from Washington reported that American citizens from the interior were sheltering on the United States warships.

FOOTBALL CLUB DANCE.

His Excellency Presents Platoon Shield.

The Field & Pavilion.

There was a large attendance at the Defence Force Football Club's Dance held in the Town Hall on Friday evening when His Excellency the Acting Governor honoured the company with his presence and handed the Football Shield to the captain of the winning Platoon in this season's inter-Platoon competition. Number 3 Platoon were the winners and there was loud applause when D. Fleuret, the captain, went up to receive the trophy and the team's medals. His Excellency also presented the medals to the respective captains of the winning platoons in 1932 and 1931 - Sgt. L.W. Aldridge and Cpl. F. O'Sullivan.

An outstanding feature of the dance was the introduction of novelties in the form of balloons which provided considerable amusement. In addition particular mention must be made of the Defence Force Brass Band's contribution of the waltz "Vanity Fair" which was greatly appreciated and this departure from the martial strain leads one to hope that we shall hear more of them in the dance hall.

A Slight Grievance.

In the course of his remarks His Excellency said : Ladies and gentlemen and members of the Falkland Islands Defence Force Football Club. I have very much pleasure in presenting this Shield to-night to the Captain of Number 3 Platoon, the winners, with the medals for the winning teams this year, last year and in 1931 (applause.)

"In presenting this Shield I have to remark that Number 3 Platoon also won the Coutts' Cup for the best drill. Now, I hope to see Number 1 and Number 2 Platoons come to the front in future and beat Number 3 Platoon.

"Apparently there has been some slight grievance or grumbling about the closing of the Football Field. All those persons keen on football will agree, I think, that this was necessary if the ground was to be improved. The Honourable George Roberts kindly took the matter in hand and the ground was dressed and rolled and I think all will agree that this was necessary. I think also, you will appreciate that the field was taken in hand because after all, it will make it very much better for you to play on.

"Now the matter of the Pavilion was mentioned at the last Concert got up by Mr Catten. There is a plan of the Pavilion put up in this room to-night, at least I think there is one somewhere about. As a matter of fact work has been commenced on the Pavilion and it should prove a great boon to players - where they can go and change into sports rig in comfort.

"I think that when the Pavilion is erected the question of introducing cricket might be considered. I spoke to Mr Creamer to-night about it. I know that he is an enthusiastic cricketer but he did not seem to hold much hope of getting cricket going again.

"I remember many years ago when Governor Allardyce was here we used to play but sometimes we had to wait an hour or so in the open to bat on an indifferent pitch and naturally the men were not very keen on taking it up. But I think with a Pavilion things would be different.

"On the other hand, of course, everyone here is much keener on football; it is the same in the Old Country. At any cricket match you will see an average crowd but if you want to see a really big crowd you want to go to a football match.

RABBIT PEST PAYS NOW.

Australia's greatest pest, the rabbit, has become an asset. Thanks to the demand for rabbit skins from London and other overseas markets, hundreds of unemployed men are leaving Sydney for the country with borrowed rabbit traps. So great has been the demand for traps that manufacturers have had to speed up production, thereby creating further employment.

Australia exported 8,000,000 lb of rabbit skins, 3,000,000 lb of these to London, last year, and prices have since jumped about 1s.9d. to 3s. 8 lb..

"The Defence Force Football Club has done a great deal of good as people like to go and see the matches - it is something for them to see and helps them to forget their worries. I wish the Defence Force Football Club every success." (applause.)

In response to His Excellency, Lieutenant W.M. Allan (Adjutant) said "Your Excellency, Ladies and gentlemen. I would like to congratulate Number 3 Platoon on winning the Shield and I also wish to compliment the players of Number 1 and 2 Platoons on the sportsmanlike manner in which the matches were conducted.

"I attended every match and I do not think there was one occasion in which I could see any feeling or anything unsportsmanlike to have happened. I know the public enjoy these matches and this year we have been favoured with good weather; there was not a hitch, every match went off according to programme and, in fact, the League finished sooner than we expected.

"As regards His Excellency's remarks about the Field and the Pavilion, speaking on behalf of the Football Club I would say how much we appreciate what Mr Roberts has done and what His Excellency and Mr Ellis, the Colonial Secretary who is now at Home, have also done for us. They have taken a keen interest in the football and its development in the Colony.

"The Selection Committee, of which Mr Creamer is the Chairman, are doing their best at the present time to select a team to play against H.M.S. Dauntless which arrives here at the end of next month.

