Colonial Secretary,  
Stanley.

19.3.52.

Chilean Coal - Testing

As we intend to burn Chilean coal in the boarding schools H.E. has suggested that we obtain two sacks of it: one from Peecket Hbr. and the other from the other S. Chilean mine and send it to England for a consulting engineer (or the laboratories of the N.C.B.) to examine and report on its calorific value and best means of use. It is said to have a tendency to clog in a furnace.

I understand that the Fitzroy is going to Punta Arenas on April 1st and could bring back the coal then. It could then, presumably, be sent home on the Biscoe. Ensuring that it got there, and giving us time to get into touch with the engineers in England.

H.E. suggested that Mr. Philips might obtain the coal whilst in Chile, but I find that he is not going. Does H.E. want me to arrange with the FIC for the purchase of these two sacks? They can then be stored at school safely until the Biscoe leaves.

Shall I draft a letter to the N.C.B?

S. H. C. E.

ACB ~~XX~~ ~~Per early P~~ Is it poss. sending some  
of the coal? - I thought I saw  
a letter in recently.

ACB we spoke. Pre 19/3  
over coal for Spw, S.P.T, S.E. & consult  
S.M.O. also re FOR Bay. 24/3

S.P.T. 24 tons (has at Daboy) }  
 Smo. 20 tons (Staley) }  
 Pho. 20 tons (Staley) }  
2-

1 bag from another  
 S. Chilean mine  
 for analysis

Ordered through F.I.C. but Mr. Black is  
 not sure whether there will be space - he  
 is enquiring

I  
 26/3.

July, 1952

~~Mr.~~  
 Mr. Black phoned just before lunch  
 & said that no space was available this  
 voyage nor could space be guaranteed  
 on the July voyage.

You may wish to persevere at a  
 higher level? They could surely bring  
 the two sacks for analysis?

I  
 26/3.

~~Act~~ I phoned Dr. Barton who agrees  
 to carry 2 tons this trip & more in July.

1) Please confirm urgently with F.I.C.

2) Please order through Consul.

Dr. Barton has an idea the  
 are not working, but Consul

in this connection  
 S. Chilean others  
 we advise

Then please discuss where we will  
 perhaps 1 ton to Box bay?

I  
 27/3.

direct that the period to be covered by such review and report shall be reduced and that the making of that and subsequent reviews and reports shall be accelerated accordingly.

(2) Any function under this section of the Government Actuary may be performed by the Deputy Government Actuary.

**24.** Any expenses incurred in the administration of this Ordinance shall be paid out of the Fund. Administrative expenses.

**25.** The Governor in Council may make regulations generally for carrying this Ordinance into effect, and in particular – Regulations.

- (a) for providing for the payment and collection of contributions under this Ordinance and any matters incidental thereto, including penalties for the failure to comply with such regulations;
- (b) for prescribing the manner in which claims to old age pensions may be made;
- (c) for providing for the payment of old age pensions;
- (d) for authorising the payment of any sum by way of old age pension during any period intervening between the making of a claim and the final determination thereof;
- (e) for enabling a person to be appointed to exercise on behalf of any claimant or person entitled to or in receipt of an old age pension, who is, by reason of any mental or other incapacity, unable to act, any right to which that claimant or person may be entitled under the Ordinance, and to authorise any person so appointed to receive any pension on behalf and for the benefit of the claimant or person;
- (f) for providing that –
  - (i) in the case of the death of a person who was in receipt of an old age pension payment may be made of any sum which became payable on account of the pension within three months before the date of his death, but has not been paid;
  - (ii) in the case of the death of a person who was entitled to an old age pension payment may be made of any sum which, if a claim had been made, or, if made, had been allowed, immediately before his death, would have been payable on account of the pension up to the date of his death;
- (g) for providing that probate or other proof of the title of the personal representative of the deceased person may be dispensed with in the case of any such sum as is mentioned in the last preceding paragraph, and that any such sum may be paid or distributed to or among the persons appearing to the Board to be entitled to receive the same or any part thereof, either as being persons beneficially entitled thereto under a will or as next of kin, or as being creditors of the deceased person, or to or among any one or more of such persons exclusive of the others, or, in the case of the illegitimacy of the deceased person or any child of his, to or among such persons as to the Board may seem just;
- (h) for prescribing the procedure to be followed at meetings of the Board and the quorum at such meetings;
- (i) for prescribing the number and amount of the instalments payable under section 10 of this Ordinance and any matters incidental thereto;