THE GREAT BRITAIN.

A Derelict Of The Isles.

In an article on the Great Britain a recent number of the Manchester Guardian comments on how 'this noteworthy ship of the mid-nineteenth century came to an ignominious end.

"At one time she was not only the largest ship afloat (her length was 320 feet) but she was the first iron-built steamer to cross the North Atlantic and the first for some years to be driven by a screw propeller instead of by the customary paddle-wheels. Launched at Bristol in 1843, she made a triumphant trip along the coast to London and was greeted by crowds of excited spectators.

"Her appearance was that of a big sailing ship with lines of painted ports along the hull and six tall masts - the smoke stack among them looking strangely out of place. Queen Victoria paid her a state visit on the Thames. She was put on the mail service between Liverpool and New York, where she did some record passages in fifteen and later in ten days' time.

"For over thirty years she travelled regularly between England and Australia, earning big money at the time of the gold rush, when she sometimes carried as many as 600 passengers. Her last trip was in 1886, when, beaten and battered by storms, she put into the Falkland Islands a helpless cripple. Too far gone for repairs, the owners abandoned her to the under-writers, and the once crack liner has ended her days as a hulk."

MOSCOW PROTESTS.

Another strong protest has been made from Moscow to the Japanese Government on account of the arrest on Sunday of a number of Soviet officials of the Chinese Eastern Railway by the State of Manchukuo.

The official newspaper "Izvestia" charges Tokio with plotting to seize the railway after the Russian personnel had been hopelessly terrorised by the arrest of their high officials.

It is held that negotiations now proceeding in Tokio between Japan and Russia for the purchase of the railway are merely a cloak to gain time to prepare for its seizure.

"GERMANY WANTS PEACE."

Dr Goebbels, who is representing Germany at Geneva, while speaking at a mass meeting at the foot of the Neiderwald Denkmal in Germany on Saturday, declared that Germany did not want war.

"We shan't get tired of telling the world," he said, "that Germany wants peace; that she must have peace; and that no nation could gain anything from war."

NEWS IN BRIEF.

- Limerick : A pipers' band stoned and frequent baton charges by the Civic Guard followed a big demonstration of the United Ireland Party on Saturday night when addresses were given by General O'Duffy, Mr Cosgrave and Mr Dillon. Twenty people were taken to hospital with scalp wounds.
- Buenos Aires It is reported that Bolivia has informed the Brazilian Government of her acceptance of mediation from Argentina, Brazil, Chile and Peru in the Gran Chaco dispute. Paraguay has already accepted.
- Berwick-on-Tweed - The balloon which left Dusseldorf on Tuesday last came down on the promenade at Spittal Beach on Saturday after crossing the North Sea. Dr Dreckmann was badly injured.
- Moscow : The Soviet attempt to beat Professor Piccard's record balloon ascent of over ten miles failed on Saturday as the great gas-filled envelope, with its aluminium gondola failed to ascend at all. It appears that the thick morning mist so weighted the envelope with moisture that it was too heavy to rise.
- Johannesburg The South African Cricket Association is not legislating against bodyline bowling but it appeals to all unions to discourage bowling liable to intimidate or injure batsmen.
- Sydney : The Australian Cricket Test Team is to sail on the 26th of March next year with fifteen men. The Control Board suggests that if at the end of the fourth Test the difference in wins is not above one, the final Test should be played to a finish.

MUSSOLINI'S DISARMAMENT PROPOSALS.

Signor Suvich, the Italian Under Secretary for Foreign Affairs, who arrived at Geneva during the week-end is believed to be carrying the final form of Mussolini's Disarmament proposals.

The proposals will reveal Italy, it is expected, in the role of mediator between France and Germany in conformity with the Four-Power Pact.

In this connection the authoritative leading article in the "Stampa" may be recalled maintaining that Germany must be given equal rights and the inferiority laid down by the Peace Treaty removed.

The extremists says that relations between Mussolini and the Hitler administration have become very strained.

Sir John Simon told the Daily Telegraph correspondent that "Germany seems eager to reach a convention. So far I can see the German representatives are by no means bellicose. At the same time there is the great factor of "rapprochement" between France and Italy.

MISS BRITAIN III IN FLAMES.

A message from Poole states that Mr Scott Paine who returned from America on Thursday last after an attempt to win back the motor-boat speed trophy, had a narrow escape on Saturday when Miss Britain III burst into flames after setting up two new records - the sea mile and the single engined boat records - with a speed of 95.68 miles an hour.

He knew there was something wrong with the boat but he went out again not to disappoint the crowd. Suddenly there was a violent backfire, a long flash of flame and an explosion, then the boat was shrouded in a dense pall of smoke.

It appeared that petrol had escaped into the hull of the vessel but fortunately the fire died down when the petrol burnt out.

Scott Paine stated that a break-away of a petrol filter casing caused the petrol to escape but though enveloped in flame he managed to slow the boat down. An examination of the engine showed that the damage was less than at first thought.

MARAUDERS ACTIVE IN CUBA.

According to a report from Havana the internal situation has become worse and Americans have been urged to go to the coast where embarkation can be effected more easily should the necessity arise.

Troops are being hurried to different parts of the country where marauding bands are active, but only 8,000 Cuban soldiers are available and these are insufficient to supply adequate protection to all parts where they are required.

It is understood from Washington that a detachment of troops has already been landed for the protection of American nationals. The responsibility for British subjects is a matter of urgent consideration.

An American citizen's house has been looted but there are no injuries reported. Meanwhile, a later message reports, American residents are fleeing to the warships while the British Consul General has requested the local authorities to provide police protection to British citizens whom the strikers are attacking.

PRESS RUMOURS DENIED.

According to a message from London on Monday the reports of the arrest of the three German balloonists who made a forced landing at Berwick-on-Tweed on Sunday, are stated from informed quarters, to be inaccurate, it being stressed that the balloonists who did not possess passports were merely detained pending enquiries concerning their identity and had since left for Germany.

Press reports to the effect that a mysterious German vessel was recently sighted near the scene of the British Naval and Air manoeuvres off the coast of Scotland are likewise denied by the Admiralty as wholly without foundation.

THE WORLD ECONOMIC CONFERENCE.

A message from London reports that the Dutch Premier, Dr Colijn, who served as chairman of the Economic Committee of the World Economic Conference arrived in England on Monday and had a lengthy interview with Mr Ramsay MacDonald the subject of which, it is believed turned to the question of the revival of the World Economic Conference.

This eventuality is being regarded in London now with less scepticism than heretofore since the city quarters are inclined to believe that the American currency situation will be definitely cleared up in the course of this or next week, thereby removing the most serious obstacle to the general stabilisation of currencies.

GIFT TO THE S.S. LAFONIA.

Passengers on the s.s. Lafonia during the last two or three voyages have been greatly impressed with the striking plaque recently affixed in the saloon entrance and presented to the ship by members of the Lafone family in appreciation of the gesture of the Falkland Islands Company, Limited, in associating still further with the Falklands so well known a local name.

The dimensions of the Plaque, an impression of which is given above, are approximately 3½ by 3½ feet. It is cut in bass-relief in light coloured wood and represents the arms of the Company with a suitable inscription below.

The word Lafonia is already indelibly written in the annals of the Colony as identifying the Company's land south of Darwin; and perpetuates the memory of Samuel Fisher Lafone, the merchant prince of Montevideo who, in 1845, received an indenture from Queen Victoria for land on the East Falkland. Some six years later Mr Lafone became the first local manager of the Company which had been incorporated by Charter in 1851.

Thursday, 28th September, 1933.

DEPARTURES.

The s.s. Lafonia is expected to arrive back at Stanley from Darwin and North Arm this evening and leave later to-night for Montevideo.

WILD DOG HUNT ON THE WEST.

Spot On The "Spot."

"£2. 10s. reward for the dog 'Spot' to be caught dead or alive". The woolshed at Pebble Island Settlement assumed an unusually animated atmosphere on the 10th of August last when the eyes of all turned towards this notice. It was the death writ for Mr George Simpson's dog "Spot" which, for twelve days, had been running wild in the camp in the vicinity of Ram's Ridge.

On Sunday, the 13th of August, our correspondent "Old Bob" writes, six riders set out from the settlement at about 9.0 a.m. with rifles and guns and with Mr W. Betts on foot acting as "Director." The hunters soon spooed their quarry but it was not until after an exciting chase in which "Spot" gave full value for the money that he was eventually run down at Fish Creek and quickly despatched by "Aub." Peck on the beach.

On the return to the Receiving Shed there were drinks and mutual congratulations all round though "Aub." declined to take the reward offered by good old George.