I have spoken to Mr. Elliot about the shipment of this cargo and he tells me that the 'John Birrell' will be able to take it. In view that the matter he dealt with expeditiously (for the C.A. should advised the N.C.B. before the coal arrives) he suggests:

- a). That we send our letter to the C.A. under a covering letter to Mr. Roberts, who is the F.I.D.S. representative at the C.A., who would see that it was passed to the proper department;
- b) That in view of some strange fees, which are high, the coal be consigned to the C.A. store.

I suggest the following letter to the C.A.:

(reaching)

I am directed to advise that you that

1. ~~we are despatching~~ about mid-June by the S.V. 'John Birrell' two bags of Chilean coal (labeled, the one A, the other B) are being despatched about mid-June by the S.V. 'John Birrell' so will be appreciated addressed to the Crown Agents' Store, Washington be granted if you would arrange for these to be examined either in a laboratory of the National Coal Board or by a panel of consulting engineers.
2. ~~We require to know:~~ (a) The calorific value of each sample,

- (b) How such compares with the average domestic fuel in the United Kingdom,
- (c) whether the coal is suitable for use in a central heating system in a small boarding school with a room capacity of some 70,000 m.ft.
- (d) any other information of value to us. E.g. the fuel is said to do, recommendations suggestions for over-coking this would be useful.
- (e) if the fuel, either or both samples, is suitable for an Aga or Esse cooker.

3. Any ~~charge~~ <sup>expenses</sup> incurred should be charged against

6

The forces of this Govt. ~~which you administer~~  
aff

and the following to Mr. Roberts.

Dear Mr. Roberts,

Sir. I am S-S to state that

Mr. Elliott has suggested that the  
attached letter to the C.A. be sent to you as you will  
know the department dealing with inquiries of  
this nature. As we want the matter dealt with  
expeditiously, and the N.C.B. approached before the coal  
arrives, I would appreciate any assistance you  
can give us.

Yours sincerely,

Mr. Elliott

17.4.52. Dear Madam,  
I am S-S, on the advice of Mr Elliott,  
to forward to you the attached <sup>copy of a</sup> letter addressed to  
the C.A. ~~to~~ request that you will be  
kind enough to pass it to the appropriate Dept  
2) As it is desired that the matter be  
dealt with as expeditiously as possible and  
the N.C.B. approached before the coal arrives,  
3) Any assistance which you can give in  
this matter would be much appreciated.

Copy to Mrs. Roberts, F.I.D.S. Office, ~~23rd~~ April, 52.

Gentlemen,

I am directed to advise you that two bags of Chilean coal (labelled, the one A, the other B) are being despatched about mid-June by the S.V. "John Biscoe" addressed to the Crown Agents' Store. It would be appreciated if you would arrange for these to be examined either at a laboratory of the National Coal Board or by a firm of consulting engineers.

2. The following information is required:-

- (a) the calorific value of each sample,
- (b) how each compares with the average domestic fuel in the United Kingdom,
- (c) whether the coal is suitable for use in a central heating system in a small boarding school with a room capacity of some 70,000 cubic feet.
- (d) any other information of value to us, e.g. the fuel is said to clog; suggestions for over-coming this would be useful.
- (e) if the fuel, either or both samples, is suitable for an aga or gas cooker.

3. Any expenses incurred should be charged against the funds of this Government.

I am,  
Yours obedient servant,

16/7/52

Unfortunately I was told nothing about this before I left. Mr. Jones the Compt. had returned to the UK and the Vice Compt. never mentioned it. Guess I saw the coal that was loaded on the Philmont and I understand it was very cheap, less than £2 per ton FOB.

I did not pay particular attention to it but from what I remember it looked like lignite coal or a poor quality bituminous coal. I know little about it, but if it is this type then the calorific value would be about 6,000 to the lb.

C.E. F.T.R. 20/7

16-7-52

Ps. Mr. Brown, would probably know more about it, he is a steam man.

0030/111 Original

11 th July, 1952

386-  
0030/111

Dear Mr. Jones,

Many thanks for your letter of the 13th of June, 1952, and for all your help and assistance over the "Philomel".

The trip over was, by all accounts, a great success and we are very satisfied with the work on the "Philomel" and the moderate charges made.

Gutteridge did not clinch the deal with the riveter as there were too many difficulties and uncertainties - not the least being the question of getting him and his henchmen back to Punta Arenas.

I am going into the question of petroleum and coal and will be writing to you further on these subjects.

One of our principal needs is diesel gas oil for the Power Station and sundry motor vessels. I am not quite clear whether this is the same as the 'diesel oil' you mention - Gutteridge seemed to think that gas oil was colloquially termed diesel oil in Punta Arenas.

Again the snag here may be transport to the Falkland Islands and an inability to provide a return payload, unless, of course, you will be running tankers.

I hope that you had a pleasant and successful trip to England.

Yours sincerely,

T.P. Jones, Esq.,  
Casilla, 21, D,  
Punta Arenas,  
Chile.

(Sgd) Colin Campbell.

G.A.

To me 10 & 10A.

J. W.

Cf. See. I will like some information from  
Ole Pw. on the subject of coal.

- 2) Who are the present actual consumers of coal & what are their annual requirements? Presently only medical & P+T at Fox Bay?
- 3) Who are the potential users of coal & what will be the annual requirements? This may be difficult or impossible to answer but at ② Pw. put in for 20 tons. Was this merely a reserve in case of peat shortage?
- 4) Other potential consumers seem to be H/m, who returned the other day with coal for departmental consumption, and S/ to education.
- 5) We will not be able to make firm plans for the future until we get an answer to ② but we can make preliminary investigations.
- 6) Has for example, Fox Bay tried out any Chilean coal? 44 tons is on order for them when fitzgray can bring it, but, if they have not burned any, they should <sup>try</sup> have the same or all of the one ton which fitzgray brought back on its last trip "which is stored in Pw." Ole Pw. to arrange with Eng. & SPT 21.87

See P.W.D.

P. 12 referred.

J. B.  
22/7

✓13

P.W.D. has hitherto supplied Philomel with coal for her Galley to the tune of approx 15 tons per annum.

Other commitments are Anthracite for Govt; House range - quantity varies.

Para 3 of 12. - occasional requests to supplement inferior peat (Town Hall, Red Cross etc.)  
Yes! this was a reserve in case of Peat emergency. Mr. Lethermore showed me a sample of P.A. coal which was of poor quality, but I suggested that at £4 per ton (in figure) it would pay to have about 20 tons in reserve.

H.C. P.W.D

H.E. 20/7/52.

Mr. L. Sec,

The WT Station For Bay received one ton of Chilean coal by the last voyage of Fitzroy. The operator reported the coal as being of no use for his needs and expressed his doubts about being able to burn it in a slow combustion stove.

I have now asked the operator for a full report on how it was tried and what the findings were.

2. Before the decision was taken to order this coal, Mr. Lethermore assured me the coal was equal to UK coal except for the cost. He said both Mr. Rayner & himself had tried it and found it was very good!