The others taking part in the hunt were Peter Anderson, "Skee" Lee, Toby Henriksen, Ned Berntsen and "Sturd" Betts. "Aub" was riding the horse "Punch" while the others were mounted on "Bluebell," "Charabel," "Flirt," "Prince," and "Skuttle."

THE COLONIAL RIFLE ASSOCIATION'S

SMALL BORE & DOMINION MATCHES.

Some Fine Shooting.

In view of the fact that the Falkland Islands Defence Force Miniature Rifle Club won the Colonial Small Bore Trophy and Medals last year, additional interest was taken in this year's shoot held on the Drill Hall Miniature Range on Tuesday evening. It was agreed that the Team to shoot in the subsequent Dominion Match - this is the Club's initial year in this competition - should be selected on the completion of the Colonial Small Bore event.

The Hon. G. Roberts, Director of Public Works, acted in the capacity of Official Witness whose duty it was to see to the due observance of the conditions laid down for the Shoot. The rules of the Small Bore Trophy competition provide for a Team consisting of ten members each of whom fires twenty shots on two cards at a range of 25 yards with any small-bore rifle not exceeding .23 inches in calibre. The time allowed for each series of ten rounds is ten minutes and each Team shoots on its own range and on any date prior to the 31st of October. In the Dominion Match the team consists of six members who fire ten rounds on one card under the fore-going conditions.

Although no possibles were recorded the leading shots set up a high standard of marksmanship and in the Dominion Match the team returned a very fine average. It should be understood that the scores given below can be regarded as approximate only since the use of a gauge is prohibited and since the scores are subject to adjustment by the Society of Miniature Rifle Clubs in England. The scores were

The Falklands Team's successful score last year was 1,901 while it is interesting to note that in the Dominion Match the total of 587 is only one point less than that of the winning Australian team in 1932. Needless to say, in view of this promising showing all in the Colony eagerly await the official decisions in these competitions.

Besides members of the Club there was a number of the general public present to watch the progress of the competitors. In addition His Excellency the Acting Governor, the Hon. M.C. Craigie-Halkett, accompanied by Major the Hon. J. Innes Moir (Aide-de-Camp,) attended for the greater part of the evening and expressed his gratification at the very creditable results obtained.

THE REICHSTAG FIRE TRIAL.

Soviet Action.

As a sequel to the alleged unfair discrimination against Soviet journalists at Leipzig in connection with the Reichstag Fire Trial, the Russian Government has recalled all its correspondents from Germany and simultaneously has ordered all German correspondents to leave Soviet territory within three days, says the Daily Telegraph Moscow correspondent.

Formal protests have been lodged.

In connection with the Trial itself a further message reports that owing to the demeanour of Vanderlubbe, the principal accused man, the judges find him guilty of "pretence" and therefore, all evidence provided by the official reports, which include his "confessions" will be acceptable as evidence.

THE MEXICAN CYCLONE.

A Vast National Disaster.

The cyclone that raged over Tampico, Mexico, on Monday is much more extensive than at first thought, and the catastrophe is assuming the proportions of a vast national disaster.

The whirlwind, estimated to have attained a velocity of 150 miles an hour, smashed everything in its path, destroying the railway station in the city, the civil hospital, the customs house, and wrecking practically every building in Tampico burying many in the ruins.

Floods are sweeping over the city from the rivers Tamesi and Tanuco drowning many of the survivors of the holocaust. Pan-American Airways fliers report that water fifteen feet deep is swirling through the wrecked town and mud, six feet deep, is stagnating in outlying districts. The floods are continuing far inland and at least two - a passenger and a goods - trains have been engulfed.

As a landing is impossible owing to the waste of waters the airmen are swooping low dropping supplies where marooned inhabitants have been found.

It is estimated that seventy-five per cent of the buildings have vanished and that there is a death roll of many thousands, though the figures are indefinite under the prevailing conditions. In addition some 20,000 people are homeless.

Martial law has been proclaimed in the entire area. Troops and the police are maintaining patrols and a curfew has been established.

---o---o---

ITALIAN EARTHQUAKE.

Central Italy was rocked by an earthquake on Tuesday and it is estimated that there are fifteen people dead and 150 injured. Three quakes were experienced with the centre of the shock in the Abruzzi Mountains. Many houses collapsed on sleeping inhabitants. The homeless have been billeted in other villages and Mussolini has ordered the immediate despatch of food and medical supplies to the stricken centres.