3. Mr. Myles, who was at For Bay some years ago told me that he had used "Coronel" coal from Chile and that coal certainly gave satisfaction. It burned well, gave little ash but it was necessary to clean the flues more frequent - not a hardship.

4. Report from Operator For Bay will be forwarded shortly.

A.M. ST

15

To The Honourable Colonial Secretary,  
Stanley.

A

Subject. Chilean Coal for Fox Bay W/T Station.

With reference to the one ton of Chilean Coal supplied to Fox Bay W/T Station a few months ago I beg to submit the following report which has reached me from the W/T Operator at Fox Bay.

Chilean Coal burns quickly with the damper open to allow full draught, with the damper shut it does not burn so quickly but the body of the fire diminishes. This means one must be continually putting on coal. Again more coal swamps the body of the fire making it necessary to open the damper to increase the draught. There is very little heat derived from the coal and since the damper has to be open almost continually it is of no use for cooking. The open grate has no damper and the coal just smoulders.

The Medical Officer has had the same experience with Chilean Coal.

The above report is not satisfactory and it will be of no use supplying Chilean Coal to the W/T Station at Fox Bay.

A. Mercer.

16 SEP 1952

Sir,

8 39.

We have the honour to refer to your letters No. 1507 of the 23rd April and 6th June regarding the sample of Chilean coal sent home for examination and report.

19

2. The sample on arrival was sent to the Fuel Research Station of the Department of Scientific and Industrial Research, and a copy of a letter dated 5th September from the Deputy Director of the Department, giving the results of the analysis and tests carried out on the sample, is now enclosed for your information.

Did we  
know  
this.

3. It will be noted that although the coal can be burnt without difficulty, either in an open fire or in a closed stove, it is of much inferior quality to average British coal as the calorific value is considerably lower and the ash content much higher. The fire would therefore require more frequent cleaning and more fuel would have to be burnt to get the equivalent heating effect of average British coal.

See 21.

4. We are sending details of the analysis of this coal to the makers of both the Aga and the Esse cookers asking them to express an opinion whether the fuel can be used with their products. We will let you know the result in due course.

We have the honour to be,

Sir,

Your obedient servants,

*Leechdale.*

for the Crown Agents.

Your ref. X/51/Falkland Islands Fuel

FUEL RESEARCH STATION,  
BLACKWALL LANE,  
EAST GREENWICH,  
LONDON, S.E.10.

5th September, 1952.

Dear Sir,

In reply to your letter of June 19th I am writing to inform you of the results of the analyses and tests on the sample of Chilean coal sent to the Fuel Research Station.

One bag of coal, labelled 'A' was received.

Proximate Analysis (as received)	per cent	Ultimate Analyses (dry coal)	
		Ash	23.5
Moisture	20.8	Carbon	55.1
Volatile matter	35.2	Hydrogen	4.3
"Fixed Carbon"	25.4	Nitrogen	0.6
Ash	18.6	Sulphur (total)	4.7
	100.0	Difference (oxygen)	11.8
			100.0

Calorific Value  
(B.Th.U. per lb.)

As received	7720
Dry coal	9750

The following tables show the analyses of a typical bituminous coal and a typical anthracite used for domestic heating in Great Britain.

	Bituminous Coal	Anthracite
Proximate Analysis (air dried)	Moisture	9.1
	Volatile Matter	34.9
	"Fixed Carbon"	50.6
	Ash	5.4
Ultimate Analysis (dry)	Ash	5.9
	Carbon	77.2
	Hydrogen	5.0
	Nitrogen	1.6
	Sulphur (total)	1.2
	Difference (oxygen)	9.1
Calorific Value (Dry)	B.Th.U. per lb.	13,620
		14,970

The Chief Inspecting Engineer,  
Crown Agents for the Colonies,  
4 Millbank,  
London, S.W.1.

The Chilean coal had a dull waxy appearance and the surface was covered with fine fissures. It was able to be burnt without difficulty in an open fire, and in a closed stove. The smoke had an unpleasant acrid smell.