THE MEXICAN HURRICANE.

Early reports of deaths from the hurricane havoc are believed to be over-estimated but the losses are definitely heavy. The recovery of bodies is continuing but only fifty-four have yet been found while there are 850 injured. The hospitals are overcrowded with sufferers while thousands of families are homeless.

Food supplies are running short and it is not known when the relief provisions and medical supplies can reach the stricken area.

The public water system is contaminated and supplies are sought from private wells while as a precaution against the grave danger of epidemics due to pollution, compulsory inoculation has been ordered.

It is revealed that many lives were saved and great heroism displayed by the crew of the British tanker *Flairio* who worked throughout the night of the hurricane effecting many rescues while the vessel remained the sole means of communication by wireless with the outside world.

THE REICHSTAG FIRE.

A drama was produced at Leipzig on Wednesday during the Reichstag Fire Trial, where the Bulgarian prisoner Dimitroff cross-examined Vogt, the judge who had conducted the preliminary examinations. During the course of the examination the latter wilted under the furious onslaught in the harrangues which took place and admitted that there had been inaccuracies while he made evasive replies in relation to other matters.

Dimitroff's questions elicited the statement that the associating of the Bulgarian prisoners with the burning of Sofia Cathedral was an error, and he then drew an admission from Vogt that contrary to the German penal code the accused had been kept in chains for five months despite ten applications at different periods for their removal. In evading a direct answer Vogt said that a greater authority had acted over him in the matter.

At one point when Vogt was apparently giving way under the continued questioning the judge conducting the trial intervened and in the end Dimitroff himself was seized and forced into a seat by uniformed guards.

GENEVA ALARM.

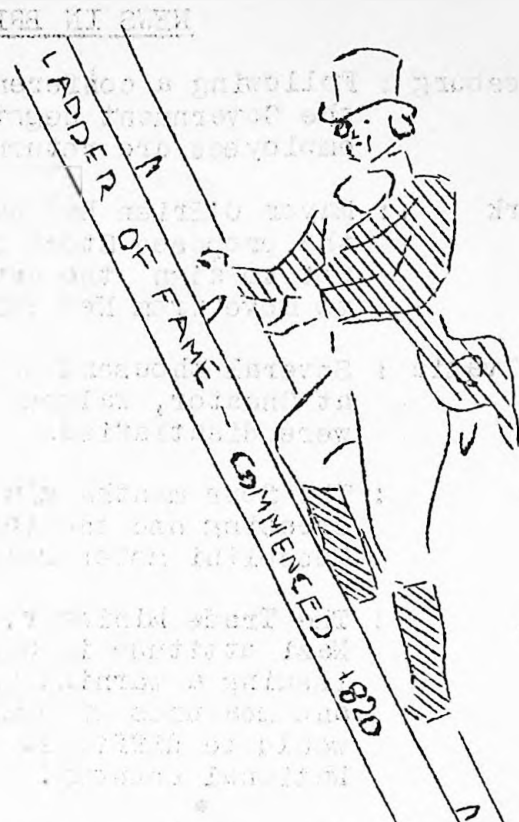

Considerable agitation has been provoked at Geneva by the announcement that the President of the League Council, Mowinckel, intends to introduce in the course of the Council sitting this week end a motion that a League Commission be sent to Ukraina to inquire into the conditions caused by the famine and to suggest measures for relief.

It appears that the French delegation, mindful of the obligation imposed by the newly born Franco-Russian friendship, is not at all enthusiastic about Mowinckel's decision, it being stated that the Secretary General, Avenel, has tried vainly to dissuade the Norwegian from introducing the motion.