The coal is high in ash and low in calorific value compared with domestic fuels in Great Britain. The ash would tend to choke the fire and would require attention by regular cleaning. The fire, if run very hot, would form clinker. More coal relative to British coal would be required for the same heat output. But the coal is bad to

A warning should be given that the sulphur content of the Chilean coal is high viz. 4.7 per cent. This might not matter in an open fire where there is a considerable dilution with air. However, in a closed stove where the temperature in the flue is lower and condensation may occur, corrosion of the flue or chimney by the sulphur oxides might take place.

I trust this brief report provides you with the information you require.

Yours faithfully,

Deputy Director of Fuel Research

X/51/Falkland Is./Fuel.

24 SEP 1952

Sir,

15  
8 We have the honour, in continuation of our letter of the 16th September, to refer again to your letter No. 1507, of the 23rd April on the subject of a sample of Chilean coal sent home for examination.

We have now received replies from the makers of the AGA and ESSE Cookers, and both firms state that the coal is not suitable as the volatile content is much too high. These particular stoves have been designed for burning smokeless fuels, such as coke or anthracite, and would not be satisfactory for use with ordinary bituminous coal of this nature.

We have the honour to be,  
Sir,  
Your obedient servants,

for the Crown Agents.

The Colonial Secretary,  
Stanley,  
Falkland Islands.

Mar 18.

GOVERNMENT HOUSE,  
STANLEY, FALKLAND ISLANDS.  
10th November, 1952.

CONFIDENTIAL

Dear Jones,

10.

In your letter of 13th June you mentioned our earlier conversation about Chilean coal and the possibility of finding a regular market for it in the Falkland Islands.

18 - 21. Since then we have sent home a bag obtained from the Pecket Harbour mine to be analysed and I enclose copies of the reports.

They are not, I fear, very encouraging and I would be grateful if you could let me know

- (a) if there is a superior type of coal produced in any other mines - "Coronel" coal was used here some years ago and was favourably reported on - or
- (b) if there is any particular knack or method which the Chileans employ to get the best out of the coal.

Yours sincerely,

(Sgd) C. Campbell

CONFIDENTIAL.

Dear Mr. Campbell,

23.

As Mr. Jones is at present on the sick list, I opened your letter to him of the 10th November last, which has just been received by Courier, via H.M's Embassy, Santiago.

With regard to the questions you raise therein, the reply is as follows:-

- a) Not in this area. "Coronel" Coal is produced in Coronel some 1200 miles north of this Province, and a small stock only is kept here for use of the Chilean Navy.
- b) Positively no.

Trusting to have given the information you require.

Yours faithfully,

*Sven B. Robson*

Dear Campbell,

I am up and about again now, and I want to take the opportunity of the visit of the Dutch vessel *Felloniea* to send you a short note.

12 5 53 Sven Robson has shown me a correspondence about coal, and I was very interested to read the analysis which you have had made.

In your letter you ask if there is any particular knack or method which the Chileans employ to get the best out of the coal, and I see that Robson replied to you that there is no special way of using it. That is true as far as household use is concerned, ~~but~~ when this coal is consumed in boilers, forced draught must be installed, as otherwise a sufficient head of steam could not be maintained.

I hear that H.E. has had his leave extended to April, which will mean that you will have been pretty much occupied of late.

With kindest regards to you and Mrs. Campbell, I am,  
Yours very sincerely,

Colin Campbell Esq.,  
PORT STANLEY.

Mr Chilean Coal

I have tried this coal in our Rayburn stove in the following manner.

1) Chilean Coal, result. Quite good to cook with but as this coal has deteriorated whilst in stock (becoming small) burns fast. 1 cart load cooks for 5 persons and domestic water for 2 days.

2) Chilean Coal & Peat Excellent fuel for Rayburns

3) Chilean Coal & English Coal Very good results for Household.  
1 cart load lasted 3 days.

4) Chilean Coal in open fires As our stocks are such small coals it was impossible to keep in open fires it fell through the bars, if this coal is in bigger lumps it would burn quite well.

5) Furnaces

Here again such small coal was not successful.  
As in (4) it would be most suitable if in larger lumps

Mr S

44.

(27) See see (28)

29.

In view of (25) and despite (18), I feel that someone should go to Punta on the next Friday and make a practical investigation? SW or SE? or if Dr. Barton is going it could safely be entrusted to him. I feel that peat plus Chilean coal may well be the answer to Darwin problem.

(Yes - I  
have heard  
this before.)

2) SW, main criticism is that though it arrives in sizeable lumps it soon deteriorates breaks up into slack & dust if stored for any length of time.

17/9

SW would be better, I think, but it will not be easy to span him at that time and I suggest we leave it to Dr. Barton who is quite as interested as we are.

17th October,

53.

Sir,

1540255/F I am directed to refer to your letter of the 9th of October, 1953, on the subject of Darwin School fuel supplies and to inform you that it would be much appreciated if you could make enquiries at Punta Arenas regarding coal, 'rajas' and furnace oil. The answer to the problem may well be a small quantity of peat augmented by Chilean coal.

2. It is regretted that quantities cannot be estimated until the size of the furnaces is known, the type of fuel has been decided on and the approximate daily consumption calculated.

I am,  
Sir,  
Your obedient servant,

(Bgd) C. Campbell

COLONIAL SECRETARY.

The Manager,

Sir,

Darwin School Fuel.

Your Ref. No. 1507. 24.11.53.

31.

15 m 03551F

Coal: Further to our letter dated 9th. October 1953 we confirm that Peckett Harbour coal is available and that our s.s. "Fitzroy" will have space on her June 1954 voyage.

Contact was made with the Manager of the Farm which works the coal, Mr. W. Macleay, who estimated that he could deposit 100 cubic metres in bulk alongside our vessel in a day at \$1000 per cubic metre, weighing approximately 930 kilos each. = 204, 6

5. £3.00 per  
person

It appears that it is not customary to sell Chilean coal by the ton weight.

Mr. Macleay confirmed that to bag the coal would be extremely expensive, further that it must be stored in a covered shed and protected from daylight otherwise it deteriorates rapidly therefore we do not recommend the purchase of more than 100 tons at any one time.

Rajas: The present cost is \$17 for a 7 ft. post weighing 30 kilos delivered in Punta Arenas i.e. 2/- each at the official rate of 350 pesos to the £. Our Agent suggests sawing them in half for better stowage and will quote us for a nominal 10,000 kilos.

Please let us know if you wish us to pursue either matter further.

I am, Sir,  
Your obedient servant,

C.G. Darley

MANAGER.

Bnf

Sch.

Pre see (32) and previous correspondence. I would still like more information regarding rate of consumption in furnaces, whether it is best used alone or in conjunction with other fuels - On Barton's personal recommendation etc, + I think this is best done by discussion.

Could you therefore pre have a talk with Mr. Barton - we will need to come to a final decision when Mr. Young is here.

H.C.S.

Q

30/11

I have seen Mr. Barton who tells me that Mr. Young has not yet mentioned the boarding school and that he has seen no heating place. Until we know what furnace is to be installed we can get nowhere. As Mr. Young is now leaving for 10 days I am returning the file until the matter can be taken up with him.

The Montevideo Gas & Dry Dock Co. Ltd.  
25 de Mayo 796, Esq. Juncal  
Montevideo

Dear Sirs:-

5 TONS COKE

On the 6th December last, we received from the Colonial Secretary of the Falkland Islands, the following telegram:

37

"PLEASE PURCHASE AND SHIP BY NEXT VOYAGE OF SS FITZROY  
FIVE TONS OF COKE"

and according to same we sent you on the 29th of that month, our order for "5 toneladas carbón coke en bolsas", the s.s. "FITZROY" being at that time in your dry dock.