NEWS IN BRIEF

- Johannesburg : Following a conference under the chairmanship of the Government negotiator, the striking gold-mine employees are returning to work almost immediately.
- New York : Mayor O'Brien has capitulated on the question of the proposed Stock Exchange taxes and has decided not to sign the measures if the Exchange agrees not to move from New York.
- Pennsylvania : Several thousand of the Ford Motor Company's workmen at Chester, walked out on Tuesday stating that they were dissatisfied.
- Naples : The four months minor eruption of Vesuvius is increasing and the lava is overflowing on to the new Mussolini motor road to the crater.
- Berlin : The Trade Minister, Dr Schmidt, outlined the new Nazi attitude in a speech at Munich on Tuesday, issuing a warning against "forcible interferences and measures of coercion in the trade sphere" which would be difficult to enforce without grave injury to National economy.
- Washington : The Labour Department has issued a permit to Tom Mann, the British Communist leader, for a fifteen days' stay in the United States during which he may deliver an address against War to the Congress.
- Rome : Further earthquake shocks have been felt in Abruzzi area but no damage is reported.
- London : It is officially confirmed that the British suggestion to the United States that the planning of four new 10,000 cruisers will considerably affect the atmosphere of the Disarmament Conference.
- Peking : General Feng is withdrawing his troops from the demilitarised zone in accordance with the Japanese ultimatum.
- Geneva : Britain and America are prepared to recognise the Libian Government and resume diplomatic relations when the proposed assistance plan has been accepted with an amnesty for all political prisoners.
- London : A new Divorce Bill based on the findings of the recent Royal Commission's deliberations is being presented to Parliament next session.
- Paris : It is hoped that an agreement may be reached on the Trade East proposed between France and Germany and a report from Berlin indicates that Germany is anxious to discuss the situation still further.
- Stockholm : Paavo Nurmi was beaten by Ischollo on Wednesday when he was attempting to beat his own record in 1928 for the 15,000 metres.

'PHONE CALL FROM THE GRAVE.

A telephone call from a grave is the latest from Washington. "Slim" Jones, who is trying to break the world's record for being buried alive, turned over in his coffin, picked up his emergency phone and put a call through to Ray Richards, a rival, who was buried alive at Denver.

Jones told Richards that his grave was in the bed of a dried up stream, and that heavy rains threatened to wash him out.

Richards told Jones that bandits came to his grave, tried to steal the day's gate money, threw burning matches down his air tube and singed his pillow.

"INERED TO GOODNESS !"

More than seventy people named Jones were among the all-Welsh passengers on board the steamer Ordna which sailed from Liverpool in August to introduce Wales to the Norwegian fjords.

THE "TALLEST" FISHING STORY.

Here is the latest fishing story, and like most "tall" stories, hails from America:

A year after he had lost his watch while fishing, Mr Fred Hartzell, of Suzanville, California, caught a trout in the same spot.

The watch was inside the fish. Mr Hartzell says that the watch was still going, and had lost only three minutes in the year.

He thinks the action of the fish's gills must have kept the watch wound.

THE MEETING IN THE DAIL.

There was an exceptional display of armed guards when the Irish Free State Dail assembled on Thursday, even the press gallery was posted with armed police.

There was a full attendance, including Cosgrave, A. Mac-Dermott while P. Belton, who is charged to appear before a military tribunal, with General Cronin now "on the run" from the police, were also present. One deputy wore a banned blue shirt.

De Valera, replying to questions, said that he had been in communication with the British Government in reference to the Loch Foyle Fisheries and he declined to refer to the issue with the British Commonwealth Tribunal.

OLD MAN'S 600 MILE WALK.

Sherif Begonovitch, who is just a hundred, recently arrived at Belgrade on foot from his native village of Torjitzza, more than 300 miles away.

The journey took him fifteen days and then he walked back.

GIRLS FIGHT CROCODILES.

How a party of girls fought for the life of one of their friends who was gripped in the jaws of a crocodile has now been told - on the death of the girl, Miss Parul Sen, in the Medical College Hospital, Calcutta.

While the girls were bathing in a river a crocodile seized Miss Sen. At once the other girls swam out after her. They grasped one of her outstretched hands, and beat upon the water and screamed until they frightened the crocodile so that he released his hold and slid beneath the surface.

The brought Miss Sen, seriously injured, to the river bank - but she died later in hospital.

MARLENE STARTED THIS LITTLE WAR.

If Marlene Dietrich, the film star, hadn't started the flannel-trousers-for-women fashion, two nurses of the Royal Infirmary, Leicester, might not have had to resign.

As it is the General Purposes Committee of the Board of Directors has approved of the Matron's decision to dispense with their services because they were seen in the streets wearing trousers.

And yet, nurses from the Infirmary can go cycling in knicker-bookers.

There is quite a war among local women's associations - some for and some against trousers - and now the city's wondering where, and how, the war's going to end.

"MIRACLE" DURING MASS.

The embalmed body of an elderly Christian saint which was said to have winked during the celebration of Mass in the Cathedral of Roccamandolfi, Rome, gave rise to shouts of "miracle" from an excited congregation. Since then great crowds have been besieging the church.