Sunday last, the 23rd inst., we received another cable from the Colonial Secretary, reading:

38

"MY TELEGRAM 3RD DECEMBER COAL NOT COKE RECEIVED STOP  
PLEASE EXPLAIN AND ENSURE SHIPMENT FIVE TONS COKE FIRST  
OPPORTUNITY"

Taking the above into consideration, we should like to have your information, in order to pass same to the Colonial Secretary.

We take this opportunity to inform you that the s.s. "FITZROY" is expected here about the 4th próximo, and hope you will make the necessary arrangements to ship the 5 tons coke by this next trip.

Awaiting the favour of your reply, we remain,

Yours faithfully,  
MACLEAN & STAPLEDON, S. A.

S.F.C. Minutes of Meetings

48

EXTRAORDINARY MEETING OF THE STANDING FINANCE COMMITTEE  
HELD IN THE OFFICE OF THE COLONIAL SECRETARY ON MONDAY  
THE 26th SEPTEMBER, 1955.

Present:- The Honourable the Colonial Secretary (Chairman)  
The Honourable Mr. A.L. Hardy, B.E.M., J.P.  
The Honourable Mr. S.C. Luxton  
The Honourable Rev. W.F. McWhan, M.B.E.

The Chairman opened the Meeting by informing Hon. Members of the business to be dealt with, which was the appointment of a Caretaker for Darwin Boarding School. Members had visited the School and had seen for themselves the work involved initially. The Chairman said the work appeared to be too much for one man (i.e. the Caretaker) and asked Hon. Members to consider the employment of an assistant until such time as the school grounds had been cleared and put in order.

Members agreed to the engagement of a Caretaker at £400 per annum inclusive and an assistant for a period of 12 months at Stanley rates - 2/4d per hour, together with free board and lodgings.

Note The Chairman received the approval of members for the purchase of 5 tons of Block Fuel for Darwin Boarding School at a cost of £100 plus cartage from Goose Green to the School.

MEMORANDUM NO. 12 FOR STANDING FINANCE COMMITTEE

Fuel Requirements - Boarding Schools

A. Darwin

It is clear that there will, in all probability, be insufficient financial provision to meet the fuel requirements of Darwin Boarding School. This is due to :-

- 1) Consumption is obviously going to be considerably greater than at first calculated. In addition the initial stocks provided to the school have not lasted as long as was originally expected.
- 2) A misunderstanding between the Acting Superintendent of Education and the Superintendent of Works over estimating for requirements in 1956/57 Estimates for the Light and Fuel, Government Buildings.
- 3) Failure to co-ordinate departmental requirements under this item for which the Colonial Secretary must accept responsibility.

This item (Head XVI Public Works Recurrent, item 12 - Light and Fuel Government Buildings) is extremely difficult to estimate with any real accuracy. Much depends on the weather and a good summer should see savings. There is an amount of £2,750 for the vote and although this will probably be insufficient it cannot at this stage be estimated by what extent it will prove to be inadequate. As things stand it is provisionally estimated that approximately a further £300 to a £1,000 will be required to meet Darwin's requirements which, it is now calculated, may run to approximately £1,500 per annum.

B. Port Howard

It is now expected that the Port Howard Boarding School will be completed by February or March, 1957. Full details as to the heating arrangements are still awaited from James Love grove Waldron Ltd. and it is not yet known what system will be employed for heating the school. It is proposed that a double Rayburn should be installed for cooking. Until further information is available from Waldron Ltd. it is not possible to estimate the exact amount that will be required but it is provisionally estimated that three tons of patent fuel or coal will be required for the Rayburn for a six months period to start the school (cooking only) and ensure a carry over until the next financial year.

Honourable Members are asked to recommend for approval supplementary financial provision amounting to £1,000 to cover both Darwin and Port Howard for the remainder of the current financial period.

Stanley,

13th February

1957

The Honourable the Colonial Secretary,  
STANLEY.

Sir,

Phurnacite ex m.v. "HANNE-S"

We regret to advise you that due to our Warehouse Platform Scales registering incorrectly we have delivered to Government quantities far in excess of that ordered for Stanley (90 tons) and Darwin School (10 tons).

~~57~~ The attached statement shows the almost incredible difference in a full basket weighed on (1) Warehouse Scales, (2) Works Department Scales, (3) Public Works Department Scales, and it is clear that no reliance can be placed in any of the weights recorded on these scales which are admittedly very old.

Our Head Office has telegraphed confirmation that the manifested weight of 332 tons 3 cwts was invoiced and shipped from Cardiff, and we now ask your permission to divide the known number of baskets discharged (643 7/10ths) into the manifested weight less 25 cwts delivered before proper discharge began, and arrive at a tonnage figure acceptable to you, thus:

		T	Z	Q	L
643	7/10ths baskets	=	330	18	- -
1	"	=			1151.41

For a/c Government at Stanley					
226 baskets	=	116	3	1	15
" " " at Goose Green					
25 <sup>1</sup> / <sub>2</sub> baskets	=	12	19	0	8
" " F.I.Co. to "Fennia"					
255 baskets	=	131	1	2	2
" " " at Goose Green					
137 <sup>1</sup> / <sub>2</sub> baskets	=	70	13	2	21
		330	17	2	18

Regarding the excess over 90 tons delivered in Stanley, and over 10 tons at Goose Green we assume you will be content to retain the latter but would like us to remove the former. If we can leave it in the Land Auster Hangar until we see an opportunity to ship to North Arm, it will be doing us a great service.

We have also to thank the Superintendent of Public Works and his Foreman for their ready co-operation yesterday in reweighing the contents of one basket, even though in one way the result only added to the complexity of the situation.

See 424

I am, Sir,  
Your obedient Servant,

*G. R. Barton*

MANAGER

26th February, 57.

Sir,

56.

I am directed to refer to your letter of 13th February, 1957, informing Government that due to inaccuracies in your warehouse platform scales, Phurnacite in excess of the quantities ordered has been delivered to Government Stores in Stanley and Darwin School.

2. On the basis of 332 tons 3 cwt. having been shipped from Cardiff, a figure which has been confirmed by your Head Office, I am to inform you that your proposal to divide the number of baskets discharged (645 7/10) into the manifested weight, less 25 cwt. delivered before proper discharge began, is accepted.

3. Taking the weight of one basket of Phurnacite as 1151.41 lb. the total weight of fuel received in Government Stores was, in 226 baskets, 116 tons, 3 cwt. 1 qr. 15 lb. and at Goose Green 12 tons, 19 cwt. 8 lb. in 25 1/5 baskets.

4. The excess of fuel delivered at Goose Green for Darwin School, i.e. 2 tons, 19 cwt. and 8 lb. will be retained but the excess of 26 tons, 3 cwt. 1 qr. and 15 lb. delivered to Stanley may be removed. There is no objection to this excess over 90 tons being left in the Auster hanger until you are able to ship to North Arm.

I am,

Sir,  
Your obedient servant,

(Sgd) S.G. Trees

Sir,

Open Cover 3531 Insurance of Fuel

I am directed to refer to the arrangements for the insurance of shipments of Coal and Coke etc. and to inform you that as a result of a recent review of insurance rates generally the Underwriters have agreed to reduce the Marine Rate for shipments of Coal and Coke from the United Kingdom to Falkland Islands on or after 1st January, 1957, from 6s. per cent less 10 per cent less 10 per cent to 5s. per cent less 10 per cent.

I am, Sir,  
Your obedient servant,

The Colonial Secretary,  
Falkland Islands.
